Marlene H. Dortch, Esq.  
Secretary  
Federal Communications Commission  
445 12<sup>th</sup> Street, S.W.  
Washington, D.C. 20554

**Re: Ex Parte Presentation, *Applications of Comcast Corp. and Time Warner Cable Inc. for Consent to Transfer Control of Licenses and Authorizations*, MB Docket No. 14-57**

Dear Ms. Dortch:

On Monday, August 25, 2014 TheBlaze Inc. ("TheBlaze") filed comments in the above referenced proceeding. Those comments were accompanied by the views of more than 52,566 Americans collected by TheBlaze. In the interceding two weeks, 3,730 additional citizens have registered their opposition to the proposed transaction with TheBlaze. In order to ensure all Americans' voices are heard by the Commission, TheBlaze has appended those comments to this ex parte submission.

In addition to the 56,296 comments collected and submitted in its filings and this ex parte, and the more than 74,000 comments already appearing in the docket, TheBlaze notes that several additional commenters, including CREDO Action, Free Press and Public Knowledge have also collected and submitted comments from citizens in opposition to the proposed transaction. By TheBlaze's estimate, the total number of public comments in opposition to the Comcast Time Warner Cable transaction exceeds 300,000.

The Federal Communications Commission has the unique Congressional directive to ensure that the proposed transaction is in the public interest. Accordingly, TheBlaze believes these comments are highly informative as to whether the public believes that the transaction is in the public interest and should be given due consideration by the Commission.

Thank you for your attention to this matter.

Sincerely,

John B. Simpson  
Consultant to TheBlaze Inc.

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Never do monopolies provide lower cost, better service and choice for the consumers. The opposite is always the case. The public is forced to pay for all types of programming that is not wanted because cable companies bundle popular programming in the more costly bundles. If the consumer wants it they settle for the bundle which contains their favorite networks, if they can possibly afford it. The cable companies' revenue is greatly increased by that practice. Consumers end up paying huge amounts of money for the few programs that might be what they would choose.

My choice is taken away by the use of such practices and it makes it impossible for me to try to reduce my cable bill. I cannot afford the \$200/mo I pay now along with other rising prices of food, electricity, medical costs, etc. We all know the cost of living is going nowhere but up. The people are suffering financially already, and many to the breaking point, so please do not add to the burden of the working public. It is already a burden for Americans and will further take away our freedom and our money. Television is supposed to be entertainment, not a necessity of life.

Please do not approve this merger which will cause huge financial problems for many Americans. Citizens have the right to choose for themselves what they want to watch. I don't want what I like taken away from me. The Comcast/Time Warner Cable merger will greatly benefit the interests of those two companies and the government will benefit as well. It will not be in the interest of struggling Americans.

Thank you, Loretta Speckman

Sincerely,

Loretta Speckman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

THERE IS ALREADY TOO MUCH RESTRICTION ON OUR CHOICE OF CABLE PROVIDERS.

WE NEED MORE COMPETITION, NOT LESS!

THIS MERGER WILL CREATE THE WORST MONOPOLY IN THE HISTORY OF CABLE TELEVISION PROVIDERS.

IF ANYTHING, THE FCC SHOULD DE-REGULATE, SO MORE PROVIDERS CAN OFFER THEIR SERVICES  
WITHIN MUNICIPALITIES ACROSS THE COUNTRY.

IN FACT, A TAX ADVANTAGE SHOULD BE OFFERED TO MUNICIPALITIES WHO ALLOW COMPETITION.

COMPETITION IS THE FOUNDATION OF CAPITALISM; WHICH BUILT THE UNITED STATES - CONVERSELY,  
UNREASONABLE RESTRICTIONS OF CHOICE ARE TEARING OUR COUNTRY APART!

CONTRACTS WITH MUNICIPALITIES SHOULD BE INVESTIGATED, TO REVEAL ANY KICK BACKS OR OTHER  
MONETARY BENEFITS GIVEN TO COMMUNITY LEADERSHIP!!

Sincerely,

MABEL CURRY

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is already non responsive to any public input. Making them even larger is not going to improve the worlds worst customer service. I have literally spent hours on hold trying to get service from Comcast in the past.

The public has a right to have good competition and having Comcast grow so large will absolutely stifle competition.

Monopolies are what the government should be protecting us from not enabling them. Just because they have bought access to the President and his advisors does not release the FCC from doing its job.

Say NO to Monopolies!

No to the Comcast merger!

Sincerely,

David Evans

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Dear FCC,

This email is in regards to the Proceeding Number 14-57. Comcast announced it was going to buy Time Warner Cable, who represent two of the biggest cable monopolies with the worst customer service records are merging. The result of this merger will mean that they will dictate what 30% of America can see on cable TV resulting in less TV choice, less competition and higher cable bills. serving the public interest means more choice, more competition and lower cable bills. My concern is the the monopoly will result in fewer television choices and the noted higher prices.

The merger is not in the best interest of the public and I ask that you do not support it.

Thank you,

Jim Hall

Sincerely,

Jim Hll

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have been a Comcast Internet and Cable TV customer for the last 9 years. I can say, without a doubt, their customer service is the worst I have to deal with on a regular basis. Unfortunately, they are also the only non-DSL ISP in my area, so I'm forced to use them for internet. Recently, in an effort to save money, I tried to sign up for one of their TV/internet bundles. After explicitly asking about extra fees (they said there were none), the customer service rep took over an hour to set an appointment for the install, notified me at the last second that there was a \$20 monthly DVR fee, and ended the conversation.

To say I was irate was an understatement.

I ultimately cancelled the service. I will not be bait-and-switched like that. The problem is, that they control an astounding number of people's sole access to TV and internet through regional monopolies, controlling it to the point that competitors simply are not allowed to even establish a presence. Not to mention, their lobbying and political activities over the past few years demonstrate specific intent to subvert the democratic process of antitrust review.

I have no experience with Time Warner, but from friends who have and numerous stories I've read, I understand their customer service is on par with Comcast's.

My latest incident is far from the first. They also destroyed a cable modem that I personally own and refuse to pay for it, obfuscating the process to get it replaced at their cost. I've spent over 20 hours on the phone with them trying to resolve the issue and I've got nowhere with them.

When there is no competition in a region, customer service takes a back seat to preserving profits. They have no interest in improving customer relations because there is simply no viable alternative in many areas. Merging with Time Warner may simply mean they control more areas, but with their monolithic ability to lobby local government into preserving their regional monopolies, the customer will continue to be hosed in terms of cost and service.

I implore you to stop this merger. They are the new face of monopoly in America. The customers and US citizens in the areas both companies serve will suffer immeasurably if this merger is allowed to proceed.

Sincerely,

Robert Slater

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast already behaves like a monopoly with respect to their service offerings on both the media side and internet side. The idea that there is a choice between providers just doesn't hold water. Comcast owns the infrastructure, and certainly doesn't resell bandwidth for use by competitors, to create a mini-custom cable system. Ha! Instead, they significantly overprice all of their services, INCLUDING the local only option that is re-broadcast in SDTV rather than HDTV (the so-called low-cost Comcast mini converter cannot render HD content, that's another box and \$10 additional, to view OTA content in it's native format).

Look at the recent finger pointing between Netflix and Comcast, Verizon, AT&T, etc. In that case, a potential media service competitor (Netflix) was and is being intentionally stonewalled by the companies that own the "internet subscribers" (the end points), based on allocating only a miniscule portion of their entry point bandwidth to Netflix, essentially ruining their quality of service, and creating (or preserving) an advantage for Comcast.

Some may mis-characterize the last statement as net neutrality. It isn't. This is plainly "I'm Comcast, and It'll treat you like I want to treat you... not like you want to be treated. Again, misbehavior, because they can, because there are no viable options for competition.

Bundle, bundle, bundle. A bad marketing idea that disguises the real cost of profitable services, as well as services that run at a loss. Just try and figure out what it costs for say, the local channel only option at 5 major markets served by Comcast. Now compare that to their competition, if you can find a competitor. In my case, the fee was less than \$10 a month, for a period of over 10 years. Suddenly, Comcast raised it to over \$20 a month, with no service improvement. In fact, their representatives said I was now required to lease a converter to receive my local channels on a modern (circa 2008) cable ready TV. My response: take your newly priced cable and ... (fill in the blanks)

You should inquire about Comcast's offerings as compared to satellite services, although the latter are not regulated as cable operators. It would be wise to investigate the xDSL and fiber offerings as well, from Verizon, AT&T, and others. Defining a competitor in the cable "space" includes other media companies that provide similar offerings.

Allowing this transaction between two poorly behaving companies is not in the best interest of the public at large, and is certainly not in the best interest of Comcast's customers, who continue to receive under-whelmingly poor service at industry leading HIGH prices.

Sincerely,

Gregg Rasor

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger will mean less competition for the consumer. As it stands, the consumer can "shop around" a bit for service, but this merger will leave far fewer choices. If the public interests are considered, I would not vote to expand the size of these two providers. Service will be limited to fewer choices. Thank YOU.

Sincerely,

Constance Krizner

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We need to maintain competition among businesses. Competition is healthy for the economy.

Comcast has adopted that attitude that they do not care about their customer service. It is always like pulling teeth to get something we need.

They are not affordable.

No monopolies.

Sincerely,

Elizabeth French

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Moved to new location 08/01/14. Scheduled bundled TV, internet & phone connection for same 08/01/14. As of 08/25/14 still no service from Comcast despite four in person visits, ten phone calls to customer service and having been told seven different bogus installation dates. In all communications we have explained that our home based business is out of commission without the requested service. The only thing that Comcast has not failed to follow through on is sending us a bill for services that they have not yet provided to us. Unprofessional and unethical.

Sincerely,

Julie Apeakes

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

A merger of this magnitude would leave a huge portion of the population without a choice as to where to get their news and entertainment. This merger would in essence create a monopoly or an oligopoly. They would eventually be able, due to their size and influence, to push any other option out of the way and force those who want cable to go with this monster company. In the interest of a controlled capitalistic society that we have, it is your duty to overrule this merger.

Sincerely,

Doug Taylor

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast already cheats it's customers out of what is now the norm [ HD ] by charging extra for it--and even charge twice for internet service

They also constantly raising you bill almost every month any where from \$2.00 to \$10.00--and I don't even get showtime or any of those add on's

They don't give they only take--DON'T LET COMCAST TAKE TIME WARNER or ANYTHING FOR THAT MATTER--THEY ARE PIRATES !!!

Sincerely,

TERRY MATTHEWS

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I think that there should not be monopolies in business, esp. cable/television. The bills are high already and there is very little worth watching now. Channels should be alacart so everyone gets the programming that they desire.

Sincerely,

mary harper

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

less competition is not conducive to the public interest. We want more choice and more competition not less. Comcast is offered in my area and I would like to be able to switch to their service if DirecTV begins to offer poor service. I believe that Comcast will become a worse option and DirecTV and Dish will be able to charge more as they become a less reliable option. I may just drop cable altogether if they do not offer the programs I want to see like The Blaze network. Fewer options means less chance of that happening.

Sincerely,

Frederick Gernand

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

These companies are already virtual monopolies in their geographic areas. Without the competition of a free market there have already been terrible abuses of public trust and duty.

I cannot find and have not heard a single positive reason for allowing this merger to happen.

It is not in the public interest in any way.

It will not foster competition.

It will not encourage improvement in technology or service.

It will not lower prices.

It will not improve customer service or satisfaction.

It will not improve service delivery. Any improvements that do occur will be the result of the cable and media industry itself, not the result of the merger of these two companies.

Do not allow this merger to take place.

Sincerely,

Brian Fuller

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is already the cable monopoly in the Central PA.

Not having a choice for a cable provider is unfair.

The customer service is terrible.

The rates keep going up, the choice of channels do not keep pace with the rates,

and if there is a merger I can not even think to which the rates will climb.

PLEASE DO NOT ALLOW THIS MERGER!!!!

Think of the middle class and struggling to get along in this economy.

DO NOT ALLOW THIS MERGER!!!!

Thank you!!!!

Sandra

Sincerely,

Sandra Jo barclay

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast service is one sided The extreme left. The ABC of news, RT TV, Alcazar TV. only one middle of the road Fox News. NO NEWS COMONY THAT BELEAVES LIKE OUR CONITUTION, & BILL OF RIGHTS as our foundering fathers. That we we need the BLAZE TV. God given rights not government given rights. On my business Comcast I have not been in the phone book for 3 years. Comcast refuses to turn in the phone number to the proper phone books. They have coasted me a lot of money. I will be glad when my contract is up so I can change carriers. All so when a complaint is made they will not get back if they are aloud to grow I can only believe the service will get worse.

Sincerely,

Ron Anderson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Doesn't anyone remember studying about monopolies and how they were broken up because of fear of no competition???? This merger is creating the same kind of situation again. So why??? We already have lost too many independent small businesses.

Service is not great from these companies and now will it get worse if the merger is allowed? I am against this merger. We already have terrible choices on television, junk tv is what is offered. So now we will have more junk thrown at the public who many times is not able to discern good from bad television. I urge the FCC to not allow this merger. Loss of competition creates control over what is available in TV land.

Sincerely,

Sue Schimandle

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Some Cable-TV services are already over-priced, but at least there are some competitive options still out there.

I found, though, that in certain Zip Codes, choices are limited and controlled, which to customers is NO CHOICE!

Competition is needed for pricing to be at fair-market-value!! And also choices and competition are necessary to allow a free marketplace of ideas.

Please do NOT allow COMCAST and TIME WARNER Cable companies to merge, and therefore further limit free choice in the area of media communications -- vital to individual liberty.

--Desta Garrett

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The news is already being filtered so much before it is told that we are not hearing what we need to hear to know what is going on-we need to hear more than just one side of the news-why is it that fox news tells the you so much more about events in the world while other stations only brush across the subject (leaving out very important details) and move on to another subject. The blaze TV goes into detail about what is going on in the world that we need to know-things that Glen brings out are important for our nation-And laugh all you want about Glen, he has predicted almost all of what is happening in our world today. To bad no one listened. Now look where we are.

I feel our news stations are not telling the whole story and our nation is in jeopardy due to no one really knowing what is going on in the world. But honestly, that is what you want, right? WE DO NOT WANT YOU TO CONTROL ANY MORE THAN YOU DO! IT IS NOT IN MY PUBLIC INTEREST FOR THIS MERGER TO HAPPEN-I WANT A CHOICE-NOT WHAT THE GOVVERNMENT WANTS TO FEED ME.

Sincerely,

Jenny Claffey

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It doesn't allow for free market principles of supply and demand and monopolizes technology, becoming a unnatural gatekeeper. It is contrary to the principles of a democratic republic. Comcast and Time Warner also have horrible customer service, likely to worsen.

Sincerely,

David Sorenson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I've had Comcast as my cable TV provider ONCE. The service and costs were TERRIBLE. I don't think this merger should be approved because it will be they will have no problem increasing costs and providing even less desirable service.

Sincerely,

Jen Staffeldt

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is too large with too much control over our country's communications already, let alone allowing them to buy the second largest cable communications company - Time Warner Cable Inc. as well. Why allow a merger like this that will inevitably lead to a situation of over consumer control and lack of competition not unlike that of AT&T back in 1982. I'm very pro free market capitalism, but not to the point of giant corporate monopolies that end up controlling a particular market from top to bottom, crushing out all competition and choice within their market. Comcast has already been sued for manipulating band width content delivery against selected competitors, which should be enough cause for denial in allowing them even more span of market control. Companies like IBM and Microsoft were sued for gaining too much power and control over their markets, and were forced to back off. Even more related to this current merger attempt by Comcast, was the attempt of AT&T to buy T-Mobile and most recently, the attempt of Sprint to buy out T-Mobile - both of which were disallowed. Please do not allow the merger of Comcast with Time Warner Cable Inc. A merger of this magnitude is definitely not in the public interest. History has shown that if allowed, it will only set the stage for even less competition, which will result in less public freedom of choice in communications and information, and less innovation in market solutions.

Sincerely,

Ron Knight

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the comcast/ time warner cable merger is in the public best interest because a monopoly is never a good thing. It stops innovation, helps increase prices and stops good customer service. Time Warner's customer service is very bad already. My father passed away and I need to discontinue his service. It took many calls, going in person with his death certificate to cancel his service. Plus paying three extra months for service that was not being used or wanted. Now I'm sorry we will give you a refund. Please do not pass this merger.

Thank you,

Barbara Kingdon

Sincerely,

Barbara Kingdon

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Big business is taking over our country and pushing the small companies out. Mom and Pop businesses are dying all America- It's bad enough that FCC requires that on my cable package I have to have 20 different sports channels that my family does not watch but I cannot have other channels that I want added because they are not included in my package because I have to have so many sports channels-I cannot pick the channels I want now- what happens when a bigger company takes over?

Sincerely,

Sandra Smith

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It gives Comcast too large a share of this industry. If they control 30 percent of the market the customers they will have too much say about what is shown on cable TV. Comcast doesn't listen to it's customers now. Bigger isn't better. If the government allows this merger then this company should be considered a monopoly and regulated like utilities.

Sincerely,

Sandra Kollar

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The cost for cable is high enough now as it is. You allow more of the larger company's to merge and it will drive up the costs to the individual users. For example in my case for cable and internet I have to pay \$156.00 per month. the cable company's make it so to receive all of the more liked T.V. channels you have to purchase the highest cost package they offer. They put a few good selections in each package but to be able to receive all the major channels most people like to watch you have to pay for the highest charged package. It is not just the cable company's that do this bit also DISH and Direct T.V.

It is time that these company's stop merging and stop hitting the consumer with such high costs. The cable company's should be required to make it possible for people to receive the channels that are most popular all in one package that is not the highest costing package. Look at this cost for low income families and people on a fixed income and see how hard it is for them to receive T.V. and popular channels at a price they can afford.

I do not like government getting involved in commercial businesses however at times it is necessary to help keep costs reasonable and affordable for all. This is one of those times. The cable, DISH and direct T.V. company's are out of control and the loser is the customer. Allowing this merger to go forward will just add that much more to the problem.

Sincerely,

Joseph Whimple

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

TWC currently has a monopoly within the city limits of Bowling Green; and, we have watched our rates continue to increase as Time-Warner becomes less and less responsive to issues and complaints about service. I currently use Time Warner for internet access only, having switched to DirectTV for television service.

It has been my understanding that municipalities and cable providers can not collude on restricting access to other providers within said municipality, but yet, there seems to be no way around this unfair practice. Allowing the merger of TWC and ComCast to go through will act to further inhibit competition and fair trade.

Thanks you for your consideration.

Sincerely,

Steven Shurts

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

customers like me and my family deserve more choice and not less. A merger of these two companies -- which have shown to have no regard for proper customer service or certain popular programming -- will lead to less opportunity for diverse and desired programming, as well as worse customer service due to less competition. If the cable industry were not regulated (protected) by State, Local and Federal governments, then I would have no qualms with them combining and letting the free market decide. However, this is not unfortunately a free market by any means, and this merger will make it worse. Please reject/deny this merger.

Sincerely,

Greg Larkin

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe the networks are to provide all views and not to block out all that don't agree with their views! Free markets and the freedom to express different points of view is what has made America different and successful! Even if I was dissatisfied with my provider and would not switch to someone that tries to control the information I have access to and that includes not offering The Blaze TV. This is supposed to be about servicing the customer and we want all sides to have the same opportunity! Trust that people can make their own decisions without a network controlling who has a right to be heard and that forces us to find providers that will offer what we want but they should not be allowed to control such a major portion of the airways! Please do not allow this merger!

Sincerely,

Gina Happel

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

If you allow Comcast and Time Warner to merge , we will have no competition between cable companies , the small companies will not be able to compete with them, they will make choices for me as to what I will have to watch, and I get higher cable bills . Just as it was with Southwestern bell telephone years ago when they were the big boy's on the block.

Please do not allow this to happen, we should learn from our mistakes of the past and NOT repeat them

.

The FCC are to serve the public's interest and that means MORE choice and MORE competition, and lower cable bills.

Sincerely,

Janet Seib

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

COMCAST, at least, is (1) an exceptionally poor service provider; they are (2) totally one-sided politically; and this would (3) make them bigger and stronger to stuff their agenda down the throats of the 50% +/- who do not buy into their beliefs and biases. Let me provide a bit of evidence.

(1) While being treated for cancer in AR in 2010, I was renting an apartment and using the only service provider available in the building - COMCAST. It took far too long to get both the TV and the Internet working right. Much of the time the right persons were not available or abrupt or rude or incompetent or not trusting, etc. Finally I found one person who cared enough to get the whole mess straightened out. (2) COMCAST will not even discuss the possibility or hope of adding the BLAZE to their lineup. Of course not!! It is politically divergent from their CEO's views. Fortunately, from our service provider, we do get the BLAZE. It is really thought provoking and seems to be based upon facts, data, research, and thoughtful opinion to a great extent. (3) To permit the merger would be a reward for one thing and one thing only - because COMCAST is on the right political side at this time. BTW, my comments beg the argument that FOX is also one sided as so many claim. They are simply ignorant when they claim this. I get so mad at the political rhetoric of some on FOX - it is NOT one-sided.

Sincerely,

Ken Case

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It would become a very powerful monopoly. My husband and I believe in independent thinkers, builders, companies, without government interference. In a huge merger such as Time Warner/Comcast, I think they would have too much power over decisions that the people make, such as commercials, programming, networks, etc. Their example of not allowing The Blaze into their feifdom is a perfect example. This is totally political. FOX News is the most watched program, outnumbering CNN, NBC and MSNBC combined. The reason there is only one conservative network is obviously political; ie, government interference. We had Time Warner in Maine and it was always raising prices with no appreciable difference in services. Comcast here in Florida is the same, with among our friends, mostly all unhappy customers. This should not be combined to make a larger problem. What will happen when people start changing their minds and the merger becomes a bad option, will the government step in and provide "stimulus" money and tax us even more?

Sincerely,

Nancy Proctor

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is too large with too much control over our country's communications already, let alone allowing them to buy the second largest cable communications company - Time Warner Cable Inc. as well. Why allow a merger like this that will inevitably lead to a situation of over consumer control and lack of competition not unlike that of AT&T back in 1982. I'm very pro free market capitalism, but not to the point of giant corporate monopolies that end up controlling a particular market from top to bottom, crushing out all competition and choice within their market. Comcast has already been sued for manipulating band width content delivery against selected competitors, which should be enough cause for denial in allowing them even more span of market control. Companies like IBM and Microsoft were sued for gaining too much power and control over their markets, and were forced to back off. Even more related to this current merger attempt by Comcast, was the attempt of AT&T to buy T-Mobile and most recently, the attempt of Sprint to buy out T-Mobile - both of which were disallowed. Please do not allow the merger of Comcast with Time Warner Cable Inc. A merger of this magnitude is definitely not in the public interest. History has shown that if allowed, it will only set the stage for even less competition, which will result in less public freedom of choice in communications and information, and less innovation in market solutions.

Sincerely,

Ron Knight

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because then we will have a monopoly just like we have had before. Remember back in the 70's we tore apart AT & T because we claimed it was too big and an monopoly. I think this the same thing, besides I would like more choices Now all I have is Charter, Dish TV that will not work with all my trees, Direct TV with the same thing, and U verse by ATT. I want to be able to choose the channels that I put in my package not what the cable company decides I should have. This should not happen, if they can not make it alone then they need to get out of the business.

Thank you,

Nancy Mawhinney

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I feel big monopolies are generally the cause of more and more restrictions of my own personal choices because my choices end up either very limited or totally eliminated. I already feel I pay too much for my cable/internet service and by Comcast combining with Time Warner, I fully expect my rates to get even higher. I have to live now with the disappointment that Comcast does not carry certain networks that I would like to have available to me, the Blaze TV for instance.

I am afraid that as profits are the biggest concern of big corporations, my services and interests will not be of any priority. The bigger the corporations get the less my input matters. I am not against companies making honest profits and growing bigger. Eliminating competition by merging with them though is a very scary scenario.

Thank you for allowing me to express my opinion.

Sincerely,

Aggie Taylor

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The competition between companies is what keeps active commerce flowing in America. These companies are barely able to provide service in a timely manner individually and it is entirely too expensive as it is. Comcast already severely restricts viewing options but since it is the only game in town what choice is there? Now, with two huge corporations merging the choices become even more limited with fewer people deciding for me what is acceptable to watch in the privacy of my own home. This merger should not be allowed to take place!

Sincerely,

Danielle Vance

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast Corporation already has control over too large of a percentage of cable access in the United States. I terminated my service with Comcast 10 years ago due to extremely poor customer service, and constantly rising rates.

I believe in an open market place, but the FCC has regulated cable access, thereby creating artificial barriers to competition. The result is limited consumer choice and higher prices.

The merger of Comcast and Time Warner would not only limit consumer selection for cable TV services, but would also significantly reduce consumer selection for media content.

Such a merger would not be in the better interest of the public.

Sincerely,

Sam Chaney

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Competition is what best serves the public. We emphasized the need to break up Ma Bell many years ago and as a result, service is better and consumers can search for a bargain instead of taking whatever comes their way. Same with the cable companies. Keep them small, keep them competitive and let the consumer have a choice. We don't need to make any more companies so big that they are not "allowed to fail". That serves no one.

Sincerely,

Catherine Johanning

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It puts way too much control of content under one provider, leading to censorship. Right now, cable television is already too expensive and the promise of no commercials when it first began is long out the window, so we are having to pay for the privilege of being advertised at! It will only get worse if this merger is allowed to happen because competition, which drives prices down, will be non-existent in most of the areas of the new company.

Sincerely,

Joseph McLaughlin

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the bias of today's media does not provide the breadth of information I'm seeking. Without competing voices being given equal opportunity to be heard, only the "preferred" side is being allowed through to the public. We need more voices, not fewer. The merger of Comcast and Time Warner would simply put more control of the media outlets into the control of a single interest, rather than providing the breadth I spoke of.

Sincerely,

Dana Wilkins

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

...this will take away our choice, reduce quality, raise prices, and worse, oppose our CONSTITUTIONAL FREEDOM OF SPEECH and FREEDOM OF PRESS. The airwaves should be free for use by ALL, but the resulting size of this corporation would be a monopoly in many locations. A company of such size could be influenced by large financial interests, and could control programming, remove programming choice, and remove the profit incentives that come from giving people what they want!

These providers do not have a good track record with consumers. The quality of programming has consistently gone down as these providers as have grown bigger. They offer more and more channels, but of lesser quality. This seems designed to obtain the maximum amount of money from the consumer by creative "channel packaging", forcing a customer to buy a lot of junk to get one favorite channel. What ever happened to paid cable being commercial free? This advertising angle convinced many of us to purchase cable. Now, we don't have a choice, so the the commercials are back and with a vengeance. What will they do when there is even less competition? This merger is not beneficial in any way for consumers and should not be allowed.

Sincerely,

Theodore Czarnatowicz

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

For many years, we were Comcast subscribers and over the years they have become too big to maintain their customer base properly. When the connection would go out, it would take over 45 minutes and at least one phone call to tech support to get the service back up and running. Merge another cable company together and the customer and technical support services will suffer. History will repeat itself--look at the Bell/Verizon merger--I was a young man when that happened--now Verizon is too big to serve its customers properly. Another example, when Comcast bought out Adelphia Cable, there was a promise of better service and lower prices. Well we all know that did not happen. I strongly oppose the merger between Comcast and Time Warner this will not benefit the consumer at all. Personally I would do without TV and internet if it meant dealing with this conglomerate.

Respectfully submitted.

Sincerely,

Thomas Vieli

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

In February Comcast announced it was going to buy Time Warner Cable. That means of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills.

Please don't let this merger take place.

Sincerely,

Patricia Carlson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the more choice people have the more a business has to maintain a high standard of customer service. I have lived in many states and have experience with several different cable companies. Comcast stands out as the worst cable company I have ever dealt with in terms of customer service. At the time of hookup, the Comcast installer came in, looked around and left the property for over 1 1/2 hours. When I called Comcast they said he was downstairs working on tangled cables. The property was new. Cables were not tangled and I visibly saw the installer both leave the property and return almost 2 hours later. Customer service representative was discourteous, acting like I was the one lying.

I have also had Time-Warner and received reasonably good customer service (though not as good as U-verse). Comcast needs more, not less competition in order to reform and repair it's poor customer service and image. Please do not allow Comcast to merge with Time Warner.

Sincerely,

Judith Mills

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

To Whom It May Concern:

I urge you to deny the merger of Time-Warner and Comcast as this has the potential to impact the personal choices I enjoy through cable service I access as I travel around the country. I travel from Florida to South Carolina and Colorado to Texas. Each town I stop in for the night offers a variety of programming, but that is because there is healthy competition between cable companies - many of them. With the merger of Time Warner and Comcast, a major monopoly will be created, limiting my ability to access my favorite programs such as The Blaze. In fact, we were with Comcast, and when I realized they did not offer the Blaze, we switched to Dish network. Not only that, but Comcast has the worst rating for service and customer service in the industry. Why grant the merger that would not only limit choice in areas where this monopoly is the only option, but penalize the citizens with terrible service. Also, a monopoly like this could be abused by one political "voice" and 30% of the American population would not know the "rest of the story".

Please deny approval of this merger.

Sincerely,

Becki Carmichael

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The main reason is the prices. They will be higher and customer service is going to get worse,; if that is possible. The same thing is happening right now with the airlines since the government let US Air and American Airlines merge..When will the government start caring about the people. We can't go on in this spiral. Our bills, gasoline, groceries and utilities continue to climb and our paychecks stay the same. It WILL eventually catch up.

Sincerely,

Becki Barcus

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There is already a sufficient degree of monopoly at play(not intended as a pun) with the current status of lack of competition in the internet marketplace--we certainly do not need it to be even more restricted as a result of such a merger. I cannot even get The Blaze as part of my cable lineup at this time, which would reflect a more open perspective--I believe this perspective against conservative outlets will only get more restrictive. I am a firm believer in the 1st Amendment and the Constitution as a whole and it is being trampled on at every step and this move reflects more of the same and it reflects government influence where it should not be seen at all. Danger, Will Robinson!

Sincerely,

Debi Fuller

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have Comcast in our Florida home. It has been quite disappointing - we have Dish in Missouri and the number of channels they carry is amazing compared to what Comcast carries..

I feel it is your responsibility to see that the PEOPLE of nation have choices. Comcast is already not responsive to their customers...it will not get

better if they are allowed to merge with Time Warner!

Please, do not create this monopoly in the options the people have as to what cable companies they have to deal with!!!

If this merger goes through, it is unfortunate that the people of the USA will feel that you have been pressured by big business and big money

instead of the best interests of the people you are supposed to represent!

Sincerely,

Floyd Tempfel

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I read 1984 in high school and I'm 69 now. Controlling the media and words and communications limits freedom, even if we don't know it. It's a good way to manipulate the necessary idiots, per Stalan.

I oppose the Comcast purchase of Time Warner Cable. It would mean that two of the biggest cable monopolies, with the worst customer service records, will merge and dictate what 30% of Americas can see on cable TV. This could means less choice, less competition and higher cable bills, BUT it could also mean less perspective and more bias in what American's see. This would bias what we think becasure of what we don't know, and we all become Pavlov's Dogs, just responding the way we have been conditioned to respond.

Please do not approve the purchase.

Sincerely,

Rich Frederick

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There has been great discussion over the Comcast, Time Warner merger lately and I believe that a vigorous, honest debate is warranted when a post merger company like Comcast will own more than 50% of the cable delivery systems in America. Such a Quasi-Monopoly will not only leverage great power over its subscribers, but over content providers (that are not owned by it).

If you look at how Comcast currently treats its customers, you will find a good indication on how it will treat Time Warner's customers. Consumerist named Comcast the worst company in America. How did a company as large as Comcast earn such recognition? Is it the outdated services it offers its customers for a premium price? Is it the fact Comcast makes the disconnection of service extremely difficult for customers? If you look at other operators, Comcast is behind the times when it comes to technology. Would this merger be in the interest of consumers? I don't think so. If anything, it would lead to higher priced services, less innovation and upgraded services and less choice for the consumers like me.

Content providers will also suffer from this merger. Currently Comcast owns and controls networks like Telemundo, NBC Television Network, NBC entertainment, NBC News (including MSNBC), NBC Sports Group, Universal Television, Universal Cable Productions, NBC Universal Domestic Television Distribution and NBC Universal International Television Distribution. Some of the cable channels

Comcast owns include: Bravo, Chiller, CNBC, CNBC World, E! Entertainment Television, G4, Golf Channel, MSNBC, mun2, Oxygen Media, Cloo, Sprout, The Style Network, Syfy, Universal HD, USA Network, The Weather Channel Companies. Time Warner currently owns and controls cable channels like: HBO, Cinemax, truTV, TBS, TNT, TCM, WPCH, NASCAR Racing, Turner Sports, Cartoon Network, Adult Swin, Boomerang, CNN U.S., HLN, and various others. The merged company would control virtually 90% of the channels broadcast from all cable operators into US households. By owning the content providers, the merged company could, in effect, dictate themes for shows, movies and news stories reported or what stories are not reported on. Also, the merged company would allow Comcast to charge higher fees to independent operators to carry these channels, resulting in higher rates to consumers. This also puts Comcast in a position to acquire those cable companies at a later date.

It seems that the FCC should do what is in the consumer's best interest. This merger, based on Comcast's past practices, is not in America's best interest. As a governing agency, the FCC should also revisit ownership rules that prevent television stations and cable operators from owning the News Organizations or Content Providers (movies, television, etc) it broadcasts. This would allow for real competition in Cable Operators and level the playing field, and prevent Quasi-Monopoly's from being formed.

While I could go on to describe how other cable operators are offering 100MB speeds for their base broadband service and Comcast's top speed of only 50MB, I think you already have enough reasons to block this merger.

Please block this merger between Comcast and Time Warner. It is not in the best interest of Consumers and will lead to a Quasi-Monopoly over content provided to all cable operators in the U.S. Also, rules governing cable operators owning content providers need to be changed so cable operators are not incentivized to only carry stations it owns. This will level the playing field for other content providers to be able to broadcast on various cable operator networks.

Thank you for your consideration.

Sincerely,

Myra Weigand

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The merger of Time Warner and Comcast, two extremely large corporations, will further allow them to limit the television shows to fit their personal agendas. Time Warner has not listened to the thousands of viewers who do not want to watch their politically motivated selections such as Al Jazeera. The larger the corporation, which in this case would be an extremely large monopoly, the less responsive they become to the consumers.

Sincerely,

Tom Martin

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Based on my experiences when I was a Comcast cable customer about the year 2001, I know they don't care about individual subscribers.

While I was a customer of Comcast, I had invited friends and family over to view a broadcast event one weekend. The day of the event arrived and I turned on the TV and had no cable service. I called Comcast and they informed me that there was an upgrade being performed on their systems and users may be impacted the entire weekend. This was a scheduled upgrade and they didn't notify customers. I asked why I wasn't notified, there was no real answer. Simply put they wanted me to wait it out. The Comcast agent never expressed concern or sorrow about the inconvenience for the issues. When he was not empathic about my issue, I expressed concerns about being a customer if this is how I was treated. I stated this treatment would drive me to another provider. To that the agent said to go ahead and leave. I clarified as I was taken back and he could have not cared less if I was a customer and he invited me to cancel my service. As a result, I did cancel my service and went with another provider.

Since that time I have sworn to never be a Comcast customer again. I would not wish their service or support on anyone.

With Comcast acquiring a larger share of the industry and customer base if this merger goes through, I believe this will lead to great abuse of the customer, less choice for the customer and reduced voices in available programming.

I would strongly urge the FCC to deny this merger, as it will hurt the consumer and limit the customer choice. We need the freedom to choose not be locked into a terrible provider and service experience.

Sincerely,

Bryan Ricks

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I use to have Comcast and left them because of the worst customer service I ever had with any company. It seemed to me the it got worse as it grow. This merger will put their customers in a bigger disadvantage by limiting competition.

Sincerely,

James Cavalcante

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The merger will create a near monopoly on cable and block competition from other cable networks. In addition, many cable subscribers will be deprived of the diversity of programming and service that they deserve.

Sincerely,

Sandra Aman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the bigger the companies / conglomerates get, the less personal they are. If you try to contact a real person, you are on hold or put through a difficult hurdle of telephone prompts in order to get to the department that you needed to make contact with. Many times, the call centers are located in foreign countries and you can barely understand their English or else you have to ask them to repeat the information more than once. Please do not allow this merger to take place.

Sincerely,

Leta Smith

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Do not allow the merger of Time Warner and Comcast, creating an even larger monopoly together, than each of them already controls.

Do not allow them to dictate, even more than they do now, what Americans can see on cable TV, resulting in less choice and less competition.

We already pay exorbitant cable TV prices and this would certainly insure even higher cable bills.

Please act in the best interest of the American public by promoting more choice, more competition and lower prices!

Act in the public interest by denying this request!

Sincerely,

Vicki Dunham

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We have too many greedy bastards in the TV industry already. Two of them are DirecTV and Dish, a de facto monopoly with two heads that forces us folks to buy hordes of channels we don't want in order to get a few we want. They all should be forced to sell an affordable a la carte 20 channel offering for \$20 a month, and they should be forced to freeze their rates for 5 years at the option of the user, with a 5-year contract.

Sincerely,

Dan Metcalf

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The largest lobbying group ever was assembled to help push this deal through. A Vice-President of Comcast has held fundraisers and golfs regularly with Mr. Obama. There is no hope for the "little guy" in this country anymore and this proposal is direct proof of that. The Number one provider wants to merge with the number two provider...did the definition of monopoly suddenly fall out of the dictionary? This is bad comedy... Please stop trying to put the American people into a box by putting less than 50 people in charge of what news, opinions and programming is put into 30% of American households. Frankly, if I were not staying at a place that provided cable for free I would not have been able to give you a name for who my cable provider was because I haven't had TV service in my house since 2008. There is no point to it as I can find much of what I want on the Internet. More and more people are turning to that option...and more will if you continue to squeeze out our choices. There is VERY LITTLE on TV that I want to watch. I do not see this improving if fewer and fewer people control what is allowed on their cable systems. I'm tired of programming being abundantly "junk-food, empty calorie" programming. I believe in more voices not fewer. This merger is not going to accomplish that, in fact you get to the point that you fear agendas being thrown at you when the executives are so cozy with our President and other politicians. Both sides are guilty of it. When decisions like this are being made, politics needs to stop at the water's edge. You are there to regulate what is in the peoples

interest. This is so far from it that I don't know where to begin. Listen to the voices of those who are filling out this form. Do not allow this merger to happen.

Sincerely,

Allison Littleton

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast/Time Warner Cable will bring the price of cable to an unaffordable cost to my family who would be denied competitive options. Many of my family members get their shows from computers because of the low cost. Comcast does not allow my favorite shows on The Blaze TV to be on their systems and I find that prejudicial. Can you imagine worse customer service than there is now about Comcast and TWC on Facebook and Twitter?? I can: Complaints about over-charging, refusing to disconnect or waiting for customer service on the phone for hours and never getting a live person and getting the wrong connection from phone options.....

Sincerely,

Klair Bybee

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Dear Sir:

The Comcast / Time Warner Cable merger is Not in the public interest because it will lessen serious competition.

Competition is what has made this Country as great as it is and competition is also what allows the consumer

to have a great deal of choice which benefits greatly the consumer.

Competition will also force companies to carefully watch their company so as to provide the many choices

that the consumer wants and to keep cable bills competitive and to keep bills from escalating higher.

Thank you for the opportunity to let us express our opinion that cable needs as much competition as possible.

Sincerely,

Gerry Cooper

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We do not believe the Comcast/Time Warner Cable merger is in the public interest because as conservatives who currently has Time Warner, we are limited in our choices to view intelligent and current programming that reflects our values and standards. Our requests to Time Warner to carry the Blaze as a balance to Al Jazeera was met with mockery. The status quo still exists two years later. There are alternative and more high tech competitors promising to be available in our area and we intend to look into them. Regardless, in this proposed merger bigness definitely does not mean greatness. Whenever competition is stifled or limited the potential for abuse rises disproportionately. Please deny this merger as we do believe it will be more harmful to the public interest than helpful.

Sincerely,

Sally Fedorchak

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast does not listen to its customer already to make it bigger would not be good. Tie Warner is so far left it would not make for balance TV viewing. I have already stopped watching so many shows because of language and sexual content. This would make the situation worse. Please do not allow this to go through.

Jeanette Wells

Sincerely,

Jeanette wells

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As a Comcast Cable customer I can tell you that they are already too big!! Their customer service is weak, at best. Internet connection is so unreliable that we have a back-up. This merger would mean worse service than we have now, plus higher costs, fewer choices, and a decline in customer response as well.

Please do NOT approve the merger.

Thank you.

Sincerely,

Virginia Manzari

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

combining two companies with poor customer service and poor service records will not produce a company that provides good service or customer service. It just makes a strong bad company. Currently big business is cast in a bad light most of the time, this merger would give credibility to that ideal. Bigger is not always better. In this case it limits choice for millions and puts control of what they can or cannot view in the hands of a few. Competition keeps the market fair and encourages innovation.

Sincerely,

Carrie Steese

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There is no reason to believe that bigger is better in this case. It is already too hard to get what you want on cable without paying a large amount of money and still just getting a few channels that you want to watch, and a lot of channels that you don't. I would like to watch more channels, but cannot afford them. If it were possible to only pay for the channels you wanted instead of all of the unnecessary ones, it would be a lot better. These two corporations merging together will not provide better content, more choice, or lower costs for the consumer, in my opinion.

Sincerely,

Linda Soesbee

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Both of these cable companies are already suppressing select programming for reasons that are obviously political. Comcast already has poor service and rising user bill costs. This merge I believe will only make it much worse for the paying customers in having a voice in programming or getting decent customer service and pricing.

Sincerely,

Terry Earl

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

To even consider allowing this merger to become complete is incomprehensible. Comcast and Time Warner both have atrocious customer service records. To allow them to become even larger just eliminates more of the choice that individuals have for a provider. Individual customers are limited by their location as to which provider they can use. The cable companies know this, and charge excessive fees because a significant amount of the time, they are the only provider in some areas. Allowing for a larger cable company will only increase the monopolies and minimize customer choice.

Please vote against the merger of Comcast and Time Warner.

Sincerely,

Cynthia Hicks

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

monopolies like these two businesses are government sanctioned ( i.e. controlled) and therefore are in the 'business' of suppressing and silencing ---if they are able --independent competition voices. The American population, I fear, is already very very LOW information because of the preponderance of government owned/sanctioned media outlets of all types. This merger would be a catastrophic blow to the public's freedom AND I AM ONE OF THOSE PEOPLE to choose and be able to hear AND LEARN from independent voices. These independent voices provide me with information which the public is entitled and clearly must be allowed to HEAR.

I wholeheartedly implore you NOT TO ALLOW THIS MERGER. The American public DESERVES and MUST know the truth about so many things of which they are ignorant because of government intrusion into our media sources.

Thank you.

A Concerned Patriot and Citizen of the Constitutional Republic,

Rosanne Reddin

Sincerely,

Rosanne Reddin

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I already have a monthly fee for cable and internet that is astronomical and horrible customer service. If the merger takes place I will now be stuck with a mega provider which I am sure will not lower my monthly costs but will increase them and my customer service will not improve and will probably get worse.

We need true competition in business of all natures. We need the checks and balances that come with companies truly competing for business and everyone becomes a winner-except of course the worst providers which then gleans out the low hanging fruit. Especially this type of service that dictates what will air on television and what I can access on my computer. I want a company that will be open to wanting to provided and EXCELL IN CUSTOMER SERVICE!!

WHAT A NOVEL IDEA--PROVIDE A SERVICE-EXCELL IN THE EXECUTION OF THAT SERVICE- PLEASE THE CUSTOMERS-GAIN MORE CUSTOMERS AND YOUR BUSINESS IS A SUCCESS. That is what true American business is about. THE MOST SUCCESSFUL COMPANIES ARE THE ONES THAT DONT JUST DO THEIR JOBS BUT WHO GO ABOVE AND BEYOND--THE EXCEED THE EXPECTATIONS OF THEIR CUSTOMERS.

FCC--please consider that creating this catastrophic monopoly will only hurt the consumer and will not serve the public as it should. This will only hurt us in having the types of choices that we want and

deserve. These companies do not meet and certainly do not exceed the expectation of their customers now - putting them together will just make a bigger company doing and even worse job.

Please do your part in stopping this train wreck. You have the power but the people paying for these services deserve to have the power to choose.

Thank you in advance for your careful consideration

Karen S. Nedrow

Sincerely,

Karen Nedrow

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Having a monopoly on the cable television industry is just bad business. I have no other choice in my cable television options because I'm sure that Time Warner has blocked any and all attempts of smaller companies from coming into my city and county. Any merger of two large companies such as these can only make matters worse because there is no longer any competition... No competitors means that that this company can drive up costs while still providing mediocre and or satisfactory service.

Sincerely,

Ted Kalnas

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Even though you may not believe it, not everyone is a liberal. There are a lot of us who still believe in conservative values. If you carry an Islamic channel you should be willing to accommodate the other side. After all, we pay the same amount. I know that your agenda is more in line with the left. Believe me if I had any choice I would not be dealing with you. Change my mind by showing you have as much regard for those of us who don't agree with your political stance.

Sincerely,

Rosemarie Carlson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

If this merger goes through, there would be LESS choice instead of MORE. There is no reason that one cable company should have control over what a majority of people can watch on TV especially when they don't carry networks that people want, but will carry networks that no one watches.

Sincerely,

Diane Oster

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Time Warner already has a monopoly and keeps raising its pricing regularly. With the merger, we will get less service and higher prices. There will no longer be any competition to keep the prices down and the service high. We are already paying almost \$200/month for service as it is!

Sincerely,

Karen Little

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I was just about to change my provider to Time Warner, but because of this proposed merger, am not willing to do so until I see what is going to happen. It is in the interest of all Americans that we have good competition between providers of all sectors, most importantly in the media sector of our country. Allowing mergers to happen which give few competitors has not been a good idea in either the financial industry or the motor industry, as we the public end up bailing out large providers who for whatever reason cannot make it on their own, and need "help from the public treasury." Competition naturally weeds out those who cannot make it, and that is the way it should be. Please do NOT let this merger happen. Thank you.

Sincerely,

Joann Papageorgiou

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I do not believe the merger of Comcast and Time Warner is in the best interest of the public because both companies are already too large and do not listen or respond to their customers' request. To merge these two companies will give way to much power and control, and limit the options available to the consumer. Diversity and competition should be what is in the best interest of the public.

Sincerely,

Peggy Smith

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There should not be such broad control of what people watch from one big united company. Whatever happened to the antitrust act? Diversity is what is necessary, and watching reruns from as far back as 2002 programs on so many channels is pathetic. The service needs to be aimed at pleasing the people who subscribe, and to have one huge cable network doesn't seem to be in the best interest of the viewers. How can one company take care of all the subscribers and have THEM be satisfied, and not have constantly increasing subscription rates with so little to offer?.

Sincerely,

Pat Beck

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't feel that the Comcast/Time Warner merger is in public interest due the fact that will have move control of what I watch, and that they will start raising rate with crappy performance. Watching how they already act with customer service on YouTube already shows that they don't care about people only their bottom line. They should be made to either fold, or give better service, because capitalism does work. We the People are sick of companies growing through mergers, instead of growing due to awesome service. So I saying to whom it concerns stop this Crony Capitalism, and start serving the people who really pay your salaries. Or is there some backdoor dealings that are lining peoples pockets going to push this through?

Sincerely Franklin M Saxton,

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There is already too uncompetitive.. I live in a community where there is only ONE supplier of cable ( MetroCast). It has the same power that was stripped of the utility providers of telephone service and power. That is why I have satellite.

"The Commission enforces regulations that were designed to ensure competition among cable companies, satellite companies and other entities that offer video programming services to the general public. This includes issues such as, mandatory carriage of television broadcast signals, commercial leased access, program access, over-the-air reception devices, open video systems, commercial availability of set-top boxes and the accessibility of closed captioning and video description on television programming."

FCC publication

Your job is not to stifle competition but enhance it! The best way to promote competition is diversity in selecting providers of entertainment and more importantly information.

Sincerely,

William Trotter

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have many friends with Time Warner and they have had nothing but problems. Some of my family in other states have Comcast and THEY TOO have nothing but problems, and to make matters worse, they all get treated poorly by Time Warner and Comcast's customer service people. I am so grateful to have Direct TV and hope that their great customer service will continue even if they are merged with AT&T; at least I know AT&T have also been really great....but I have concerns that if the competition gets less, the service and prices will not be a motivating factor for any of these companies to keep customers. Competition is one of the things that keeps the USA strong and free - please don't turn us into a socialist country with fewer and fewer choices.

Sincerely,

Patty Jenkins

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it creates a monopoly. I believe the broadcasting will direct it's attention in one direction - even if the people do not want this. Please do not allow these companies to merge together. People deserve better.

Sincerely,

Denise O

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Competition encourages lower prices and new jobs. If this merger takes place some people will lose their jobs and others will not be able to afford to watch television or choose what news channels to watch. I was under the impression that the government was supposed to break up conglomerates not build them! If you approve this merger, you will prove to the citizens that you really don't want to build jobs and don't care about their financial futures!

Sincerely,

M J Heise

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Why would you allow a company that much power and control of its customers contents and price? I was a Comcast customer until I finally was tired of the run around and price increases. They don't listen to their customers now. What do you think they do when they get that much more control?

This is a bad idea for the consumer who will not have a say in lineup or pricing.

You are suppose to be looking out for the good of the nation not budding up to media giants.

Sincerely,

Richard Wesson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

this merger would in no way benefit the consumer. As competition dwindles, prices go sky high. Choice is diminished; these cable companies completely control who can and cannot be seen on television. It is currently impossible to get just the channels I want. It's here's your channel package, here's your price. How will this get any better if these two mega companies merge? What is to stop them from cutting a channel because the opinions expressed don't align with their agenda? I can see no way that this merger is in the public interest unless less choice, higher prices and more power to decide what we can and cannot see have suddenly become desirable for a free people.

Sincerely,

Elizabeth Dugan

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is big enough and can't handle what they have in a reasonable time manner.....even their employees don't want this merger...Why would you create such a huge monopoly in America...ATT is worse and direct tv and others don't give you much choice...but please don't make Comcast have control over the market for tv...they just keep raising their rates till you can't afford it hardly since we are on fixed income..We are senior citizens and have XFINITY and its up to \$168. a month ...Was \$99. 3 years ago we moved into our patio home and took TV, computer, and phone package and its been going up every year...if you have problems service is terrible...but there is no choice now here in Indy...

thank you so much...

Sincerely,

judy hoffman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

My wife & I turned off our cable because the service was terrible, our costs went up ever year, our choice were limited every year because the cable company had no competition. It was there way or no way. We chose no way. With Comcast & TimeWarner merging there will be no competition. A small group of people will to determine what they want to offer and the customer will be stuck with a take it or leave it. If the company doesn't like a show or news station they can block it totally. Nothing new will ever make it especially if the show doesn't fit the company's agenda. It will be 1984 in 2015.

Sincerely,

Howard Carter

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I do not want government involved in the way of what I want to watch. My cable company has not added the UP network, the Blaze network or the Hallmark channel. I feel they have not added these channels because they are more conservative and have Christian principles. I believe this merger will limit what I can watch and promote the agenda of the government of progressive and liberal ideology. I want a cable company to offer what customers want to watch. I don't want to pay "extra" money to get those specific channels either. I believe this merger will obstruct freedom of speech.

Sincerely,

Christine Treat

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Today more and more of the cable lineup is nothing but CRAP. There is VERY little morality and good decent shows on anymore. I want to bring wholesome shows and shows that teach our kids and young people morality. I've had enough with the dumbing down of our society and especially our men of the homes. Our society has reached it's tipping point of dumbing down our men in our homes and the destruction of our families. This in turn has lead to the destruction of our society and the destruction of America as we once knew it. Comcast and Time Warner care nothing about the preservation of our society and of the most sacred of all things, the family unit. Morality starts at home with a father AND a mother teaching their kids morality, values, right and wrong, respect, love and belief in one GOD and instilling the Fear of the Lord. This merger MUST not happen in order to preserve the rapidly decaying society we now live in!

Sincerely,

Jeremy Moritz

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Please do not allow the merger of Time Warner and Comcast. This will provide close to a monopoly. Our rates will increase and there will be less competition in the market. Do not approve this.

Sincerely,

Michael Flynn

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the merging of these two communication companies will create a huge monopoly. As a long time COMCAST customer I can tell you they have poor customer service, they are already a monopoly in many areas, they do not value their existing customers or make it easy to remain their customer.

Less competition will mean higher rates and less variety of services.

PLEASE DO NOT CREATE A MONOPOLY BY ALLOWING THIS MERGER TO GO FORWARD. THIS MERGER IS NOT IN THE BEST INTEREST OF THE PUBLIC.

Sincerely,

Eddie Hoyal

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Although Comcast has been a good television and high-speed Internet provider in our area, I am concerned by Comcast's seemingly restrictive and possibly politically-driven channel allocation. As the owner of Left-leaning MSNBC, Comcast seems to restrict channel offerings for conservative voices. These restrictions may be due to business conflicts of interests to protect existing businesses such as MSNBC or they may be due to partisan differences.

While Comcast provides channel access to state-run media providers such as BBC (Great Britain), Russia Today or RT (Russia), and Al-Jazeera English (Qatar) in the name of "diversity," Comcast seemingly blocks channel access for distinctly American voices who may not coincide with Comcast's particular political views.

Is Comcast partisan? In the 2012 Presidential election, Comcast employees were the nation's 18th largest contributor to President Obama's re-election campaign.

<https://www.opensecrets.org/pres12/contrib.php?id=N00009638>

Do Comcast employees have a right to contribute to whomever they choose? Yes. However, We The People likewise should not trust the public airwaves to a group with a perceived political bias, especially one that controls the access to cable channels and to news and information sources.

Similarly, like others, I am also troubled by the apparent "revolving door" between the Federal Communications Commission (FCC) and Comcast.

<http://www.opensecrets.org/news/2014/04/the-comcast-fcc-revolving-door/>

Sincerely,

Steven Knapp

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast has provided the worst customer service and the worst cable service. Their phone service is abysmal as well. I haven't dealt with Time Warner but my friends that do have it say it is wretched. I don't want a a merger that makes something bad, worse. I reject the idea of the merger and ask you to do the same! We don't need them to merge, we need them to bow to the free market competition and become viable in the market place. More choice makes the provider have to work harder for the business. I don't want a merger that elevates them of the responsibility to work for their customers to keep their business.

Thank you for listening,

John

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This puts too much power into a single company. Each of these companies presently provide the poorest service I have ever experienced.. I subscribed to Comcast for 10 year while hiving in North east Maryland. I used Time Warner (now "Bright House" when I first moved to Florida for TV and internet. TV service was so bad that I joined Directv when we moved into our new home. I don't wish either of these service providers on anyone.

Comcast now owns the NBC network. Joining with Time Warner will reduce the competitive forces that usually keeps service and rates honest.

This merger is not in the best interest of the American People and should not be allowed to happen.

Paul Couture

Sincerely,

Paul Couture

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The consolidation of these two companies will harm consumers through 1) reduction of provider choice, 2) elimination of market competition between these cable giants, and 3) reduction of consumer leverage to negotiate. Also, this will further consolidate programming control of vast swaths of the telecom into the hands of fewer and fewer individuals and editors. Please oppose and deny this merger.

Sincerely,

William Rayburn

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe in competition which results in cheaper cost and better service. Just like the breakup GTE or mama bell brought in fierce competition and lower rates and better service. I also, believe in free TV or capturing air waves from the air that are bombarding my antenna. I predict that Comcast/Time Warner Cable Inc. merger would result in a another GTE and force smaller companies out of the market and the end of free TV..

Sincerely,

Thomas Betzold

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There are 10's of thousands of people that depend on antenna TV for news, sports, important emergency INFO when necessary, and entertainment.

There is no reason the people of the country should have to pay for this service. All cable, satellite, and broadcast TV receive large amounts of money form sponsors to run commercials to pay all their bills, and those sponsors get billions of dollars from the public by buying their products. There those of us on fixed incomes that just can't afford an other bill. TV has been free since its inception, there no need to stop that now. I'm sure the major networks and not going broke, nor the cable or satellite companies. The communications companies are already over charging the general public for cell service.

It need to stop!!

Sincerely,

GLENN C SIMPSON

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it will create a monopolistic company that will control viewing content for a huge percentage of Americans. I believe that serving the public interest is best accomplished by encouraging competition and choice in the marketplace. This merger would appear to take the form of government-sanctioned monopoly.

Thank you in advance for doing the right thing for the public interest and not approving this merger.

Charles C. Kelley III

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I left TWC due to the worst customer service I have ever received from any company and because they had the attitude that because they were the ONLY cable network we could get in our area, they could treat us any way they wanted and us customers just had to put up with it. My understanding from people that have had Comcast is they have had the same treatment. Now you want to give them more power, less competition and more area. That means they will become far worse to deal with.

By combining companies, you are creating a monopoly that to my understanding is against federal rules...the reason the "Bell companies" were destroyed several years ago. Stop the insanity. Get the heck out of private business and they will sink or swim on their own. FCC is just another stupid government agency totally unneeded and unwanted by the American public and eating up our tax money while accomplishing nothing.

Thank you.

Sincerely,

Jeanne Horn

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It creates a monopoly and now there's no competition to force the prices to be competitive and beneficial to the consumer.

Sincerely,

David Lopez

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it will produce a huge monopoly which will restrict consumer choice. Customers deserve choice and competitiveness in a free market, and the cable market has for far too long had too few choices to offer consumers.

Time Warner makes Comcast better by providing competition, and Comcast does the same for Time Warner. They should not merge.

Sincerely,

John Daley

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is not in the public's best interest to have these two companies merge. It is too much of a monopoly and they already have too much of a say on what people hear as news. No one should be able to control what we as citizens hear, say and see. I believe that these companies are already the worst in customer service and my husband and I would hate it if these cable companies were our only choice for TV as it is for many people who are not able to make their choice for satellite.

Sincerely,

Beverly Hartman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There are already too few choices and too few providers of information and entertainment in America. I would like to use cable TV and cable internet but the lack of competition and the lack of choices makes it unattractive. We need more choices so that new companies can come in and provide different services and different business models. It is obvious that the quality of the content is affected by the lack of competition. The companies in question already have a "Ma Bell" attitude toward their customers, offering what is convenient to them, not what the customers want. Allowing yet another merger is contrary to the best interests of the American people.

Sincerely,

Ron Stephen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This potential merger has a high probability of creating a monopoly control of media coverage. First, such a monopoly does not serve the American people in a productive way - certainly there is an increased perception that "biased spinning" news coverage is eroding and jeopardizing the journalistic industry as it is. Second, both companies, currently, produce the worst customer service ratings on record and it is not realistic to presume this will improve due to a merger. And thirdly, providing another outlet for anti-American channels like Al Jazeera in the US is not a positive strategy toward international relations - rather, it is perceived as manipulative.

Sincerely,

Jared Wright

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

First, our freedoms are most important to us and to have this merger of Comcast/Time Warner Cable would cause to much of a monopoly thus causing to much power of what this new giant company would control resulting in limited choices for the public's interests to be met. We have desired a simple little thing like "The Blaze" to be broadcast on comcast and so far we do not see it in the line up and we pay for so many channels we never watch and don't even like some of the more tollerable channels which carries poor programming. A balance must be created. We broke up Alexander G. Bell's phone monopoly..., please do not allow this dreadful event to occur, the Comcast/Time Warner Cable merger. And comcast please remove those smut channels for some educational ones or history, or fun ways to learn..., like "The Blaze". Or be more creative in your billing and offer packages that one could 'Build a Package' with 'x' amount of stations for "\$X" amount, etc.

Thank you for your considerations and please be just and fair.

Sincerely,

Wendy Lutz

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Please consider carefully the concerns of the consumer with this Comcast/Time Warner Cable merger. There is already a lack of competition in this industry. As I understand with this merger, Comcast would control more than half of American cable subscribers. This would almost be a monopoly and could lead to higher prices for the consumer. Our homeowners association provides basic Comcast service and we subscribe to DirecTV for our extended cable service. We previously had Comcast. Comcast customer service is VERY difficult to deal with. If they have anything close to a monopoly it will be even worse. This merger sounds like a poor choice for consumers. Please decline it. Thanks for your consideration.  
Vonda Willer, Florida.

Sincerely,

Vonda Willer

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

My cable TV provider used to be Comcast. After enduring nothing but failed equipment and ignoring my pleas for the telephone service connection to allow me the ability to dial 911, my life was put in danger. I am asthmatic and use a nebulizer due to toxic mold and must have a means of dialing 911. Comcast roped me in with their triple play package and refused any help for over a year while the power cable kept going out. I am a human being not someone to be controlled. This merger is nothing more than a power grab and will cause other providers the inability to remain financially solvent.

Sincerely,

Kelly Lee

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

a reduction of competition means less choice of channels and higher rates. Even though I have ATT this merger will be a game changer (for the worse) for all internet/tv users as the 2 largest providers become one. If cable providers were free enterprise and not government sanctioned it would be a different story all together. Less choice, less competition and higher cable bills are not in the publics best interest.

Sincerely,

Margaret Brian

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

When companies get too big the interest of the customer is no longer important. We need competition in the marketplace to allow the customer to get the best deal. We also need to look at not having to sign up for 250 channels just to get the 3 or 4 channels we really need. I have had over 250 channels for years and I only really like watching 10 at the most. The 2 year contract also needs to go. We should have the ability and the right to change companies as we deem best for us. Thank you for your time.

Sincerely,

Thomas Beach

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This means two of the biggest cable monopolies with the worst customer service records will merge and dictate what 20% of America can see on cable TV. This means less choice, less competition and higher cable bills. I ask that you respect my opinion and vote against the proposed merger.

Sincerely,

CARL OFFEN

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't like Big Company Monopolies, because small businesses don't stand a chance to survive because of the competition.

We despise Comcast!! They are aggressive and had terrible experience with them and the cable bills are too high!

I prefer to give my money to small businesses. I will search, even commute to spend my money on small businesses!

The Dish is affordable, more choices of what we want to see, and have wonderful customer service!

Sincerely,

yosh urango

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

You need more companies to keep the cost down and the quality to improve. And most important to have better coverage of the News and World

Happening's..We should not let Comcast purchase Time Warner... As this would give one New Caster to much CONTROL OF WHAT YOU WOULD

HEAR ON THE NEWS... WE NEED MORE COVERAGE THAT IS BETTER AND NOT IN FAVOR OF ANYONE IN PARTICULAR..THE NEWS SHOULD BE

TRUTHFUL AND NOT POLITICALLY MOTIVATED OR CONTROLLED IN ANY FASHION, LET THE TRUTH FALL WERE IT SHOULD.. NOW MAKING UP

FALSE NEWS SHOULD PUT YOU OUT OF THE MARKET.... WISH FULL THINKING

Sincerely,

Bill Sandelin

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

just as with the ATT - TMobile merger, this Comcast deal has the potential to limit competition and almost guarantee higher rates for most subscribers. There is no positive effect for the public good that will come from this merger. It is just an inside deal that will put a full 30% of the programming that cable subscribers watch under the thumb of a politically influential entity. I speak also of the great influence that Comcast has with the FCC, and that is a dangerous confluence of interests. When such a large company has control over what consumers can watch, it changes the whole dynamic of what makes this country work. It stifles competition even within the very narrow confines of regulation that is necessary in the industry.

This merger must be stopped!

Sincerely,

Allen Seaman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I think it is better to have two awful cable companies to choose from rather than one awful company. Comcast is more worse than Time Warner/Bright House and therefore could make the combined company even worse. BAD Bad bad. Could one imagine combining the House of Representatives with the US Senate? Of course this action is against the Constitution, but boy oh boy would the US population be in for a hosing with only one cable company! But then I have only one cable company to chose from now, so who knows. Please, Think this merger through again please.

Sincerely,

Bob Bleakley

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I am an sales agent for both companies. This is not anyone's interest with the exception of Comcast.

- 1) Both company's have weak customer service. However Comcast's is worse than Time Warner.
- 2)Internet speed claims are exaggerated and they have a policy of throttling back consumers are heavy users of bandwidth.
- 3)Their pricing is predatory yet they cannot deliver nor do they plan on delivering the service at the levels advertised.
- 4)Comcast already has an unfair advantage on controlling programing content nationwide.

Sincerely,

Dean Smith

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

time warner is already to large, i think there no reason for the merger, this would put to much control of what networks and what channels we have view.

Sincerely,

robert blair

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger is not in the public interest. It would mean less choice for the two largest cable companies to merge. We need more competition and not less in order for the public interest to be protected. This monopoly would make these companies even less responsive to public preferences. The public would be served what the companies want to serve and be less inclined to listen to public. Most likely prices would be increased and customer satisfaction decreased.

Thank You,

Linda Rose

Sincerely,

Linda Rose

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is not beneficial to competition, for starters. Comcast also has a terrible reputation for customer service as well as technical service. It would be in the FCC's interest to think about the public before they consider the corporation.

Sincerely,

Eileen Gustafson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There are way too many Monopolies today I believe that if Time Warner wants to sell they should sell to 10 different companies. We need more competitive prices, more and better choices. I also Comcast should be forced to split into 10 units and sold off.

Important

BW

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

TV has always been free and should continue to be so. For countless many TV provides free information, education, entertainment, and most importantly a universal means of warning of emergencies. Allowing any person or corporation to control TV is not in the best interest of Americans, it only serves those who stand to profit from this change to a monopoly. If this change is approved American's will be penalized financially and will create further division in the separation of society. Fairness and equality is not allowed to exist and grow if this major, negative change is approved.

Sincerely,

Jody Larson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

as it stands right now in my community we have only one cable provider. The prices keep going up and the quality of service has not improved in proportion to the increases and customer service is at best painful; especially since most of the time you have to talk to a person with a thick foreign accent, who speaks broken English, and cannot understand clearly what you are trying to communicate and likewise you cannot understand what they are trying to communicate. We need more competition in the cable market not less. I believe the more competition the better the service will be and the less it will cost the consumer. As of right now my family is at the tipping point of not being able to afford what the market is demanding and at some point many more like me will say enough and cut them loose. Then what will the big monopolies do?

Sincerely,

Anthony Briggs

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It would make such a large monopoly in the media business that the customer support and care would be

almost non-existent. As it now, Comcast has terrible customer support, and doesn't listen to many thousands

of requests to carry a conservative network. It instead carries networks that hardly anyone tunes into or cares about. Please do not allow this merger to take place!

Sincerely,

Carole Cutler

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Government intervention never works. When government gets involved it only benefits the government.. The people will decide what is available to watch not the government. Cable bills are outrageous already without trying to monopolize the industry.. The public interest means serving the people with lower cable bills and more competition. The merger will do just the opposite and we not not stand for it. SAY NO TO THE MERGER!!!!!!

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This the very reason I left Time Warner Cable, not only that but their cable prices are going to go thru the roof! The customer service is deplorable and the right hand doesn't know what the left is doing. This merger is not a good thing for consumers, you will not have programing the way that you want. As Americans, we

believe in Freedom Of Speech. That no one should control what people hear, say or see.

Serving the public interest means more choice, more competition and lower cable bills. So this merger is not in the best public interest and should not be allowed.

Sincerely,

Karen D Roth

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As Americans, we believe in freedom of speech. That no one should control what people hear, say or see. Those are our values.

In February Comcast announced it was going to buy Time Warner Cable. Think about that for a minute: Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills.

I believe that businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent, competitive voices like TheBlaze if it furthers their business interests.

Sincerely,

Donald Vande Yacht

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It just creates a bigger company which comes closer to becoming a monopoly. We need more choices, not less, so that our costs don't skyrocket. Don't allow Comcast to buy it's way into creating a monopoly.

Sincerely,

Karen Bach

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It will hinder the United States Citizen a more affordable choice in a industry that is lacking in that area. Both companies already have poor consumer performance records and in the future when they become the only option by default the consumer will be the loser. Outrageous prices and poor attentive care for what the consumer really wants is the near future if they are allowed to merge.

Sincerely,

Aaron Groth

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I do not believe that there should be any,One, network that controls so much of the publics viewing interests, especially when they refuse to add channels from all sides of political and religious viewing/informal spectrums. I has called my Comcast provider and asked for the Blaze to be added, it has yet to occur tho be added to the cable listing s. I do not want to pay money to our, USA, enemies, through support via offering channels reflecting their (or enemies) view points and station findings. If that is the case, to be allowed, then Comcast must expand the channels/providers. I am not offended if all parties have options, one being the Blaze. I want Real news, not just what others Think i need to know. If i ever want to change cable providers due to availability, in area,i would like it to be am actual choice;a choice in provider offerings (view points) not just by name of company.

Thank you for your understanding.

Sincerely,

fay bretz

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As a Comcast subscriber, I have seen cable television rates climb steadily every year. Comcast has been completely ignorant of it's customers requests to carry programming that they want to see, while channels remain occupied by networks with near undetectable audience numbers.

Cable television system operate in a monopoly environment. Instead of making the monopoly even larger as this merger would do, I implore the Commission to deny this merger and investigate ways to create competition in the cable television market. A good model to review might be the electricity market, which has been divided into power generation and power delivery segments in many states. This allows consumers to buy power from any of several electricity providers, while still paying for delivery of electricity to the incumbent power company in the area which owns and maintains the poles and wiring. This affords some choice to the consumer and has lowered electric rates for me.

Once again, I object strongly to any Commission decision such as this which will consolidate a multi-billion dollar market into the hands of even fewer competitors.

Sincerely,

Jay Carter

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have experienced service from both companies and currently have Time Warner. While Time Warner is not great, it is much better than Comcast based on my experience. If Comcast takes over and treats me like they did previously I will have to change providers, which in the area I am in is not easy since we do not have any real competitive providers including AT&T, which would have been my choice, even though they are not that good either.

This merger is a merger of the worst with the best result being far worse!

Please don't let them do this!

Sincerely,

william bourbonnais

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

In February Comcast announced it was going to buy Time Warner Cable. Think about that for a minute: Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 20% of America can see on cable TV. This means less choice, less competition and higher cable bills.

Sincerely,

Jeff Weiner

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast and Time Warner cable are the two biggest providers of television programming in the country, as well as owning all or part of multiple networks. Allowing them to merge will take us closer to the monopolies that the Federal Government has been trying to eliminate since the 1920's. The people deserve more choices not monolithic conglomerates dictating the options they approve of.

Sincerely,

Brian Palmer

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We need more competition so that we can get a fair price for our TV service. The less companies involved creates more chance for them to charge very high prices and also to control the content more. Besides the price issue there is the content issue. When more than one or more companies can compete in the market it brings more opportunity for a greater variety and will also stifle one company bringing only one viewpoint in politics, etc.

Please do not give Comcast the permission to merge with Time Warner.

Sincerely,

Nellie Morgan

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Two of the biggest cable monopolies with the worst customer service records are wanting to merge and dictate what 20% of America can see on cable TV.

This means less choice, less competition and higher cable bills.

I would like to get the cable channels I want and pay for! I do not like having to take packages.

Sincerely,

Betty Harris

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It creates a monopoly and violates anti trust laws. The Government broke up Bell to create the baby bells because it said they were too big. Is this not the same case here? Creating one huge company to provide cable to most of America.

Sincerely,

Jason Soldani

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe that this is not a "diversifying" merger. The opinions given by this merger would be singular, not diverse. We are in a multicultural populace. I have a right to have my opinions put out on the airways just as other opinions have a right to be heard. This will not occur with a huge market share. The control over the airways this single company would have has ramifications that is more political than entertainment/information. It has the appearance of a monopoly on the airways. I do not support this merger.

Sincerely,

Shelley Iverson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

cable service has increased in cost and less competition gives big company's more power to raise the prices even higher. Both Att and Comcast have poor customer service and are always increasing cost to the public, customers are almost forced to change companies to save money on the cable chargers. We need more competition not less to give companies reason to work to keep customers and costs down.

Sincerely,

cs Longfield

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Less competition has resulted in a horrible third world telecommunications infrastructure in the US. We are so far behind Japan in our cell and television technologies it is a national embarrassment. Regulators in other countries have outperformed our US counterparts. What happened? Are you stupid, or take a bribe?

Gary Calderaz

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

our country is suffering from a lack of diversity in media. With the exception of a few alternative news sources (like the Blaze), the vast majority of news available is in lockstep with each other, and solidly Progressive/Democratic. Allowing Comcast and Time Warner to merge would be another move toward monolithic media and loss of more freedom of ideas/choice. Our freedom is dependent upon a watchdog press willing to challenge government regardless of who is in the White House. Fewer media companies equals fewer administrators deciding which news stories to cover and/or which cable channels to carry.

Thank you for your time

Martin Cleveland

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I endured many years of abysmal performance and service from Comcast. They never seemed to have any incentive to improve their offerings, and it seems that only Verizon FiOS's entry into the market has had any impact. Thus, I believe that consumers benefit when Comcast has more competitors, not fewer.

The Comcast / Time Warner merger would be even more troubling than a standard large cable company merger due to the fact that Comcast and Time Warner both control so much content in addition to the delivery system. Only if the cable/media market were truly open should any merger of this nature be allowed. Given that this is not the case, please block the Comcast / Time Warner merger.

Thank you.

Sincerely,

Eric C. Richards

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As a Comcast customer for about 20 years, they treat their customers poorly. In the past, I have asked them to carry certain stations, which they have refused to do. When I got their phone service, it took a full day on the phone with them to set it up. You get different stories and different directions from different representatives. I sincerely dislike having to contact them. Right now, because I am in a rental, I have not choice but Comcast. If I ever have the ability to move, I will drop Comcast. A Comcast/Time Warner merger will give Comcast more reason to keep treating customers poorly and they will have the ability to charge more because they will be servicing a large customer base.

Sincerely,

Cheryl OHalloran

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Each American has a right and privilege to make a choice. Our Choices do not need to be limited more than they are, otherwise we would NOT be a Democracy. It should be the People who rule in this Nation, not a select few. If the Freedom of Choice is not practiced among the people of the United States of America, soon there will be NO United States of America.

Think about it. Thank you for letting me Express My Views....that is what this Great Nation Is All About, that is what makes us so Great.

Sincerely,

Dorothy Bryant

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It lessens competition and creates a monopoly. Cable companies because of the limited numbers of providers already are overcharging and providing awfully poor service to their customers who have no choice but to put up with it if they want to see TV entertainment. Remember this entertainment comes to us over the public airways.

Sincerely,

Charles Young

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Two of the biggest cable monopolies with the worst customer service records will merge. This means they will dictate to approximately one third of what America can watch on cable TV. This means less choice, less competition and higher cable bills.

I believe that businesses should operate free of government intervention. These companies are government sanctioned monopolies with the power to silence independent, competitive voices.

Serving the public interest means more choice more competition and lower cable bills. I believe this should be the goal to the public.

Sincerely,

Coretta Hewitt

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The Comcast / Time Warner Cable merger is the worst combination that could ever be formed. Think about that for a minute: Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 20% of America can see on cable TV. This means less choice, less competition and higher cable bills plus a further degradation of programing. This merger can never be allowed to happen! ! ! It would create a Monopoly that could not be controlled or managed properly. Plus it would create an economic Monopoly smaller companies could not compete against. Each of them are already to big! We don't need more vulgarity, nudity and profanity on our air waves, we already have to much of it and not enough Family Programing.

Sincerely,

Ken Smith

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is TERRIBLE. They add services you didn't order and increase their bill. It's a 4 month hassle to straighten out their billing. You get a ridiculous run around, speaking to foreign people in the Philippines, and Puerto Rico, India, etc. who are absolutely no help at all.

Comcast's home office failed to reply to five of my letters requesting help. My neighbor experienced similar overcharges and was frustrated beyond belief trying to get customer service. I was charged for a box I returned. I was charged for maintenance that failed to accomplish results. Ridiculous!

They don't speak English. They give you a dial tone when they say they are transferring you.

DON'T LET THEM MERGE W/TIME WARNER until they provide reasonable customer service and stop sending higher bills than are justified.

Sincerely,

Richard Gallagher

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because it will result in less choice, less competition and higher prices. It will also result in too much of the market being controlled by one company.

Sincerely,

Scott Weikle

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

these companies do not provide enough news networks that give both the liberal and conservative viewpoints. Comcast does not care about its customer service. My parents switched from Comcast to DIRECTV recently because of the lack of quality with the Comcast customer service. I have witnessed the struggle firsthand while seeing my father struggle with the customer service representatives about unnecessary charges to the cable bill and other issues. It's in the best interest of the American consumer to have multiple options to choose from so that competition brings out the best service from companies.

Sincerely,

Zachery Borland

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It will create a monopoly , Time Warner has horrible service not to mention Comcast has less than friendly customer service appreciation . Why would this be allowed? Requests have been made in the past to carry a channel and have been denied. While most programming is geared for the masses the "less" than requested programs have not measured to their "standards". Thank you

Sincerely,

Bertha Sequeira

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As a paying customers, I am very disappointed with my experience of Comcast customer service. As well, I am frustrated that Comcast does not make available to it's subscribers TheBlaze TV. A merger between Comcast and Time Warner, in my opinion, does not offer solutions, but enhances the problem with less competition, etc.

Sincerely,

Kelly Ratzlaff

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have requested help with this issue several times from the repair and troubleshooting people and they tell me to complain to the company, well there is no place that you can complain, the system is not available several times a week and then it is slow because of the number of hops that it takes, i wish there was another cable company that i could use:

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it may infringe on freedom of the airways. They will then control a sizable portion of the cable outlets. Not good. We need as much competition as possible so all voice can be heard. please do not allow this merger. Our freedoms are becoming more fragile as it is. I think the merger is dangerous.

Sincerely,

Jud Ward

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is more than just a monopoly when a company owns so much of the media, it is a huge loss of freedom. It is vitally important that we have a good representation of a varied television market. Please consider keeping our television choices from being so limited.

Sincerely,

Demetria Bryson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The merger of Comcast and Time Warner is not in the best interest of the people. It would create a giant broadcast company. We need more competition in this industry to bring pricing down. This merger will leave us with less competition. Please consider the folks who are already paying high cable rates when you make this decision.

Michael Herrmann

Sincerely,

Michael Herrmann

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I currently pay outrageous prices for my cable subscription, i have asked for the addition of the Blaze, but it has not occurred yet. If another cable provider that offers more networks that appeal to me i would like to switch. If these companies are allowed to merge my options will shrink and prices will increase. I believe that cable providers already make a fortune and are trying to control what political and religious/worship viewings I'm allowed to view.

Please do not give more power to these companies. I still live in America and would very much like to have choice not dictatorship.

Sincerely,

Fay Bretz

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Please do not approve mergers of companies this size when there are precious few competitors. Preventing monopolies, or allowing only 2,3,4 or 5 very large corporations control a massive industry (such as gas stations) has proven to be a failure, with no competitors being able to enter the market post consolidations. Sirius and XM allowed to merge when only two satellite companies really exist in the market place, how does that happen on your watch? Please get back to the basics of fostering competition on the market place, not effectively preventing it.

Sincerely,

John Tronson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The Communications Industry is becoming too "centralized" and this merger draws us closer to a Monopoly in the News Network Industry which "endangers" COMPETITION AND ENCOURAGING UNCONTROLLED NEWS OF STATE, NATIONAL AND WORLD EVENTS, "UNCONTROLLED NEWS FROM EVERY POSSIBLE VIEWPOINT" is essential to THE VOTING POPULACE LIKE OUR "REPUBLIC" in order for UNCONTROLLED decisions to be INTELLEGENTLY MADE by the people who have chosen to GOVERN THEMSELVES in a "REPUBLIC" which is of the people, by the people and for the people. Without a VIBRANT Free and Open News Media which is "UNCONTROLLED" and focused on SIMPLY TELLING THE TRUTH OF WHAT IS GOING ON AROUND US, our REPUBLIC will grow weaker....Don't you agree and, if so, do not allow this journey toward the MONOPOLY of our nation's News Media to continue any further and, instead, encourage more COMPETITION. Thanks.

Sincerely,

Timothy Denham

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The merger of these two companies gives them far too much power and influence in a very critical business and service. We need more competition and diversity, not less. I am totally opposed to this action. this will just encourage more crony Capitalism. I am about to cancel my cable right now because of the current high rates, letting them merge will increase likelihood of even further increases. This is NOT a good idea and is not in the public interest.

Sincerely,

Lee Bourgerie

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It would be a huge monopoly in the area in which I reside, resulting cost increases which I, as a senior on a limited income, simply could not afford. In fact this would result in a large number of lower income people not being able to afford to have TV service. Since so many of us have debilitating physical conditions, this would mean we would have no means of 'company' or stimulation in our lives. Can you think of a better recipe for depression?

Sincerely,

Mimi MacDonald

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The Comcast / Time Warner Cable merger is the worst combination that could ever be formed. Think about that for a minute: Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 20% of America can see on cable TV. This means less choice, less competition and higher cable bills plus a further degradation of programing. This merger can never be allowed to happen! ! ! It would create a Monopoly that could not be controlled or managed properly. Plus it would create an economic Monopoly smaller companies could not compete against. Each of them are already to big! We don't need more vulgarity, nudity and profanity on our air waves, we already have to much of it and not enough Family Programing.

Sincerely,

J Smith

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The merger of these two companies they will have too much control of what the majority of the public will have access to watch and will hurt other smaller cable companies. We are now paying for stations which we have no intent in watching but in order to see those we want we have to accept channels we do not want. Imagine what will happen if they merge?

Kind Regards,

Jim S

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Too many corporations are getting monopolies in our country now. This merger would stop any and all competition for business in the cable networks and they could charge whatever they wanted and we the public would have no where else to go and have no choice but to pay higher prices for cable tv. Please do not allow the merger to happen it will only give them more rights to raise rates.

Sincerely,

Roy Lowry

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The industry will change from an Oligopoly to almost a Monopoly. When choices are few, the fear of competition keeps efficiencies and tech. advances

at a minimum. There is no reason to do better, as there is no more of the market they can get. Look what happened to our phone service, our

electric service, our water resources, etc. Even our government has lost sight of their responsibility which is only the safety of our nation and it's

citizens. They stick their nose into commerce, energy, education, business, and the law when it suits them. Everything they get into, without exception,

is screwed up.

Americans need more self reliance, fewer laws, fewer hand outs, a smaller government, less foreign aid, debt reduction, connect our dollar to

the price of gold. Not that anyone could trade their dollars for gold. But, if the value of the dollar were connected to the market price of gold, less

paper dollars would be printes, less debt. read Steve Forbe's book " Money". He gets it. No more  
Keyne's economics, that is obsolete now.

Sincerely,

Jim Burden

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

A monopoly on something so vital as our news and choices of what we can view is a very bad idea. We need more diversification in media etc. This will definitely mean less choice and more control on what we is available to see not to mention the inevitable price increase that will be sure to come. Please keep this in mind. Thanks.

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Frankly Brighthouse has control on who they will permit access to the lineup. That is not correct they are a monopoly. As a result, this permit them to control the content and frankly gives the Government too much control on access.

With the merger they will have 30% and can raise prices at will. My cable bill has gone from under 100 before taxes to now over 118 in a short period.

Service is average at best.

Now, even if we partition to add stations, they can ignore our request.

Thanks,

Sincerely,

D Durfee

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We switched from TWC mainly because they would upgrade their system software to make things better and cost more effective for them but as a customer, the service didn't get any better and would often not work properly. Months of failed connections, poor customer service and lost data finally forced us to change providers. We didn't even call, we unplugged everything and drove it to their office and told them to cancel and take their equipment. I fear that if they were to grow larger as a company this issue would worsen on a much larger scale.

Sincerely,

Paul Lara

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because of the sheer size of the companies involved. It would monopolize the TV distribution. What happens if a certain people (Republican/democrat) doesn't believe in what you believe in? What happens if a customer doesn't want TV with their internet? What happens during political season? What happens to the price that we pay. (I don't even know if Baja (my cable provider) is affiliated, but this effects everyone not just Com-Warner). With an even larger clientele base you'd think that prices would drop because there is less competition right? I believe in Capitalism and you should grow and be the best at your game, if you can be the best... but there were horror stories of Comcast that tell me that Comcast's best is a deathtrap for the public. Stories that have been publicized. If they can't even take care of the customers they have now, why would I want you any bigger? I cannot say anything for Time Warner. I have no information about them.

A merger could actually do good things in the right situations, but a balloon already has holes in it will not float and obviously you (Com-Warner) will not be at your best. You will just hurt those you fall on i.e. John Q. Public. I have many questions that probably will not be answered, but I believe that a merger should benefit everyone and not one company by creating Synergy, diversification or to lower the impact of performance on its profits, and increasing its supply chain. Never should a merger be used (even though it does) to eliminate competition. Competition is what pushes the normal business to

success. Because they have to be right, they have to make the right decisions and they know where their money comes from, unlike the government who thinks its a printing press. Why is the Government even associated with the cable industry anyway?...It's not their field of expertise, lately nothing is though...

I simply do not see these benefits coming from this merger. I see control! Biased, regulated, over-priced control and why would I pay more for lack of freedom?

Sincerely,

Trent Alldredge

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We need diverse providers of cable and satellite TV service. Comcast currently has terrible customer service, and I don't see that improving by merging with another giant. They are constantly late for their appointments, but don't seem to care. Prices will continue to rise to the point of being out of the reach of many consumers. Bigger isn't always better. We need MORE competition among these companies, not less. Competition drives innovation.

Sincerely,

Spiro Kyriacopoulos

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Frankly Brighthouse has control on who they will permit access to the lineup. That is not correct they are a monopoly. As a result, this permit them to control the content and frankly gives the Government too much control on access.

With the merger they will have 30% and can raise prices at will. My cable bill has gone from under 100 before taxes to now over 118 in a short period.

Service is average at best.

Now, even if we partition to add stations, they can ignore our request.

Thanks,

Sincerely,

D Durfee

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We switched from TWC mainly because they would upgrade their system software to make things better and cost more effective for them but as a customer, the service didn't get any better and would often not work properly. Months of failed connections, poor customer service and lost data finally forced us to change providers. We didn't even call, we unplugged everything and drove it to their office and told them to cancel and take their equipment. I fear that if they were to grow larger as a company this issue would worsen on a much larger scale.

Sincerely,

paul lara

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I feel very strongly that these government sanctioned monopolies, Comcast and Time Warner SHOULD NOT BE ALLOWED TO MERGE.

PLEASE FCC, DO NOT ALLOW THIS TO HAPPEN,

THEY DO NOT PROVIDE GOOD, QUALITY PROGRAMMING TO THE PUBLIC, TO WHOM THEY ARE SUPPOSED TO SERVE. THEIR CUSTOMER

SERVICE IS ATROCIOUS. THIS MERGER MEANS MORE MONOPLY OF THE AIRWAVES, IN CONTENT, AND CONTROLS SEVERAL OTHER MEDIUMS.

PLEASE, FCC, CONSIDER WHOM YOU ARE APPOINTED TO SERVE, THE GREAT CITIZENS OF THIS COUNTRY. WE WANT MORE INDEPENDENT

QUALITY PROGRAMMING, MORE TRUTH, MORE HOPE, MORE INSPIRATION, FROM OUR CABLE PROVIDERS. IF YOU LET THEM MERGE, THINGS

WILL ONLY GET WORSE, FOR YOU, YOUR CHILDREN AND GRAND CHILDREN, AND THE FINE PEOPLE OF THIS COUNTRY WHO DESERVE

MUCH BETTER THAN THEY'RE GETTING.

,

THESE THOUSANDS OF CITIZENS OF THE U.S.A., INCLUDING MY PLEA, IMPLORE YOU TO BE WISE AND  
RESPOND ACCORDINGLY TO OUR WISHES.

THANK FOR CONSIDERING OUR PLEA.

Sincerely,

Virginia Chesnut

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have seen customers discuss (during a television interview) the problems they had with Comcast customer service. The experiences were really bad. Combining two large cable companies to make a gigantic company is a very bad idea. If they don't help customers now or listen to their complaints, I fear what combining the two would do.

We need more competition and more choice in the programming we watch. I am tired of a cable company listing the programs that are available and I have to pay for all but the two or three I watch.

This is to request that you DO NOT LET THIS MERGER GO THROUGH.

Sincerely,

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The consumers of cable television deserve choice in what they view. All viewpoints should be able to broadcast. If Time-Warner were allowed to merge with Comcast, one network would control a large percentage of what Americans could access and watch. It would be to the detriment of Americans to only be able to access programs that this giant conglomerate would approve.

We need more choices in what is broadcast, rather than fewer.

Sincerely, Elizabeth Pomeroy

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This proposed merger will limit diversity. Now Comcast pushes a far left political viewpoint and does not air programs like the Blaze or any conservative or Libertarian viewpoints. This merger will cost more money for consumers just to recoup the cost of the merger and huge bonuses for Time Warner Executives. Comcast has bad service. I had Comcast for several years and I got tired of lousy reception and repeated outages of programs not to mention limited selection in programming. I would imagine their service will continue to decline if this merger is approved because they will have no incentive to improve it. Comcast has already been named the WORST Company in America. The lavish party Comcast threw for President Obama just screams political corruption. Comcast was number 2 in political spending last year. Combine all this and you will have an out of control propaganda media outlet for the current administration. Comcast has already been called before congress for its obscene political bias. There is no good reason to approve this merger. Nothing but bad will result. There are a number of reasons, all good ones, to stop Comcast from controlling such a large portion of the market.

Sincerely,

Yvonne Brinkley

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It will turn into a monopoly and Comcast will be able to charge there customers any price they want. They will be able to price gouge us and customer service will be worse than what it already is now. In America we need competition it is good for the people and the country and we will have limited choices. The merger for T-mobile and AT&T didn't go through because it wasn't good for the people and the FCC did the right thing. We are paying high Comcast charges as it is, if this goes through we will be paying even higher amounts. We are getting nickle and dimed on everything now and if this goes through it will be worse and this means that discretionary spending will go down. The economy is derrived from people spending and could slow things down rather than picking up. The FCC needs to block this merger it is not good.

Sincerely,

David M

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

they are not providing the content many of their subscribers have asked for, customer service is often dismal. Once they can control more than 30% of the viewing option available the Public will have even less say in the content available to us. We need more options and greater competition, this is a heavily regulated field and as such these types of mergers need to be stopped. Without the ability for others to come in and offer competing alternates we have to rely on the FCC to protect our rights.

Sincerely,

Charles Stumpe

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Creating a single entity that "serves" more than 20% of the TV viewing homes in the country is a recipe for reduced competition in many markets and for the country as a whole. Particularly having Comcast, which already controls essentially all NBC networks will clearly lead to additional anti-competitive behavior that will favor their own networks or disadvantage competing networks. If there is any concern at all at the FCC for the consumers of this country, this merger should not be allowed.

Sincerely,

Leo Chambers

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

To increase the size and power of Comcast would be to further eliminate choice to the consumer for programming and customer service. This would also increase the chances of a transfer of service our current local provider of Charter to Comcast. With the track record of lousy customer service and extra fees, many people locally would opt out of cable and switch to satellite. BIGGER IS NOT ALWAYS BETTER!

Sincerely,

DANNA DAY

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It's important that we continue to have the opportunity to view channels with different opinions. When two larger companies merge, they hinder the ability for other companies to compete in the media market. This then becomes a monopoly. This merger will do just that and would not be serving the public interest.

Sincerely,

Linda Schneider

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it directly interferes with Competition in the Marketplace.

The evidence that Larger Companies & Corporations do not have the competitive ethic due directly to their size is overwhelming.

Their Business Ethics is also questionable as the preponderance of history suggests that with their larger size, a business is able to hide, divert and deny any Ethical, Moral or Legal misconduct.

Bigger is not better - it is just more profitable at other's expense.

I am a proud Capitalist and demand an end to Monopolism.

Sincerely,

Jack Wells

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We are continually seeing less and less diversity in our choices of programming. I see a great deal of biased discisions in the type of content that is " allowed by the top companies. These discisions do not take into account the needs or desires of their customers. If there was truly a free market at play here and competition was in play the companies involved would find it necessary to listen to there customers or loose customers to other companies. We need more diversity , not less.

Sincerely,

Daniel Smith

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The government has already taken away too many freedoms that we as Americans have a RIGHT to! Freedom of Speech is one such freedom that is constantly being tried, we the people should have a voice, a say so in what we see and hear on our televisions. Merging these two companies puts that freedom in jeopardy, let the people choose!

Sincerely,

Sarah Duke

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

For one, Comcast refuses to carry GBTV which we are considering discontinuing our service simply because of that. And two, with poor decisions like that we do not want this merger becoming a company that has enormous amounts of power when it comes to what we are and are not able to view able to view based on their political affiliations. Many more people would watch GBTV than are currently watching Al Jazeera but GBTV is not available on Comcast? Isn't that a poor business decision? And yet this decision to lose money is made because political beliefs that run deeper than business desires.

Sincerely,

Tyler Butterfield

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Time Warner cable and Comcast both have awful reputations for customer service and giving them the ability to become one company is not in the best interest of the American people. Competition among the cable companies is what is needed in order to serve the American people. The FCC was created to protect the American people from unscrupulous companies and ensure that every American had access to communications. With this merger, it would limit the options and increase the costs to the American people for cable/internet service. Therefore, I respectfully ask that this merger not be approved.

Kind regards,

Sincerely,

Cynthia Woodard

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

they don't listen to what we as customers want to view. I was with the cable company and requested many times to add The Blaze TV channel with no success. I switched to Direct Sat. TV and I'm sorry to say that they wouldn't comply with requests for The Blaze either. I finally gave up and got a Roku

Box and I can watch the Blaze now. It's basically a monopoly and will get worse if these two companies merge. We have only one cable co. in our town Time Warner and the internet service is not good for our business. It's always going down, which costs us lost work time.

Sincerely,

Beverly Moore

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger will mean fewer choices for viewers and higher rates as this massive merged company dominates the airwaves. Comcast has already been unresponsive to my request for programming (like The Blaze TV) but offers Russia and al-Jazeera tv which hardly anyone requests or watches. We need more choices, not restricted and limited views.

Sincerely,

Margaret Roberts

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

giving one corporation a monopoly for over 20% of the American public is a monopoly, period. Both of these corporate giants have despicable track records when it comes to customer satisfaction; combined they can ignore even more people.

The essence of American's success is competition and innovation, along with respect for the customer. This merger would stifle competition and remove the need for innovation. Neither corporation respects the customer, which would become even worse with a larger monopoly.

Please do not allow this merger of two large corporations who have shown an irresponsible attitude towards the public.

Thank you.

Sincerely,

Thomas Huffman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The public is not served when Giant TV Conglomerates force customers into buying lots of stations they don't want, Al Jazeera comes to mind, but when The Blaze made a bid to have a station they were turned down. That sounds like people in power positions at the top of the Cable TV food chain get to dictate what point of view is being "allowed" to be heard/viewed. Wasn't it Bill Clinton who broke up monopolies....(which ultimately began the chain of events to burst the internet bubble?). Seriously, I thought monopolies were bad for everybody. So which is it? It is OK when it is YOUR monopoly right? I like to view a wide variety of opinion/talk. I want to know more than one side of an issue. That way I can make informed decisions when I go to the voting booth.

Sincerely,

Marlene Weingart

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

there will be no net benefit for the consumer. The consolidation of the service providers, results in competition no longer being a factor in improved services or price control. Recent rulings allowing internet service providers to throttle service to competing content sources is anti-competitive and antithetical to the premise of an open market. These type of actions are similar to the issues with the railroads in the previous century. Monopolies are not in the public interest.

The public has a poor view of service from both Comcast and Time Warner. History shows it will get worse. We lag behind the rest of the developed world in open access to internet content and speed of service. With this merger, the gap will widen.

Please stop this from proceeding.

Sincerely,

Michael Alewine

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast has many problems with its service, which are rarely resolved with any satisfaction. They certainly do not need to expand a service that is already incompetent. I have had many issues that continue to create problems, not just those with cable but with wireless services also. Please do not help them in their quest to control and destroy our communication.

Sincerely,

Brenda Hobbs

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Didn't this country decide a long time ago to do away with monopolies. Mtn. Bell telephone was split up for this reason supposedly. So why are we now creating them? Only through competition is our great American experiment realized . Say no to the merger!!!

Sincerely,

Nolan Bastian

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It's a giant step towards government control of our media. Once a company gets this much control the power becomes a political issue and the public are at the mercy of the giant who controls all the news media. Not just the news, but all and any programming. We only get to watch what they choose to show us. There will never again be an opportunity for a differing opinion. Lots of companies have been regulated to keep them from obtaining a monopoly. This should definitely be one of them. Please use some good judgment and deny this merger. Thanks.

Sincerely,

Ronald Bassett

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It would make a giant conglomerate who would further limit the choices in pay (cable or satellite) TV. There would be less of a desire, and need, to compete for subscribers. I do not see where this merger benefits anyone but the corporations and shareholders involved. It certainly would not benefit the individual customer. I would like to see more competition to provide a better, lower cost product and service. This will lead to fewer choices and HIGHER costs.

Sincerely,

Sandra Bernal

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

A merger like this will create a near monopoly and force smaller providers out of business and give the combined entity more control of what channels and information will be provided to consumers. The marketplace should have a greater number of outlets from which to choose from, not fewer which will keep the flow of information free and un-biased..

Sincerely,

Ed Boulter

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because it would greatly eliminate competition and public choice in Cable services. I feel already that there is a monopoly in the cable industry because there are so few choices as to how and where you can get cable and internet services. The merging of the 2 largest cable companies will only strengthen that monopoly offering less service at higher rates. In addition to raising prices for service, they will have a monopoly on what is offered for our viewing. At present, they choose what programs they will run on the network. The merging of these 2 companies would give them a stronger ability to censor free speech. This should not be allowed in a free society, and it appears to be in contrast to our constitution.

I strongly request that you NOT permit this merger to take place, but, instead encourage more competition in this very lacking and important industry.

Thank you,

Sincerely,

Lois Verde

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger will create one huge cable company which may act like a monopoly. Although I subscribe to a satellite provider at this time, my experience in the marketplace with these types of huge companies is that they offer fewer choices and charge high prices. Communications companies are tending to bundle and lump media and content services ( Phone; internet; TV ) together in large expensive packages. Companies include other large companies services in their bundles locking consumers in to contracts and forcing them to buy packages with more than the consumer wants and possibly lacking something the consumer does want. These large companies either kill off or buy up their small competitors and leave consumers with fewer choices and higher prices in their ridged packaging practices. Small companies can not compete with huge companies who dominate the marketplace and lock consumers in with large expensive product packages. Very large companies have the financial power to dominate and control their marketplaces offering fewer choices and less flexibility to consumers.

Sincerely,

Stephen Szirmay

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

They all ready have the worst customer service and service times are horrible. I could not get the selections I want. My bill just gets high and the service gets worse. Why make them larger and not have the availability to get more of a strangle hold on areas that don't have an option.

Sincerely,

Cheyenne Iujano

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Time Warner is already charging me way too much and with less competition will be able to charge me more. I get HD TV, internet and 2 phone lines for \$232 a month. I do not get any movie channels or extras like Football, etc. \$232 a month is HUGE and the service is not good. They will not get better when they get bigger. They also dictate what programs we can get and I don't like that. I think it would be in the public interest to strengthen the free channels or break up Time Warner and Comcast into smaller competitive companies that would be reasonable in price and give us more choice. I remember when the phone company was broken up into the "baby Bells". Try that!

Please truly consider what will be good for us....the public. We don't have big legal firms or lots of money to influence you. But we already get too much propaganda and agreement among broadcasters in what they will let us know. We deserve better and we do understand what is happening.

Sincerely,

Nancy Vincent

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because it will serve to limit competition and choice for customers when they choose a local provider of these services. Having multiple providers makes it easier for customers who experience poor service to change providers when they wish, which forces providers to offer high quality service. A merger would endanger this customer option.

Sincerely,

Jamey Marsh

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Entertainment, news, the medium in which they are delivered, and the provider controlling that medium have tremendous influence over the public and the audience. An entity which has a monopoly on that medium and its content can sway or manipulate the viewer to a course of action or its desired result. This merger will eliminate competition, the public will suffer with fewer options for a commodity that has been monopolized.

Sincerely,

Karl Ott

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Frankly Brighthouse has control on who they will permit access to the lineup. That is not correct they are a monopoly. As a result, this permit them to control the content and frankly gives the Government too much control on access.

With the merger they will have 30% and can raise prices at will. My cable bill has gone from under 100 before taxes to now over 118 in a short period.

Service is average at best.

Now, even if we partition to add stations, they can ignore our request.

Thanks,

Sincerely,

d Durfee

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is becoming a monopoly. I have heard that they are already committing fraud by charging for services that customers did not request and making them call every few months to remove the charges. I have also heard that they are not allowing customers to close there accounts without spending hours and sometimes months going through hoops to cancel. They do not provide channels for conservatives except fox network. They provide many channels for liberals, communists, socialists. One company should not be able to control what 30 percent of the population watches. No company should be able to bribe the FCC and not be fined and jailed. No FCC official should get away with being bribed without spending time in jail. This merger will only increase cost of cable and decrease their quality of customer service. please do not let this merger go through.

Sincerely,

Denise Sterwart

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is not only a cable provider it is a cable programmer, picking and choosing what they will "allow" to be delivered regardless of customer interests. That is fine if the consumers have other choices which is often not the case. If Comcast combines with the "other largest" national provider they will "own" approximately 30% of the cable market. That raises their power and advantage over smaller companies to something near an industry monopoly, overwhelmingly dominating the movie/video, TV show, news, sports and foreign language media market. I can not imagine that this will benefit the American consumer and that is what the FCC should be weighing carefully when considering a merger of this magnitude. I believe it will defeat our most basic concept of free market competition, what brings us the best products and services at the lowest possible end-user costs. Comcast is already recognized for its poor customer service support and questionably—irregular billing practices. Historically, the larger a company becomes, the less obligation it feels toward its individual customers which in some areas of the country already have little other choice. If Comcast is poor in its practices and responsiveness now, how will it conduct business when it's twice as big? There are already ongoing "deals" involving one of the other industry giants, Charter Comm Corp, in this convoluted 45+ Billion dollar "shell-game".

Broadband service in many areas includes internet access which may be even more important to, if not critical to, many subscribers than channeled entertainment and a Comcast/Time Warner giant will be so

influential that the current standards we value could be changed at the whim of a few corporate executives. After all, the president of Comcast regularly plays golf with the President of the United States. The political favoritism implications are serious and could greatly affect future industry rules and practices negatively for the American consumer. When combined, Comcast – Time Warner Cable will exceed 40% of all broadband service. Again, it is unlikely this will benefit consumers in the future since “capping” broadband use is already in-the-works and being promoted as well as suggestions for other cost-increasing access changes. These major mergers always tilt the playing field, often quite drastically for the smaller industry players resulting in even less competition and higher subscriber costs. This one sounds like it will prove to affect every cable user substantially within the very near future.

As a side-comment here, to get cable service at all, we have to pay for channels we are not interested in and do not want while others that we do want are only available in the most expensive “programming package” if they are available at all. This is not responsive public service which it should be if regulated by a federal agency. It is an enormous corporate power to have the discretion to configure those “programming packages” for the maximum profit while flexing that same power in resisting selective “per-channel” subscriptions. Many of us would much prefer paying for only those channels that we want instead of being forced to purchase a top level premium package just to get those few we are actually interested in watching. Here again, competition for per-channel subscriptions would improve all aspects of the product, service and price.

If the FCC is interested in the American consumer then you will deny the Comcast purchase of Time Warner Cable and instead, look into regulation that would give Americans the option to pay for what they want to watch and not be forced to subscribe to huge “premium packages” that are expensive because we have to pay for dozens of channels we do not watch and do not want. More competing providers, not ever--larger corporations, will result in better service and reasonable cost rates for us consumers. If you are going to regulate, then regulate for the benefit of the hard working people of our country.

Sincerely,

William Bennett

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Serving the public interest means more choice, more competition and lower cable bills. Having Comcast acquire Time Warner means they will control 30% of what 300 million Americans will watch. This will also help to silence independent, competitive voices.

Sincerely,

James Henry

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast already has too much power in the cable media. They dictate what shows are available, they set their prices higher than anyone else, without offering anything better. I have had Comcast since 1990 (they were called something else back then, I can't recall) and I have watched them grow fatter and more dictatorial each year. I am in the process of dropping them for a satellite provider because I now pay nearly \$200 a month for next to nothing and my 24 years of loyalty are worth nothing to them and they don't care if they keep me as a customer. They already own an oversized piece of the pie, don't give them the whole damn thing. Thank-you.

Sincerely,

Deborah Day

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The customer service of Comcast has a long way to go to be considered adequate. I have been a long time Comcast customer. However, I have considered changing many times over customer service related issues. The merger of these two giant corporations would constitute a monopoly and the rates, which are already high, will increase even more. I have most of the premium services fro TV, a phone subscription, and an internet subscription. The bundle is still costing me \$300.00 per month. The merger would skyrocket this amount. Competition keeps rates lower. I prefer more competition every time.

Sincerely,

Richard Bowman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The more competition there is the better the service is. I understand that customers are important only for their money to these companies. Customers need to have a choice to leave companies that don't listen to them and give them the service they ask for. By merging these companies the people they serve can go to them or go without. That is not the American way. We deserve better than that. DO NOT let this merger happen!! Bigger is NOT better for the customers.

Sincerely,

Betty Cook

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Technically, Comcast is my only choice now, as geographically, dish services are not feasible, and I do not want to have to sign up for a landline to use Fair Point. I want more competition in the area, not less! When Comcast raises their rates (which is often), I can't just 'switch' to something else. Here, we just have to take it. Please, expand the opportunities, not make them further out of reach!

Sincerely,

Diana Young

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

A merger between Time Warner Cable and Comcast will give one company control of over 30% of the cable market in the US. It is obvious that this will diminish consumer choice and ultimately result in higher costs for the consumer. I am a former customer of both Time Warner and Comcast. The customer service at each company is less than stellar. If these two companies are merged, it is impossible to believe that customer service will improve. Please do not allow this merger to take place. It is the job of the FCC to look out for the American consumer. The best interests of the consumer can be served by preserving competition in the market.

Sincerely,

Arthur Morris

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

...its another step to monopolize the industry. This will mean even worse service, no improvement in technology, and a higher price. They shouldn't even have commercials on Cable TV, much less hour Infomercials. Just look at this place now

<http://graphics8.nytimes.com/images/2009/12/08/opinion/08rfd-debate/blogSpan.jpg>! What are all the people in there doing?

All they have to do is provide the same maximum channel service to everybody. There's no need for a skyscraper full of clerks managing accounts. Very likely this isn't the only one, Here's the one in St. Paul [http://assets.bizjournals.com/twincities/blog/real\\_estate/Comcast.St.Paul.MN\\*304.jpg?v=1](http://assets.bizjournals.com/twincities/blog/real_estate/Comcast.St.Paul.MN*304.jpg?v=1) See, it will just mean bigger and better offices for their clerks, that's all. They are moving the Florida HQ to spiffy West Palm Beach, for example.

Tell you what, the industry is too monopolized now. The government should temporarily take it over, give everybody the same service to make accounting more efficient, and then split the corporation into regional administration centers.

Sincerely,

Andrew Gunderman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Without competition Time Warner cable has continually raised rates without supplying adequate service. Customer service is terrible. As long as Time Warner does not have competition there is no reason for them to improve their service. The FCC should make changes so that people have choices in the cable tv service. Monopolies are not in the best public interest. Please do not allow the merger of Time Warner and Comcast.

Sincerely,

Brian Cail

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

there is already not enough competition in the cable business and as a consumer I feel very much that this merger would not be in the best interest of the consumer. We recently got rid of cable because we felt we were paying way too much for the few channels we were watching, horrible customer service and it was way too expensive! We believe that these companies already are too big and do not serve the cutomers interest. Comcast has the worst customer service. I have called and been on hold for hours. Then I have been connected to the wrong people over and over. One time I was transferred to a cable installer in New Jersey when I live in California! I believe that the politicians should be making this market freer with more competition not less. Look out for the consumer and stop the corporate cronyism and welfare!!!

Sincerely,

Blair Maus

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Why do I, as a consumer not allowed to have Direct TV provide The Blaze? They will not provide The Blaze. So, I am even more concerned that Comcast and Time Warner will do the same with no choice for us the consumer, who has requested on many occasions with the same results. NO Blaze TV.

Please listen to the consumer request and provide the alternative TV programming like The Blaze TV.

Sincerely,

Roi Ring

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There are too few choices out there for Internet and TV. If I want to connect to the Internet with a high-speed connection, I have two choices where I live: AT&T, whom I use, and Comcast. There are literally no other options where I live. Comcast's speeds are decent unless you use it to watch TV, which is what I do. I like to watch online subscriber-based content such as Netflix and VUDU. I carry Dish seasonally during football season because I enjoy watching the NFL games and it's cheaper than any of the other options. It also carries most of the channels I enjoy watching, such as Fox News, the Food Network, the Blaze, and ESPN.

Two years ago I had Comcast. They promised me a promotional rate and free installation. When I got my first bill, neither the promotional rate nor the free installation were correct on my bill. I was charged about \$100 for the installation, and the regular non-promotional rate for my service. When I called Comcast to complain, they told me that whoever it was that made me that promise was an independent contractor, not an agent of Comcast, therefore they were not obligated to honor that rate. I had no way of knowing when I called the number if I was speaking to a Comcast agent or not. I spoke with someone who said they were with Comcast, who set up my account for me, and who scheduled an installation. The person who showed up for the installation drove a Comcast truck and had Comcast logos on their clothing. Everything screamed Comcast, that I was dealing with Comcast, and my service actually did start just like I had requested, so whoever it was, they sure seemed like Comcast employees to me.

Comcast admitted to me that the installer was one of their employees, but claimed that whoever had promised me the promotional rate and the free install was not, therefore they could cheat me out of the rate I had agreed to.

I asked them to cancel my account, and they told me I would have to go in to one of their offices to turn in the equipment. Because they have limited hours of operation, I had to take time off work in order to do so.

That leaves me with literally one option for Internet: AT&T. They have been okay, but speeds aren't great.

Programming options on Comcast television have not been what I want. I do not want Al Jazeera, a network that is funded by the same government (Qatar) that funds terrorist networks like Hamas. I feel that supporting that network by subscribing to it, even if I never watch it, violates my conscience, my religious beliefs, and my oath of citizenship to my country. We are in a war against terrorism. I feel it is a betrayal to support a network like Al Jazeera whose sponsors also sponsor terrorism. They also air Russia Today. I don't feel I should be spending my money supporting a network that spreads Vladimir Putin's propaganda, or the propaganda of any foreign country. Comcast also refuses to air The Blaze, which is a network I enjoy. Because Comcast owns competing networks, I don't think it is in Comcast's business interests to air it, and giving that company control over 30% of all television content in our country makes them so large as to be monopolistic. This does not serve the public interest. It certainly does not serve my interests.

Since signing up for Netflix, I found that with Comcast my download speeds were terrible. There were constant issues of buffering and I was not able to enjoy the programming, not because of content or problems with Netflix but because of bandwidth issues with Comcast. I have occasionally had similar problems with AT&T, but much less often. (I am not currently a Netflix subscriber.)

In addition to not serving my interests, it does not reflect my values. They have treated me dishonestly, they air content that is offensive to me, and they restrict the bandwidth of their own customers if they download content that is competitive in nature to their own products. In such a highly regulated industry, there should be more providers of service available for me to choose from, not fewer. This merger is bad for me, bad for the public, and does not serve anyone except the shareholders who stand to make a killing with this merger. Please say no to this merger.

Sincerely,

Joshua Wyatt

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Having fewer and fewer, but larger and larger companies in control of what we see is not a good idea. As it is, you get umpteen channels with very little quality offered in programing. Many of the shows are really trash with more and more sexual content. It seems that there is a competition to see what show can be more daring and push the envelope a bit further. We have lost local control as companies grow larger and more distant. They seem to "KNOW" what is best for viewers and truthfully ignore our wants. Most seem like they have an agenda that they are pushing. That's why lots of people stream shows now, instead of watching the tube. It is not in the public interest to allow this merger.

Sincerely,

Pearl Elder

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Competition is good for the economy. It promotes lower prices and better customer service. This was demonstrated when AT&T was broken up as a phone company. We do not need monopolies in the entertainment industry.

Sincerely,

David Rice

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This would make Time Warner/Comcast the biggest cable/communication company in the nation. This joint company would control too much of the programming in US households. I feel that if the joint company doesn't like the new programs that become available (regardless of customer support or demand), they will not make the new programming available to its customers. The FCC should not allow these 2 companies to join because this large company would have too much control over programming for a large part of the US. Also, with limited competition the Time Warner/Comcast company could cause cable rates to necessarily skyrocket in the average American household. The FCC is in place to protect the public and this is one major time for them to stand up and block this merger.

Sincerely,

Eric Davies

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast already has monopolistic control over major coverage proportion of the cable media. Enlarging that monopoly is counter to all public interest. Instead, all cable territories within FCC oversight should have freedom to offer at least three or four cable networks, should there be interest to do so.

Monopolies are always anti-American and should be governed by commerce laws preventing such. This action is clearly not supported by me nor my family.

Sincerely,

Arthur Sprunger

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe that the Comcast/Time Warner merger would be in the best interest of the people of the United States. Government created or allowed monopolies provide a way for companies to force customers to accept packages they don't want and don't want to pay for. My wife and I watch about 20 channels but are forced to accept nearly 300 channels just to get the 20 channels we occasionally look at. I'm not interested in Nude Dating or nude camping. I am not interested in 15 year old pregnant mothers who are afraid to talk to their parents. I don't want to see Real Housewives of any place or how to purchase a bra that fits, but more specifically, I don't want a monopoly that is allowed by the government to force me to pay \$80 - \$100 a month or more when I am on disability retirement and don't have that kind of money to throw around.

Please, use your power to encourage cable companies to offer better programming that we want without having to purchase programs that we don't want and will NEVER watch. The FCC is letting these companies get away with highway robbery. We, who are on a fixed income cannot afford the programming we are being forced to pay for. What you are allowing the cable companies to do is similar to walking into a grocery store with \$40 and a shopping list and being told that we have to purchase items that we don't want, don't need and can't afford or we can't have the necessities we have on our list. In other words, I have \$40 to spend but the store makes me pay \$60 or \$80 for items I can use or don't want. In some cases, eating the foods being forced on us could make us sick or be against

our religious beliefs. It's like letting the grocery stores force you to purchase peanuts when you are allergic to them or to purchase brussel sprouts when you don't like them. Forcing us to accept 300 channels when we only want 20 is WRONG and should be illegal. THE FCC needs to be responsive to the needs of the people they are serving, not the needs of the companies whose only interest is to make more billions of dollars in revenue. They are doing so on the backs of the people who can't afford it.

Please help the little guy for a change.

Sincerely,

Roger Fuller

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I think that it would make for too much power and control for one company. I would like to see more choices to choose from. I had a problem with comcast getting me to buy my phone from them and promising me rewards I never received. I spent 45minutes on the phone tying to handle it and they never came through. They could easy hold you hostage and keep raising rates. Please stop this merger.

Sincerely,

Judy Friesen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Monopolies cripple the market by squashing small businesses, by manipulating the forces in play in a capitalist free market such as competition, supply and demand, innovation. Monopolies are contrary to the notion of fairness, which is part of the American psyche. Monopolies are wrong because their customers are at their mercy in terms of cost and quality of the product. What legal grounds do monopolies have to stand on? I will support a grassroots to congress push for legislation to prevent this merger and other monopolistic mergers of this ilk.

Sincerely,

Jo Jackson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is a crying SHAME and a sad sad JOKE! If I told you how poor their customer service was you would think I was making it up, unless of course you're one of their customers. The only thing worse than their cable signal quality is their usually not working internet and their psychological experiment of customer service interaction. I have PTSD over the countless hours I had to spend with them on the phone. Nothing but untruths. I didn't say lies because the person promising you on the phone sincerely sincerely believe their nonsense, however it never comes true. Not the service, not the quality, not the installation, not the repair, not even the price.

Sincerely,

Adam Holmes

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast bills are already too high. My wife and I are retired and can't afford the high cost to see TV. Comcast has literally not served my family and our community in a manner that they should have. Their work and service leaves a lot to be desired.

Please do NOT allow this merger to go through! This would leave Comcast as a monopoly and increase costs and decrease service then we already have.

Sincerely,

Ronald Tyler

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I do not believe the Comcast Cable and Time Warner Cable merger is in the public interest because both of these cable companies not only distribute television content, these cable companies both own television channels as well. This merger would mean up to 55 channels would be owned by one large company-Comcast. This is not in the public interest of the United States citizens who prefer choice and competition between businesses. Serve the United States citizens as your agency says you do and block this merger.

Sincerely,

Sue Northey

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

They are too big now. The smaller companies are unable to compete now. With a merger of this sort the average persons bill will be out of control. They will for all intents and purposes be a monopoly. However the smaller companies will be put out of business then with no competition they will be undeterred as to price, maintenance etc.

Sincerely,

Kerry Huff

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It can and most likely will lead to them having a monopoly. Remember when it was just good old Ma Bell, well I do. Even though the phone system seemed flawless when they were the only ones, it was still important that they could not monopolize on the system. Services are vastly greater when there is competition. In fact, it can and does become inherently dangerous when one entity has control of any service.

Respectfully,

Doc

Sincerely,

Mark Paolino

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Currently, the public is not getting unbiased information or both sides of the story from either Comcast or Time Warner. Merging these huge companies will create a monopoly. This will create a one-sided viewpoint of the information that is reported. As citizens of the United States, we are legally entitled to be exposed to all sides of every issue, so that we can decide for ourselves who we believe and what we think is "right" for our country. In fact the founders planned on a well-educated public to enforce good government and to keep our leadership honest. With this merger, the public will not be knowledgeable enough to provide sound judgment from the limited information that they will receive.

Without competition, service and quality deteriorates. Capitalism or the American Way enables all to provide and compete for quality products. Having more information and viewpoints available would create better thoughtful analysis and much better service.

I recommend that The Blaze be authorized to broadcast through Comcast Corporation and Time Warner Cable. The Blaze provides a balanced perspective on issues and has integrity in their research. Americans deserve to be exposed to The Blaze information. But, Comcast Corporation and Time Warner Cable will not include The Blaze in their programming. Why aren't they enabling all ideas to be exposed? Controlling information is not democratic and has definitely degraded the integrity of our government.

Because of their controlled bias, many American people today are not knowledgeable about issues, so they are unable to select and vote for sound leadership and uphold the constitution.

The US government should definitely not merge any big communication companies, like Comcast Corporation and Time Warner Cable Inc. This merger would enable the new entity access to 30% of the broadcast business. The FCC should promote access to all information, not control what the public will hear. The FCC should facilitate liberty through an educated public.

Sincerely,

Janet Schow

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

A merger of a government granted monopoly is counter to the good of the nation. Given its abysmal customer service ratings already, giving it more power is a bad decision overall.

Sincerely,

Brian Kucharo

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It reduces competition substantially!!! This merger would allow one mega-corporation to control approximately 1/3 of all broadcast, cable & satellite TV content. This is and would be unacceptable. It is the duty of FCC, FTC, and Justice Department to enforce anti-trust laws and ensure adequate competition, not eliminate it, as this merger would do. This, merger if allowed in its completion, would be detrimental to consumers. Also, Comcast Corp is a politically active entity contributing to and supporting one political party much more than others and helping with that party's agenda substantially more than the other major political party(s). One Corporation should not have that much power and control over content, and pricing. Please do what is right for the general public and consumer, and block this merger.

Sincerely

Greg Nolen

Sincerely,

Greg Nolen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast has monopolized cable and internet services in every place I've lived in Pennsylvania. When I lived in York before, Verizon was offering cheaper services and was trying to get into York. They weren't able to at the time and I had to get Comcast if I wanted to have cable. Comcast raised my rates significantly without warning. Customer service was less than adequate and representatives never gave me consistent answers (which was quite frustrating).

Now, thankfully, I have dish for TV. I've had great service and it's the ONLY carrier I know of that has Blaze TV. I want to have Dish internet to get a discount but unfortunately can only get Comcast.

Please do not allow the merger to go through between Comcast and Time Warner! Comcast already does not listen to their customers demands and does not provide appropriate customer service. If they merge, things will be much worse!!!!

Sincerely,

Kathy B

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The two Companies have the worst customer service depts. now...as do most monoplies do

I would want more smaller cable providers coming into the market, not less.

The prices would go up with this merger and for the channels provided, the cost for them is already way too high now.

Comcasts CEO's are big golfing buddies with the Washington crowd, Lobbyists etc.

So we will see what happens

I am looking for the FCC to make it easy for smaller cable companies to come on board. Cut the Red tape, and create jobs..

Stop protecting just the big chosen few all the market share, they all now do a horrible job...

Sincerely,

George Kilgore

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

TWC already strong arms its customers with stiff price increases. If these to corporation are allowed to merge and become a larger corporation will only give them more power to control their market. Already at this point TWC does not give good customer service. Allowing them to merge, in my opinion, will only give me less choice, less competition, and higher cable bills!

Sincerely,

william whidden

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

concentrating monopoly on information and have one company control the narrative goes against free speech as protected by the 1st amendment and individual liberty.

We need to extend the privilege of equal protection under the law to protecting equal access. When AlJazeera is granted access to the American cable industry, Americans deserve to have their view point presented through the same cable access. The Blaze should have equal access.

Thank you,

Assad

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is not concerned with customer service. I previously lived in Detroit. comcast had a cozy deal with the local politicians therefore you could not get another cable service. thier installation was shoddy and thier service was sub par. In Flat Rock they informed me that I need to bring the sub par boxes that they installed back to there local offices,then i may be able to get all the channels that i pay for. If there was a competetive company I would dump comcast.

Sincerely,

james grant

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it is too much of a monopoly. They will just use it as an excuse to cut internet access and speeds and raise costs, especially for rural customers. Competition is the only thing driving better customer service, lower costs, etc. Whenever I have lived in a location with two competing cable companies, the services offered have been broader, cheaper, and with better customer service.

Sincerely,

Ronald Spence

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because being the two giants that they are, if they merge they will dictate what 30% or more of America can see on cable TV. This means less choice, less competition and higher cable bills. These companies are government sanctioned monopolies and if they merge they will have more power to silence independent, competitive voices if it furthers their business interests. As already it is, Comcast is one of the two biggest cable monopolies with the "WORTS" customer service records, that is why I cancelled their services long time ago.

As an American, I believe in freedom of speech. I believe that no one should control what people hear, say or see. Those are our American values and I believe they are the FCC values too.

Sincerely,

Yolanda Gonzalez

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

One of the many GREAT things about this country is that capitalism brings competition. If the merger between Comcast and Time Warner were to happen there will be less competition, creating prices to up throughout the United States. Please do not allow this merger to happen. It will hurt the American People. Prices in this country have risen so much in the last 10 years do to the devaluation of the dollar. We don't need crony capitalism to create higher prices instead of competition.

Sincerely,

Virginia Ratcliff

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

They control a large segment of news and refuse carry "the Blaze" network.

Sincerely,

Dan Fox

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Competition is good.

Comcast is in SC and Time Warner is in NC. I am in NC. There are few options.

However, you should see how Direct TV and Disk Network compete for my business!! They offer new features and newer and faster equipment. Time Warner does not.

Even after I have been with the company (Time Warner) for 2 years, still I was not offered newer equipment until I told them I was going to switch to Dish Network. But Dish Network does not offer internet services.

Phil Baer

Sincerely,

Phil Baer

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We are stuck between a rock and hard place. We need free enterprise. Comcast has terrible customer service, they do not follow through with their promises and they do not need to have more of a monopoly on the market in this sector. They need more competition, not to become larger and less caring in their business practices.

Sincerely,

Pamela Bailey

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

More competition is what is needed, not less. This violates anti-monopoly laws in this country, reduces competition and the pressure to lower fees and is extremely dangerous in terms of one group of individuals controlling the available media to a large portion of this country's populace. Vote against this merger and do what is RIGHT for this country and freedom of choice. And while you're at it, how about doing something really productive and force providers to allow consumers to choose and pay for only those channels they want.

Sincerely,

hollis hightower

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We already have legislative barriers in place preventing any Regional Competition in the Cable/Internet Industry. The United States is divided into regional monopolies that restricts consumer choice. We already have a cartel system forcing us to purchase channels we do not want in order to access channels we do and have no recourse in changing to another provider. Not only does this allow collusion and price fixing but ensures a constantly rising price with dropping value for each dollar consumers spend. These monopolies are not only anti-competitive but violate my First Amendment Rights by forcing me to both pay for and be exposed to content I do not want while allowing a monopoly to restrict my access to content I do want. This fundamentally violates my Constitutional Rights as I am forced to support products and services by their inclusion in content packages compelling me to materially support things against my conscience and that I do not wish to provide material support or assistance to. I must do this in order to buy/purchase/support content of my free choosing. This sets up Government barriers and creates moral barriers in my Free exercise of my Constitutional Rights. Regional Monopolies are bad enough, the Comcast/TWC Merger would effectively set up a National Monopoly and give greater advantage to the Full/Quasi/Partial Monopoly allowing for their ability control content delivery of their choosing, with less competition and fewer overall Options for people to even use as referencing points to gauge the level of Full/Partial/Potential Censorship and Content Packing/Pricing systems hampering my ability to even engage in Content Discovery ie; to know

what I'm missing and compare value. A corporation of this size, controlling all digital content in terms of access and pricing is a fundamental threat by it's very potential existence to the Free Exercise and Protection of my Constitutional Rights. Regulatory measures that act in concert to take these rights away from me are in and of themselves a violation of my Constitutional Rights. Collusion between Private Corporations and Government to assist, approve or enable a merger of this type is a grave violation of my Constitutional Rights. History will not judge you by your intent, your intent will be used as evidence against you. This is also true for AT&T & DirectTV.

Sincerely,

Robert Widing

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I switched to Dish Network because of the continual price increases imposed by Time Warner. I still use their RoadRunner service for internet and that is always going up. With no other competition in the cable arena in this area we are at their mercy. Letting Comcast and Time Warner merge is as bad as letting Exxon and Mobil merge, oh no they already let that happen and see what that has done. Rather than letting them merge, revise how local services can be changed so that after 5 years a city or town could change to another provider based on a service bid. This way a companies like Time Warner and Comcast would compete for our business rather than monopolizing an area.

Sincerely,

Steve Stanmire

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Competition is the key to good service in every business and the larger the company becomes the less is the possibility of any competition.. This is an

entertainment medium which can be used to influence future of our country by the manner in which it offers its particular view of any subject without input

which might contrast with the strongly held views of the owners/managers of the entity. How many people are able to cut to the chase of a subject and make a subjective decision ??? A merger of this magnitude will not be in the best interest of the thinking people of this country.

Sincerely,

florence pauly

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I am already just a number to the current provider. Our bill goes up at least twice a year already. In our area the only cable provider we have is Comcast so there is absolutely no competition already. Rates are very high and our only other choice is no cable. When I call Comcast I have been on the phone for over an hour many times only to get crappy service. The only way to get a price break is to be a new customer, there is never a price break for loyalty. We have been considering going to internet service only due to the high price and then streaming video. Since we are considered to be seniors by many it would help us to have more reasonable rates as we near retirement. If you completely eliminate competition this will never get better!!!

Sincerely,

Cynthia Smith

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I quit subscribing to Time Warner Cable due to inadequate performance, poor signal reception, unreliable signal availability and extremely poor customer service. I understand that Comcast Cable provides much the same substandard service. I believe it would not be in the public's best interest to allow the two largest cable companies to merge. A merger would greatly reduce competition and provide no incentive to improve cable service in any deficient area. I would not have any objections if these companies could provide service close to what Dish Network or Direct TV provides. Why would anyone consider rewarding Comcast or Time Warner for providing substandard services.

Sincerely,

Milton Adams

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The bigger a company gets the less important the individual customer becomes. We as customers deserve more options as part of the free market not less. Comcast/Time Warner does not have the customers' best interest in mind only their own. Rates will not be regulated by the normal supply & demand. This entity will be big enough to demand any rate they desire.

Sincerely,

Karen McCain

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

One of the reasons why I no longer have cable or watch TV is because I was a customer of one of these companies. They offered poor service and channel selection and continued to raise the price for this poor service. Now, they want to merge so they can continue to offer bad service? Please, don't allow this to happen.

Sincerely,

Helen Jones

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

More competition is better than less. Big Corporations are less likely to respond to consumer complaints, likes and dislikes on programing. The bigger they are the more they dictate and force the kind of programing we would not want to see. The choices for consumers are less likely to be considered.

Sincerely,

Gilbert Baus

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As Cable companies merge the consumer gets less and less choice in what is chosen to be broadcast. I believe strongly in responsible freedom of choice and this merger means less freedom of choice and higher bills.

It also means that two companies who have the worst customer service ratings will be controlling what people have available to watch with no regard for customer desires.

Because of strong finances they will be in a position to push out/buy out smaller companies - again - taking control - creating a monopoly - which will dictate prices as well as what programs are aired.

In my area there is only one choice for cable. This is why I don't subscribe. If I had choices that aired programs I feel good about watching - I would subscribe.

Cable companies are dominating areas and pricing as well as what they air.

This merger is not going to serve the public interest.

Sincerely,

Julie Reeves

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

To whom it concerns,

I realize you may have one of the most difficult jobs in government. I hope you in turn appreciate the difficulty of my job as a citizen, trying to connect with another citizen like my self, cloistered somewhere out there that can make decisions I have to live with but can't discuss with you before hand. Such a helpless feeling I'm sure you can appreciate. You are the gate keeper working on my behalf to keep the honest, honest and the greedy from lining their pockets with our money as they hatch plan after plan to eliminate their completion. The greed and the lifestyle it brings to so few is incomprehensible, untouchable in my later years, yet on it goes, held in check by those few tasked with keeping you (maybe, I don't have a clue what your bottom line is) and I. I can't afford a tune up or a set of tires for what they drive, let alone the clothes their lawyers wear while planning their schemes.

I ask you to take charge in your capacity as gate keeper and say no to all their fancy, hidden plans to limit choice. Whoever you are we are counting on you, desperately counting on you. We all feel the ever slight change compromising our basic rights and you are at one of the gates regulating those rights so for the sake of all, do not let their merger schemes through. All our names and hearts are with you. Don't look at the gate, look at us as you go to work or play and gain strength from us all and say no merger on my watch. One less house, one less Ferrari or plane won't hurt any of the greedy. No merger,

you'll sleep better, no merger and you'll feel the collective sigh, no merger and we might get a nudge toward being debt free in the life time of the next baby born. As heart felt as I can be man, balls in your court, make it count.

Just a guy watching the darkening sky as you go to work. Good luck..

Sincerely,

Scott Walker

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We are already paying over a hundred dollars for internet and Phone Service, With this merger it could very easily double because there will be no competition and no controls for the people. Programs that we used to watch that had little or no language have now become more violent and filled with constant sexual situations and I can see it getting much worst. I would cancel Comcast but I need it for my business. Also I doubt Comcast would let me cancel and with the merger it would become impossible to cancel my service.

Sincerely,

Don Jury

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There needs to be competition and choice to the public. I, as a consumer like to have choice in the market place period. If I don't like one company I have another place to go.....I think most people feel that way even if they don't know how to articulate it....

Sincerely,

jeanette russell

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

To whom it may concern at the FCC

I do not believe it is in the best interest

of cable TV customers or satellite for that matter

to allow Comcast and Time Warner to merge.

I strongly feel that it will eliminate choice

raise cable prices eliminate programming

because the cable companies of Time Warner and Comcast

will either charge more for the shows or threatened to

drop shows altogether. And I seem to remember

back in the old days that government was against monopolies.

I strongly encourage the FCC to hold to that standard.

It is better for price and competition to have the two cable companies stay separate. Now one of the reasons I bring this up is to suggest that if Comcast and Time Warner merged now at some point other cable companies will either merge or go out of business thereby eliminating choice and raising prices thereby eliminating the ability for people especially fixed income to get what they enjoy and need for information purposes so to sum up I encourage the FCC in the strongest possible terms to not allow this monopoly and stick to your principles that you stated in the past thank you for your cooperation

Sincerely,

Bryce Mastro

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it reduces competition for my services. It creates a virtual monopoly for cable TV services and allows the combined provider to dictate pricing and service levels along with ignoring what it's customers want/need. I live in an area where the state limits internet competition and we have extremely high prices for the service we receive compared to states that have more competition. The lack of competition promotes complacency in the service provider and a "I can do what I want with no consequences" mind set. Rather than destroying competition through mergers, we should be promoting competition by creating laws that encourage new providers.

The FCC as an arm of the Federal Government should be more concerned with the impact on the citizenry than the benefit of a corporation, which in reality is a non-entity. Without a citizenry there would be no FCC or Comcast, Time Warner.

Sincerely,

Brian Marcov

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It would make a too large monopoly which would not pay any attention to its consumers. Neither pay any attention to it subscribers now. They support the left political agenda and provides no balanced opinion from the right. They would control the programing agenda and prevent any opposing views. When has 6 to 1 ever been considered fair and balanced. Millions of people have made requests of these two companies and have been laughed at. Just listen to the man who tried to cancel his subscription to Comcast. This behavior will only multiply when both join due to their enormous arrogance.

Sincerely,

Patricia Seeland

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I know of no merger of cable companies this size (or any size) that have ever resulted in not only lower prices but better customer service. How can the lack of competition by this merger possibly lower the cost to customers or improve customer service? On the basis of those two items alone I oppose this merger. This is not in the best interest of the public. I gave up my cable service and went back to over the air television because things just kept getting too expensive with cable service and the selection on the service diminished over the years.

Sincerely,

Brian Nelson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Customer service is at the fore front of what any great service provider depends on for a healthy business to succeed in America today. Unfortunately today service providers in the Telecommunication industry have opted out of the customer service portion of the service that they provide in favor of contracts that cannot be broken and strong arm tactics to keep consumers hooked on services that may not be in the consumers best interest. Competition is good for all consumers all the time and should not be diminished in any way shape or form. Now pertaining to the Cable Industry and Internet Providers, consolidation is not in the public's best interest nor will it ever be; as explained in the previous reference. I am opposed to the Proceeding Number 14-57: Applications of Comcast Corporation and Time Warner Cable Inc. for Consent to Assign or Transfer Control of Licenses and Applications.

Respectfully

Brandon Butts

Sincerely,

Brandon Butts

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This situation has the appearance of impropriety when the Comcast CEO experiences the largess of the White House (and probably many in Congress). This political currency exchange is not unique to Comcast but what is unique is the role that media can (and does) play in manipulating the public. As Comcast trends toward a 'largest single provider' media entity the political currency it wields will grow in proportion to its ability to manipulate the public as well as experiencing accelerated growth...a simple reinforcing loop that is all too prevalent in the corridors of power...to the point where it will be fully embraced by the political class as "too big to fail" regardless of its performance.

The role of the FCC is to protect the public, look out for our best interest by allowing new players to emerge as providers of content and delivery. Comcast has shown that it is driven by the political currency of the day by refusing to allow new content providers access to market if they are perceived as conservative in nature while steadfastly providing content originating from sources that want to harm the public; specifically denial to The Blaze while embracing the voice of radical Islam in the form of Al Jazeera. Why not let the two content providers have equal access and see which is profitable and which isn't?

While the merger is not illegal is it really in the best interest of the country. A better use of FCC time would be spent as true watch dogs of the national media interest, sniffing out the political currency flowing through its pervue, chasing it to ground, and eradicating it.

Sincerely,

Brian Willis

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The customer service for both of these companies is not good. If allowed to merge, there will be this merged company, and AT&T who also has bad customer service. I fired all 3 of these companies for experiencing bad customer service. This would close the cable market to a great number of people. We need more cable companies to make better competition for customers, not fewer. If 10 cable companies were allowed to operate in the same area, customer service would improve greatly, prices would fall sharply, and services would likely be expanded. The competitor who would leave you on hold for an hour would quickly go out of business because of the other 9 who wouldn't.

Sincerely,

Ray Ihnot

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I think allowing comcast to merge with time warner is a bad idea. I believe it will increase the cost because there will be less competition and it will hurt innovation with comcast taking more than 25% of all cable subscribers. They will have too much control on what is on their cable tv and could control a lot of access to the internet.

Sincerely,

Larry Torick

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe this proposed merger will limit service, choose and negatively impact the competitive pricing.

There should be more diversification in our choices, and more points of view presented, not less. The media is already controlled by too few, there is already a monopoly of ownership which controls what news/spin is parroted from one news station to the next.

I would appreciate the opportunity to have The Blaze included in the choices offered by the networks. I seems apparent that the demand is there for The Blaze but prejudice against this company is caused that it be blocked from being allowed to air on these networks. This should be a consumers choice if the demand it there (which it clearly is), not a networks choice based on political bias.

Sincerely,

Bart Kotter

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Competition will be stifled, at best, with the merger of two major cable conglomerates. The merger would more easily allow this new bigger giant to squeeze smaller companies and make it virtually impossible for new start-ups to enter the market.

Sincerely,

Gerald L. Cormier

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Broadband is an important public utility. It is easy to make jokes about the access to forty channels of sport or what ever topic you don't value. But broadcast TV never did provide good reception. The engine of democracy runs on open access to information. Having such a large concentration, created by the merger of Comcast and Warner Cable, is not in the public interest.

Sincerely,

Billie Grey

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The quality of service we as customer gear is less than wonderful. The providers keep giving us less and keep charging more. I am on a fixed income. I had to cut back on the stations they provided in order to keep on subscribing. I do not see why groups like LOGO who provide services for 1.6% of the population are allowed access and groups like The BLAZE who serve 50% of the population are not allowed access. This is wrong and allowing these two companies to merge will continue to this line of special services to minority specialty groups.

Sincerely,

Michael Hursh

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I just experienced the worst customer service with Time Warner and was forced to cancel my cable. The cost has also become way out of control and simply not affordable. The merger is only going to magnify all of these problems even more and should not happen until it gets a better business plan that doesn't monopolize over how the public can use cable services.

Sincerely,

Stacey Hernandez

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Too powerful, eliminates variety of communication. Lack of competition will drive prices higher, same watered down media information coming from 2 agenda driven large organizations. Powerful organizations moving toward a single monopoly of media control, this is dangerous to the overall health of the country to be to have a multitude of organizations for proper balance.

Sincerely,

Scott Saxton

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast has a very bad customer service reputation, making the company larger would only exacerbate that issue. I know a lot of people that either have or had Comcast, including myself at a different house, that feel that way. I also know a lot of people in Ohio that have Time Warner that are very unhappy about the merger. Some have already switched to satellite service in anticipation of the merger. Comcast already owns a television network which should alert everyone to a problem of censorship caused by an eventual monopoly.

Sincerely,

Rita Still

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Just like 30 years ago when AT&T ruled the telephone industry, this too will be a monopoly on a grand scale. I don't even have cable because of the choices I don't have in viewing enjoyment but for those who do have cable, this will be to their detriment. One company will make the decisions as to which programs the masses will be subject to and in light of what is being portrayed currently, the quality of programming rivals that of the porn industry with few exceptions, such as the History Channel or Discovery. But why be forced to pay exorbitant prices for only a handful of decent channels? Subscribers will find they will be paying more when the competition is eliminated with the merger.

H. Schippers

Sincerely,

Hans Schippers

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Less choice is bad for the consumer. Especially when the customer service is already bad. Many times when I call about outages, I am automatically told at crews are already working on an outage in my area. But after I explain what the problem is, I am told they didn't know about the problem and will get someone to work on it. It's frustrating that it seems like they just want me off the phone so they don't have to deal with me instead of listening to what my problem is.

Sincerely,

Robert Henriques

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We used to have Comcast and so did my Daughter but we left because they did not service their Cable users in a friendly, timely, or costly manner.

They have very rude practices.

I am against this merger which would make Comcast larger and less controlled.

Sincerely,

Nancy Lapham

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

You are quickly building a conglomerate which will only hurt the public.. It's amazing that when ATT & T, Ohio Bell, Ameritech wanted to merge the Government stepped in and stopped it because it was not in the best interest and would cause higher rates and less service without competition. And yet, here we are 20 years later and you are considering doing the exact same thing which will cause higher rates, less service and no competition. I am so totally opposed to this merger it is NOT in the best interest of the public at all and should NOT be considered.

Sincerely,

Sally Botson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have a disabled middle aged daughter who lives with us. She relies on cable internet and we were leaving for an extended period when the whole cable failed. I spoke with 9 separate customers service personnel at TWC over 3 days who had different opinions about what the problem was....all within the house. I explained that we lost TV as well as internet and that a repair person was working on the cable box the day we lost it. They then said they would send someone out, but he never came because customer service gave him my cellphone with one number reversed. Since he couldn't contact me, he just quit for the day never calling back in to anyone managing my case. That is where an organization is too big to hold anyone accountable and it would just get worse.

Sincerely,

Garry Meldrum

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This deal combines the two biggest U.S. cable providers. If the merger is approved, Comcast would control more than half of American cable subscribers. The mega-merger represents a "quasi-monopoly" and customers will ultimately pay for it as lack of competition could lead to higher prices. Without competition, service and quality deteriorates. Capitalism or the American Way enables all to provide and compete for quality products. Having more information and viewpoints available would create better, thoughtful analysis and much better service.

The largest US cable provider, Comcast, "won" Consumerist's annual poll as the worst company in America. We don't want to expand the business of a "bad" company that currently provides poor services.

Currently, the public is not getting unbiased information or both sides of the story from either Comcast or Time Warner. Merging these huge companies will create a monopoly. This will create a one-sided viewpoint of the information that is reported. As citizens of the United States, we are legally entitled to be exposed to all sides of every issue, so that we can decide for ourselves who we believe and what we think is "right" for our country. In fact the founders planned on a well-educated public to enforce good government and to keep our leadership honest. With this merger, the public will not be knowledgeable enough to provide sound judgment from the limited information that they will receive. Because of their

controlled bias, many American people today are not knowledgeable about issues, so they are unable to select and vote for sound leadership and uphold the constitution.

The US government should definitely not merge any big communication companies, like Comcast Corporation and Time Warner Cable Inc. The FCC should promote access to all information, not control what the public will hear. The FCC should facilitate liberty through an educated public.

Sincerely,

Fred Schow

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/TimeWarner merger is in the interest of the public because it will make a large corporation even larger. The Larger corporations get the less responsive they are to the public needs and wants. Look what's happening at the Federal Government. The more government we have the less responsive they are to the Constitution and the public. As it is now the media only serve Liberals ,ie CBS,NBC ,ABC,CNN. The majority of the country need media corporations which will show all facets of life and news. On the stations above ypu get one view only. This merger is not in the best interests of this country.

Sincerely,

Pat Rork

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We switched to Direct TV a few years ago from Time Warnerndue to the poor service. How in the world could it possibly be in the interest of the average American if the two of the companies with the worst service merge? Competition is the only thing that can either make them improve or they will fail to exist.

Sincerely,

David Sweer

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger will further stifle innovation and will increase the number of people held captive by an ever-diminishing number of companies providing viewing options. Reagan broke up Ma Bell and just look and what has happened to telecommunications since! Unimaginable innovation. Why do we want to move toward a monopoly? We will have to continue to pay for 100-plus channels when we only watch a few. Please kill this merger – and increase the opportunity for more competitors to enter the industry.

Sincerely,

J Tunnessen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

we need more competition and not less. I do not want any government intervention in what I watch on TV and I believe Time Warner and Comcast have an agenda that is not mine. Also, some of the shows I have requested, as Glenn Beck's The Blaze has not been added. I also have Dish Network and they carry the shows I want. However, I am forced to have comcast for some of my rooms. This merger will continue to show trash, low morals, foul language and borderline porn in prime time against American values. When I can have Dish in my whole home I will. I hope the FCC does not permit this merger!!!

Sincerely,

Stephanie Hart

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It eliminates competition, and competition is in the public's best interest. Why? because competitor business's lower prices to get business. A merger of two large corporations monopolizes the particular industry (in this case cable) and can raise prices at will leaving the customer no choice but to have no cable. Additionally, the calculated control of information is done for power and control over an unsuspecting public who are fed propaganda, lies and deceit to further political agendas which this Country has had enough from the Left, Progressive, Socialist elitists. If you can't deal in honesty and truth, you are not for the public interest but are self serving and thus an enemy to the public.

Sincerely,

David Simeoli

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast and Time Warner are too large already. They dictate development of content, by their size. Independent and marginal programming will have no place in the market place. As large as the number of channels available is, we should have a huge variety of choices, rather than the constant duplication, of the same thing over and over.

Sincerely,

James Shearman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As with so many of other recent large corp mergers in a limited supplier market, consumers experience higher prices and reduced selection. Package deals are the only option and non-mainstream programming becomes harder and more expensive to find, as the larger companies have very limited competition and less desire to serve the wishes of the minority consumer. Their profits are about expanding volume as quickly as possible with mainstream choices. Also, as these companies grow, efficiencies are inhibited, resulting in poorer customer service (e.g. they cannot man phones for person-to-person service and automate or outsource their customer service). All of these problems result in poorer service for the customer. Competition keeps the market driving toward better service, not worse.

Sincerely,

John Fleming

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The Comcast/Time Warner Cable merger isn't in the public interest. More options for cable service rather than fewer options are needed to provide programming and services the public wants at prices that are more reasonable than today's prices. Although I don't currently live in the service area of Comcast or Time Warner, their merger will impact subscribers to all cable companies through the decisions made by such a large monopoly.

Sincerely,

Linda DeAngelis

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because it will cause far too much control over a large segment of the population. There needs to be more choice in cable providers. Also, Comcast is anti rural broadcasting which many urban viewers, including myself, enjoy.

Please consider this merger seriously and reject it! Thank you!

David Pfeiffer

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Prices for this service is already a burden on the average family that uses cable tv as their only source for news and entertainment. Predictably, if this merger happens, a monopoly is the ultimate end, and the cost WILL rise! In an already oppressive economy, this would be an added expense that families can ill afford.

Sincerely,

K Garrard

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it would limit customer choice even more than it is already, and it is already too limited. If the federal government is going to regulate the cable industry, the government should encourage the formation of more cable companies, not fewer. Diversity is good, right? And more cable companies means more regulators are needed, leading to increasing job opportunities.

Sincerely,

B K Jennings

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This would create an even bigger government controlled monopoly than already exists. Our programming is not controlled by the public, it is controlled by very large corporations with their best interests at the forefront of all of their decisions. Please listen to the people as we are the consumers and this is not in our best interest. When you get as large as Comcast and TW already are there is no chance for the independent networks to gain any footing therefore rendering them unviable.

Sincerely,

Margaret Strasheim

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As a Comcast customer I feel the contest is too big to provide the customer service I deserve. The programming packages are too large and don't fit my needs. As an example The Blaze TV has been trying to get channel representation on Comcast to no avail. It seems like Comcast is too busy expanding rather than creating a better product. I feel trapped because of the lack of choices. I vehemently oppose this merger.

Sincerely,

Chad D Ballard

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

First of all, I believe in competition. Comcast and Verizon are the only two major providers in my area. I would change to Verizon in a heartbeat if it were available for all three services in my area. Comcast has, by far, the rudest, most incompetent service representatives that I have EVER encountered, notwithstanding, that they are mostly located 10,000 miles from here and know somewhat sketchy English, to be kind. When I have a service problem, I am expected to "fix it myself". Why am I paying almost \$190 a month and fixing my own problems? If I want to switch out a box, I have to bring it to Comcast. I should charge them a service fee for all the time and inconvenience. If this merger is permitted to go through, the service will get worse due to absolutely NO competition.

Didn't ATT have to divest itself back in the 80s because they were deemed a "monopoly"? Well, if this is permitted by the FCC, this will be worse than that. I will cancel my service and never look back. I stopped reading newspapers over 5 years ago and never thought that that could ever happen. I am sick of being force-fed the crap that comes down the pike because somebody, somewhere, deemed it okay.

I am imploring the FCC to stop this merger in the interest of the general public.

Thank you for your time and consideration in this matter.

Sincerely,

Kile Widman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As the cable system is already regulated by the FCC there is limited opportunity varied points of view.  
The proposed merger of Comcast and Time Warner will limit the variety even more.

Please do not approve this merger.

Vince

Sincerely,

Vincent Newmwyer

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Cable TV bills are already high enough with all the taxes. Now you want to give two of the biggest providers permission to merge. Giving them even larger market share and influence over the how the FCC regulates them. I believe this lead to higher prices. So much for anti-trust.

Sincerely,

Don Norman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have had both providers at one time or another, and both had bad to worst customer service. Also, many times with both, the reception was poor for days and weeks at a time. Most times, you did not have a choice in your neighborhood, so you were stuck, like a monopoly. Competition is always good for business.

Sincerely,

Debra Cohen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This gives too much control over what is broadcast to subscribers. The cable companies can dictate and decide what programs they will broadcast to meet their corporate agendas and any political leaning their management may hold. Choice gives more people a chance to choose what they like to watch and choose the cable system that offers programming that meets individual interests.

Sincerely,

Tom Infanger

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This is another example of a monopoly as like the AT&T phone company break-up in the late 20th Century. This current proposal limits competition, access of other resources that want to establish competitive cable outlets and will concentrate access to Comcast/TWC which will control approximately 30% of the total market accessibility. Please do not limit competition, stop this proposed Comcast and Time Warner Cable merger. Thank you for addressing this very important issue.

Sincerely,

Douglas Kasai

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

These 2 companies already control too much of the market. They ignore the public when we ask for certain programming to be added to their lineup. They already charge too much and reducing competition always raises costs.

Sincerely,

Danny Hamerly

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

They have little interest in the public other than collecting their monthly dues. If they merge they will control the market and their concern for the public will dwindle to little or nothing.

Sincerely,

Ken Lindsey

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

when one of the main owners is playing golf with the president it is almost for certain that most of the channels offered through Comcast and money that I pay for my Comcast bill will in some way favor the president whose views and lack of interest in what is best for THIS country is the last thing on his mind.

Such a monopoly in this area does not allow companies to compete which would keep my cable bill lower.

Sincerely,

andrea iacono

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the govt. broke up the phone company because they were going to be too big. why can you let the cable company monopolize on customers this is not fair to the consumers. Washington needs to be fair to all the citizens not pick and choose who to punish and who to reward. the voters will eventually right the wrongs why create them in the first place.

Sincerely,

Mark Colton

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Whatever happened to our Anti-trust laws? I know big corporations have their high paid lobbyists to buy and fund any prostituting, whoring public officials, these day. But last I knew the Hatch Act was still in effect. So, do not allow only one or two huge strong arm conglomerates to own you, who are my employees. Remember who your 'real bosses' are! Let me refresh your entitled, and skewed memories: WE THE PEOPLE>>are your bosses. You need to follow all the regulations and not just use loopholes and change rules to stay in bed with the likes of Time Warner, Comcats, and/ or any other huge conglomerates who want to tell me and mine what to think and buy and vote. WE THE PEOPLE' are an awakening sleeping giant to be 'silent majorities' no more! So get yourselves upright again and stand tall whatever the cost. Then look in the mirror. Alaska grandma

Sincerely,

Sharon Turner

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

time warner over the last few years has raised their prices while removed channels and not replacing them. they will not allow me to pay my cable bill by credit card thru the mail hoping that i will subscribe to their internet service. they eliminated the local telephone contact, replacing it with a toll free number but we don't know where it goes to. they recently added the sec channel and list a channel for basic service but when you call to find out why its not available the toll-free number says i have to get an adapter at the local office. i go to the local office they say this office does not have the adaptors you will have to pay \$11 more a month to get the channel that everyone else is getting for free. they move the tv guide channel and a few others to hd which costs more so now we have no guide. maybe if comcast is the one taking over the service will improve but i'm afraid it will be time warner and the service and cost will worsen. thanks

Sincerely,

charles boone

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

of all the obvious reasons: it becomes another monopoly which is never in the public interest; customer service suffers even more whenever a corporation gets too big (spoken from much personal experience); the brass get big bonuses that the little people pay for through higher cable bills; and the decision makers in this scenario appear to disregard what customers think and want. I have asked Time Warner to add the Blaze to its cable lineup. I don't think I'm the only one that has made this request. Regardless, it has fallen on deaf ears. Yet they have Al Jazeera on their line up. This is my experience dealing with one cable company and not being able to get through to them. Imagine how much fun it will be when and if this merger takes place. I am not interested in having to deal with a giant cable company that is going to limit my choices even further. I am totally against this merger.

Sincerely,

Irene A DiChiro

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Serving the public interest means more choice, more competition and lower cable bills allowing the merger of Comcast Corporation and Time Warner Cable Inc. will mean little if any competition, resulting in less choice and higher costs. Please do not allow this merger.

Sincerely,

Elaine Fosness

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it gives customers fewer choices which means higher prices. Also, a larger cable company can mean fewer choices

of available channels based on the providers point of view. Competition lets the customer decide winners and losers.

Sincerely,

Kim Antol

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

In the past we have broken large companies up, such as AT&T(MA BELL). Why now do we want to make these large companies again? These large companies were broken up to provide more choices for the public and ensure cost were keep low with many choices. We are loosing are choices, and the price keeps going up. Service is terrible from these large companies. We just need to say No.....

Sincerely,

Clarence Hnanicek

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is becoming a monopoly which will become TOO BIG to be controlled. They restrict programming which is counter to their interests. Currently they will not let stations on their networks which people want (example: THE BLAZE NETWORK) but they will offer The Al Jazeera Network which is very controversial supporting Radical Nations with anti-American attitudes.

IN AMERICA WE NEED TO KEEP ALL NETWORKS FREE OF CENSORSHIP!!!

Sincerely,

Craig Larson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have had Comcast and I do not believe that they should be the biggest provider of cable. They do not provide the service that should come from a large company. They know they have you over a barrel and so they make you wait, and provide shoddy customer service. They are also dishonest when they say they will provide a service if they have enough requests for it, yet they will not supply The Blaze, even after thousands of requests.

I no longer have cable and I have gone another route. I am much happier than I was when paying for the overpriced Comcast. (I also do not have dish).

Competition provides better service and better prices.

Sincerely,

Gloria Morgan

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This is a big mistake. I know many elderly people whom now live in town that want to have RFD TV. If you allow this merger they will not have the choice. It is very ignorant to assume that just because someone lives in the city or the suburbs that they are not interested in Rural Television!!!! I lived in town for several yeas after my divorce. It was the only location I could find a place to rent. I am a country person and would/will be very upset if I did not have a choice. Shame on you for even considering giving a company a monopoly such as this!!!!

Even if we lived in our small town we would not be able to get cable if we lived on the wrong side of the highway. They don't want to spend the money to make it available. As I said, SHAME on you!!!

Sincerely,

Monica Langenheder

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

History has shown us that once one of these mega mergers occurs, other organizations immediately follow suit. We the People end up with fewer choices and higher rates. If Comcast and Time Warner merge their cable operations they will control 30% of the market. Direct TV and Dish and others won't allow one player to be so dominant and thus will look for merger partners themselves. This consolidation will not only raise the consumer's rates, as the merging companies try to recoup their cost of merger or outright purchase, but will also leave the consumer with fewer choices. I previously did business with Direct TV and I requested that they add an American Channel, The Blaze TV, to their line-up, but they weren't interested, but they were okay with having Al-Jazeera in their line-up. I looked at AT&T U-verse and asked them if they offered The Blaze TV or would consider offering it and the response was negative. This type of response is atypical of large entities. Allowing Time Warner and Comcast to merge would result in me the consumer paying more for cable/satellite service, receiving fewer choices, and providers being less responsive to their customers.

Sincerely,

Robert Wellston

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast's customer service is terrible. I'm already a customer of theirs not by choice but because they are the only high speed internet provider in my area! So much for more competition and no monopolies! If a service provider would start up in my area with speeds of over 5 megs a second I would change providers in a minute!

Why let these companies combine and take away more choices? Don't let Obama cronies do what they want because they donate and have large amounts of lobbyists!!

Thanks,

Tim Garner

Sincerely,

Timothy Garner

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It creates a monopoly and could cause prices to rise. Also it would control what the majority of subscribers could watch. These two cable companies do not have the best customer service records. I would like a cable company that allowed you choices and not just bundling their choices. I would also like a company with superior customer service with trustworthy service technicians. The best company ever is EPBFI (Electric Power Board Fiber Optics in Chattanooga, TN. They have great reception, speed, great customer service and qualified technicians that had good customer service skills. I Wish we had them in the area I live in now.

Sincerely,

Marti McIntosh

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

this proposed merger will decrease access - limiting consumer choice and putting more control of cable lineups in the hands of a very few. Additionally, it is never in the interest of the consumer when such large entities merge. Cable prices are already out of sight - increasing every time you open a bill, and this continues to happen while they refuse to carry programming expressly desired by their viewers.

I strongly oppose the Comcast/Time Warner merger because it is clearly NOT in the public interest

Sincerely,

Kim Lerch

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The Comcast/Time Warner Merger would create a monopolistic Leviathan that would severely limit price competition and give one provider too much influence over channel lineup and programming content. Competition would be reduced and with fewer providers to choose from, so there would be less incentive to listen to consumers. Further, even a community wanting to select an exclusive provider, there would be in the same position: fewer choices so less incentive to provide quality because there is no one around to outdo the other to get your business.

Sincerely,

John Sakony

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The merger would give too much controlling interest to one party and limit the possibility of fair and balanced reporting.

Sincerely,

Kristi Mattauch

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast does not care about their customers and even after a significant natural disaster, they proved ridiculous and uncaring in their billing practices.

We rented a home in Galveston Texas, for our son and 3 friends, as they were students at Texas A&M University Galveston. It sustained horrific damage that included 12 feet of water and a total loss of everything in the house. They sent bills to us for months, demanding that we owed them \$1,000.00 for the loss of a cable box.

They also complained in the letter, that they had sustained significant losses. Unbelievable, their complaining was to families of students that

had a TOTAL LOSS of everything in the house. After much negotiation they finally quit threatening to sue us. Comcast was another layer of stress,

for those who were trying to put their lives back together.

I believe the merger gives Comcast too much power over information disseminated through the internet.

Their mergers will do nothing to help the average citizen. It will only give Comcast more power to threaten little people,

over little things - like a cable box.

Do not allow the merger.

Sincerely,

Julie Skillern

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger is not in the public interest by decreasing competition and limiting choices. These companies need increased competition because of their horrible customer service record. Please do not vote to limit our choices even more and allow these companies to continue running rough shod over American consumers.

Thank you for your time.

Sincerely,

Mark Morris

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills.

I believe that businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent, competitive voices. The merger can only be approved if the FCC determines it's in the public interest. I don't believe that it is.

We need less government control, not more.

Sincerely,

Elizabeth Robinson

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Putting all one's eggs in one basket is bound to create a scrambled mess. Both of these companies are big enough to stand on their own, with their own producers and program inspirations. Too big leads to power rather than purpose (of communication of what needs to be heard and discussed). Did the public ask for this to take place ...? Or is it just "Bigger must mean Better...so pile on the dollars just because we can??

Sincerely,

Lori Hechtman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't like spending my hard-earned dollars with corporations that DO NOT LISTEN to the choices I have been asking for MONTHS to receive. I do not understand why TWC has told me repeatedly when I call CRS agents that they are "not sure" if they will ever carry "The Blaze" or not. "But at this time, the plan is not to do so". I know I AM NOT ALONE in my desire to see Time Warner Cable carry this high-quality network. They carry Al Jazeera. They carry TMZ, MTV, and C-SPAN. They carry unlimited porn if you want it, which we don't. But I can't get a network that exposes the truth, and more importantly GOOD NEWS from time to time, and also the truth about what is happening in our government. WHY?!?!?! I want to see The Blaze, as do millions of other private subscribers, as the reputable, honest network that it is. YES! I am willing to pay a premium to have the Blaze carried as well; I know full well they are selective on their advertising content and do NOT put PROFIT before PRINCIPAL. You know what? I am okay with that. If I do NOT SEE the Blaze within 12 months, I will not stay with TWC if they merge with Comcast, as I am already frustrated with TWC. We watch such few channels, we will just go to total internet-subscriber based programming, but I WILL CHANGE COMPANIES> I am tired of voices like mine being ignored by the decision makers. The reps on the phones are always polite at TWC, but they seem to take a "clueless" approach as to what networks are broadcast or how that is decided. PLEASE LISTEN TO YOUR CUSTOMERS AND GET THE BLAZE!! Thank you, Liz and Scott Gray

Sincerely,

Liz Gray

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It will further restrict our choices. We live in a building that currently has a contract with Time Warner cable. We have found that dealing with this company is very difficult. It's not so much the people that work for them as individuals but, the operation I believe this is due to the way they contract small monopolies on communities and they know that we have no other choice but to use there service. Please consider this when making your decision.

Thank you

The Yancey's

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As it is already these companies do not care what the consumer want, and if a consumer complains then they are just ignored, after all what is just one consumer when they have thousands. The cable companies already have duplicate channels for their programming, and most of these that come even with the basic packages are not channels I am interested in anyway. They few channels that "I" am interested in, I have to purchase upgrades packages for just a few channels, after all I am mostly interested in about 15 or so channels. So, for these two companies to merger and have that much say in channels that is not in my interests is not a good thing for the whole. This also hurts smaller companies ability to compete in the market which would improve customer relations, and quality of the products/services. Thank you for your time.

Sincerely,

John Qualls

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It will have too much control and monopolize the industry. It would crush competition and dictate to consumers that it ( TWC/Comcast ) would cost them more. It would literally be able to do anything it would want to do to by controlling OVER ONE THIRD the cable and satellite market. It is not in the public's best interest. Deny the proceeding of this, it is the only just solution. But really the solution would be to free up the regulations giving areas of operation to to specific interests where as only one type of provider is allowed to be in certain areas.

DENY IT	DENY IT	DENY IT	DENY IT	DENY IT	DENY IT	DENY
IT	DENY IT	DENY IT

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We do not want the merge of Comcast and Time Warner as they will have too much control over the majority of TV watchers. They will be free to increase their prices and what they will show on their channels.

Sincerely,

Diana Yoshioka

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it's too much control of the air waves by one company which leads to all kinds of problems which the FCC should know best.

Did I hear on the news that one or both of there companies had a huge party for someone at the FCC or on a FCC board who will be deciding this issue! That is the worst if true! How can we even trust this (and many other) governmental agencies if so. Wow.

Sincerely,

P Wallace

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This just stinks to high heaven we have little competition as it is and are paying through the nose for something that should be free as it always was with analogue tv cable was free in NYC with no commercials for a long time we were told on Staten Island we had to pay for cable because it was Commercial free, but then they started putting Commercials more and more businesses with their Commercials should be footing the bill 100% for cable tv since it is no longer Commercial free how about going after that FCC cable here is now higher than my electric bill ? in fact almost double and I don't even have the best package it would be triple my electric bill for that ? I'm paying over \$200 a month for old programming that was always free what crap HEEEEEEEEEEELP !!!

Sincerely,

Pete Grewe

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the merger of the two largest cable providers is a direct assault of millions of consumers. Comcast is my provider and the service is unacceptable. On top of poor service, there are constant price increases. When one calls for a problem, billing or a technical issue, the reps simply don't care. I have heard that Time Warner is no better than Comcast. Instead of even considering this merger, the FCC should be working toward allowing competition in the markets. We are held captive by only allowing one provider in a market. The only other alternative is to go with Direct TV or Dish.

Sincerely,

Carol Patterson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We can hardly afford what we have .... Now, you want to allow these two companies to merge? Why don't you think of the people who watch and pay for the ability to enjoy more choices; we need to keep an open market for educational, entertainment, medical, political, and open news releases.

You would be giving Comcast too much control; they can hardly keep up with their maintenance and customer service projects now. How much is too much? Monopolies do not give freedom; they take and then, take some more!

Did you forget that we do not live in a Socialist society! Nor do we want that to happen with your making Socialist decision. We will be watching you to see if you keep our freedom to choose.

Sincerely,

Molly A Kelly

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it puts too much power in the hands of a single carrier.

This power does not serve the public interest and dangerously interferes with the principles of free enterprise and the limitation of

monopolies in the communication industry. There needs to be competition with the flow of information on order to maintain a balance of

services for the public welfare. This merger dangerously interferes with the exercise of the anti-monopoly laws that protects the public interest

in a democratic society.

Please do not allow this merger to occur.

I personally believe that it is a dangerous attempt to control public information, public opinion and the freedom of "the press" which ensures the exercise of freedom of information.

Sincerely,

Maria DiDonato

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I love some of the wonderful broadcasting on Time Warner Cable. Don't use your wealth to squash the voices of the Americans who SPEAK THE TRUTH when other media COVERS up the Truth.

I don't like what I get on Comcast TV except for EWTN, WHYY, arts, educational programs and some of the older program broadcasts. Your programming and news is all about DEATH, VIOLENCE, ADDICTIONS, and SEX. STOP!!! Don't you see what you are engraining into the minds of people! YOU ARE RESPONSIBLE for promoting these evil lifestyles and then you wallow in picking a few to follow and embellish the legal agony step by step. How would you like this to be turned against you if they find your dealings are not proper, or if you are being wrongly charged, and why commercialize people who live out the violence and evils as shown in your daily programming! STOP! and don't force yourselves on the other programming broadcasts which give us the opportunity to speak the truth, unfiltered, and not glamorized.

Please don't do this merger?

May the Power of God strengthen us all.

Thank you.

Sincerely,

Tr B

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

in a society that preaches diversity and competition, we are now fostering monopolies like this one. My bill is creeping higher and higher and I do not have the Cadillac version. I cannot get Verizon FIOS because it's not available in my area. I have no alternative and now a bigger conglomerate is looming if these two merge. What happened to competition and competitive pricing? I do not support this merger! Many of my friends don't either. What we need is more, not fewer, providers so people like me on fixed income can get a better, cheaper delivery system. Even the phone situation is getting out of hand.

Sincerely,

Beverly Harrington

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Having one company control almost 30% of the market is not good for the consumer because it no longer will provide my residence with more than one option for cable. Also it resembles crony capitalism, which is just stupid.

AND I WANT THE BLAZE!

-Elizabeth Conway

Sincerely,

Elizabeth Conway

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

My service has been terrible. I am always losing my signal. Shows are not being taped when a series has been set to record. Periodically, I have to call TWC. They come out and it is never completely fixed! Most of all, they don't let us get the shows we want like The Blaze!

Sincerely,

Christy Ahern

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it would create a monopoly and rates would rise and they would have too much power as a company. Merger's like these actual hurt the market and make it harder to find better choices for you television provider. I would be appalled if this merger was allowed and made a company that is already grossing more than most other providers richer off the backs of geographical customers that can only get one service

Sincerely,

Ryne mlinar

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

this merger will almost totally eliminate any competition in the large cable provider industry. Competition is the driving force of our economy being sound, accountable, and responsive to its customers. If this merger is allowed to go through the consumer will be the loser! Already Comcast is lacking in adequate customer service. They are not responsive to what the consumer wants as far as cable channels and group vs. individual channel purchasing. I think it is a long term mistake for the consumer and the economy for these two companies to merge.

Sincerely,

Jennie Stockard

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger will limit competition which in turn will cause high prices. In my area right now I only have Comcast. Verizon will soon be available, besides that, that is all the competition we have. Also, Comcast customer service in my experience is very poor and a merger will not help due to the fact they don't really care if you leave or stay because they are the only cable company available in most areas.

Please think hard and long before making this decision that will affect many cable subscribers.

Sincerely,

David Fernandez

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast already has a monopoly in several states. Comcast is notorious for its horrible service and tactics to undercut many customers out of their money, leave them with bad service, and throttle their internet connections. Merging with Time Warner will give consumers even less of a choice in their internet provider. I believe that the consumer should be free to make their own choice, and not be stuck with such an underhanded corporation. This merger will prevent that choice. This is why I greatly oppose it and believe it is not in the public interest.

Sincerely,

John-Cuuz Garcia

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because too much control on media restricts American's choices of content and service. Cable, phone and internet utilities are unique in that Americans are extremely limited in what options are available to them. It is a rare case that even two options for cable suppliers are available to a residence whether you own your property or not. At most this leaves a residence with one hard-wired utility provider and maybe one satellite service provider of the residence has the option of installing a dish receiver on their property. Restricting this merger may not increase the the options at a particular residence, but allowing 30% of the market to be controlled by a specific provider does not appear to serve the public interest which already suffers from lack of choice in cable service providers.

Sincerely,

Christopher Kohr

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

My experience has been that "customer service" is virtually non-existent at Comcast. Just recently Comcast failed to adjust monthly charges when there was a significant break in our service -- we were without phone and internet for over three days in early July -- and despite assurances that our bill would be adjusted when we called repeatedly during that time to check on the outage, nothing was ever done. In fact their remote tech service person convinced my husband that our Comcast equipment was so old it was no longer supported and talked him into requesting shipment of updated equipment. Of course, service was restored long before it arrived so apparently that was not the problem. The only problem was ours-- higher equipment fees and no adjustment for lapse in service. And when I called to complain and try to talk about our billing complaint, I was told that they could only speak to my husband.

I think expansion of the Comcast business model is definitely NOT IN THE PUBLIC INTEREST!

Sincerely,

Celeste Kendall

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The service is already very expensive and I can't get all the channels already offered on other providers. Please don't create another MONOPOLY. They will just demand more money for poor service. And I can't handle any more inflation.

Sincerely,

Nancy Ferguson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The free market protects our freedom of choice. Giving Comcast a monopoly will only cause higher prices and poor service without any other choices for customers. Competition forces a company to work hard and provide value to its customers or they go out of business.

Sincerely,

Rocco Gilio

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because the merger limits choice. I have a local service provider in the area. I have been to their office and looked through their channel line up. I requested the Blaze as an option. They did nothing. Why? Because the company of whom they are a subsidiary doesn't offer the Blaze as an option. So by combining, merging large companies together it limits choice. Wonder why a news org. like the Blaze having 15 million viewers can't get a large company to offer the option for a popular news company. I think the decision is political. The large company does not want the values represented by the Blaze to be herd by America. The large company does not think free speech has value. The large company thinks they are smarter than the American populace. We'll decide what has value...not an executive whose main value is money and power. The Comcast/ Warner is unAmerican because it limits free speech. Don't allow the merger.

Sincerely,

Robert Wilkins

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Both of these companies are HORRIBLE to their customers and engage in deceptive advertising, horrible customer service, and price gouging. They are both already monopolies in many areas. Customers deserve better than to have these two behemoths merge and gang up on the some more. I've been a Time Warner customer for over 20 years and they have gotten worse and worse. They know they are the only game in town and take advantage. They do not provide the internet speeds that are promised and do nothing to resolve problems. They even try to bill the customer for THEIR lack of bandwidth and infrastructure and attempt to charge the customer for the service call!

Please do NOT let this merger do through. Less competition or even the threat of it will make it even worse!

Sincerely,

Laurie Werneburg

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is better for consumers when there is competition. It is absolutely obscene to merge two of the biggest - that would create a monopoly!!!

Sincerely,

Jean Goncalves

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I already pay about \$175 per month for basic cable tv service and Internet and I don't get the channels that I have requested that provide a conservative view point. With this merger, I will most likely pay more and have less choices. I also do not have any other options in my area to purchase this service from another company. This merger will give us less choices and comcast will have more monopoly and power to control what programming is offered to there subscribers.

I wish there were other cable companies that we could choose from not less. Comcastnis the only choice I have and that is not choice

Please do not let this merger proceed.

Thank you

Mike oppenheiser

Sincerely,

Michael Oppenheiser

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We have had Comcast during the winter months in Florida for three years. There have been numerous problems with TV, phone and internet. Signals are lost frequently. We have never had those problems with Direct TV (except during storms), U-Verse or Charter. Friends in Kansas City have problems with Time Warner.

Sincerely,

Patrice Curtis

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast already treats their customer very poorly. With no cable competition in our area we are left with either Comcast or nothing, and Comcast knows that very well. That's why their rates are so high and their customer service is so bad.

Making Comcast even larger while eliminating potential competition, will make things much worse for the consumer. Comcast talks about how many channels they provide, but they don't talk about all the duplication of programming. More and more channels, but less diversity of content.

Allowing Comcast to continue growing and abusing the public to an even greater measure is certainly not in the public interest!

Stopping Comcast is the only correct course in serving the public interest!

Sincerely,

John Haile

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

When you limit the competition in a market place that has be consolidating so dramatically, you are not serving the public interest. I believe in free enterprise and when you get down to just a few BIG hitters in the market, you are hurting the consumer and not allowing them to be getting the rewards ( lower rates and diversity of programing) that only a free market place can offer. Please make sure that huge comglomerates like

Comcast and Time Warner are no dominating the market. Let free enterprise and the diversity of players help keep better service and lower prices in the market place. Thanks for allowing my input on this application. Al Hockstra

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the companies are too involved with federal government interests and a company can best serve the public interests when it is less affiliated with the government allowing more smaller companies to exist and allowing the public more freedom of choice. I see no advantages to lumping them together in a single company merger except profits for them, it would be a loss for the public however.

Sincerely,

Chris Chaffin

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger would give Comcast sovereignty over the nation's telecommunications and media arena, creating a quasi monopoly that would allow them to set outrageous prices and ostensibly give us fewer choices for service. The merger would also give Comcast too much control over the Internet and communications infrastructure which would result in the restriction of diversity and open content.

Sincerely,

CHERYL BALLARD

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It absolutely does not serve in the best interest of the country or the subscribers of two of the biggest cable monopolies with the worst customer service records to let them merge and dictate what 20% of America can see on cable TV. This means less choice, less competition and higher cable bills.

Lastly, it's probably an illegal venture.

Sincerely,

JONES DAVID

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is the only cable provider available to me already. Satalite is not an option because I lease an apartment. In my experiences, I have found Comcast to be extremely difficult to work with and I don't feel the pricing structure is fair. If Comcast absorbs another cable provider, that will mean less competition for them, and thus less of a chance I'll ever have more options when it comes to my cable service.

Sincerely,

Benjamin Werner

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

bigger companies inevitably means less choice, less competition, higher prices, lower quality of service and a much less responsive staff of employees. In terms of sheer quality of service, bigger companies mean bigger problems when the consumer has problems with products or services; just take a look at the Federal Government and I can rest my case.

Comcast already has a reputation for poor customer service. I have been nothing but displeased with them and avoid having to deal with their customer service unless I have no other choice. Merging with Time Warner Cable will mean an even BIGGER company which will not benefit the consumer in any way. Smaller companies are more nimble, more responsive, more consumer-centric and a larger number of companies to choose from keeps prices down and drives quality up. The merger of two giant companies into an even larger giant company will not benefit anyone except for the corporation, the lobbyists they hire and the bureaucrats that get their pockets lined by lobbyists the giant companies employ.

IT IS NOT IN THE BEST INTEREST OF THE CONSUMER TO ALLOW THIS MERGER TO GO FORWARD!!!!

Respectfully,

Douglas James

Sincerely,

Douglas James

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I agree with the above statements. It never ceases to amaze me how it takes the people to band together and shout in protest to insist those who are our representatives do what is right and best for all of us and not allow a blind eye to what is clearly wrong to everyone else. Please honor the trust we have put in you to protect our interests.

Sincerely,

Verginia Pentinga

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As of now their customer support people are in India or some place other then the United States of America. Their prices keep going up and up for their pre-determined expansion of what they think I will like. I would really like to have buffet choices and pay for what we watch. Fox local new World news, Fox sports, Jeopardy, Wheel, Ch 20 am for Dr. David Jeremiah and Olsteen, the big channels for some sports only, We do not watch any of the immoral garbage of HBO, movies, main night situations.

We are at the point where we will buy the antennnas to watch free of charge or buy a box that enables us to do this.

The elimination of Fox and conservative news is the goal and the main purpose of this merger...we will be like a communist state.

Do not allow this meerger to destroy Freedom of Speech. So, I should be concerned about my freedoms by the statement below???

Sincerely,

judie howard

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

we saw what happened to the Savings and Loans, then the large banks, then the automobile industry ....  
TOO BIG TO FAIL. That was the roost used to justify the government takeover of these industries. These  
cable companies are headed in the same direction. The reason we have the monopoly laws is to protect  
citizens from this sort of behavior. Regulators are expected to do the right thing. Can you be counted on  
to do the right thing?

Sincerely,

Ken Meyer

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

THE BIG CABLE COMPANIES ARE GETTING TOO BIG SO WE WILL HAVE FEWER CHOICES IN THE FUTURE. COMCAST HAS ONE OF THE WORST CUSTOMER SERVICES WE USED TO HAVE IT. I HATE TO SEE A COMPANY OWN ONE THIRD OF AMERICA'S CABLE INTERESTS.

I STAND FOR AMERICAN RIGHTS AND VALUES....OUR FREEDOM OF CHOICE.....AND THEY, NOT ONLY, WOULD TAKE THIS AWAY, THEY WOULD DEVALUE US BY GIVING US THE WORST SERVICE OF ALL. CARRIERS.

ARE WE ALL NUMB OUT THERE??????? DID WE NOT LEARN BY WHAT HAS TRANSPIRED WITH OBAMA'S ACTIONS/NON-ACTIONS???????

ARE WE NOT LEARNING FROM THE PAST, EVEN THE NEAR PAST??????

COMCAST IS AWARE OF ALL THE NEWS THAT CERTAINLY CAN GEAR THEM UP TO BE THE BEST, YES, THE BEST CABLE SERVICE EVER! STIL, THEY ARE CHOOSING TO DISREGARD THE AMERICAN PUBLIC WHO ARE INFORMING THEM OF THE PROBLEMS AND WHAT THE NEEDS ARE.....SO I ASK WHO IS RUNNING THE SHOW????? AND YOUR ANSWER IS??????

ALL THE NEWS, CUSTOMER REVIEWS AND COMPLAINTS PROVE THAT THE SYSTEM NEEDS AN UPDATE, IF THEY REALLY CARE TO SHOW THAT THE CUSTOMER IS WHO THEY ARE SERVING!

Sincerely,

robert shrank

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As a long time customer of Comcast, I experienced many problems with its service. Getting the right person on the phone or satisfying my inquiry through the website is so difficult as to be maddening.

If it ends up with even more of a percentage of all subscribers, it will be even less responsive to its customers. And prices will soar.

There is no reason to allow what will equal for all practical purposes a monopoly in yet another service.

Please don't allow this to happen...and put smaller, high quality providers out of business. Please.

Sincerely,

Nancy Miller

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This country is based on competition and the best products will prevail. I left comcast because my rates kept increasing for no reason. I had no other options at the time. As soon as a verizon rep knocked on my door I switched. I received better service and more options at a lower rate. First it was adelphia. Comcast ate up adelphia and my running line was, "Comcast is the devil." My brother works for Comcast and that wasn't enough to bring me back to the dark side.

Sincerely,

Matthew Dunsmore

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The rates currently charged are substantially more than they need to be and program selection is dismal. Merging two companies as large as these, who are competitors in the marketplace would not be to the public's benefit unless one were a shareholder. This would be detrimental to the consuming public and would serve to diminish choice and diversity of programming.

The word Cartel comes to mind when one considers the combination of these two cable companies.

Sincerely,

Brad Neubert

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

People who pay for the right to use cable should be able to choose what stations they want to see, not the company. They are just a provider of a cable system, not what's on it.

If that's how you choose to run your company, people will use their right to change their company and pay for something they want to watch, not what you choose to show.

Sincerely,

Kathy Williams

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I want the truth and not what is sanctioned or watered down. This merger means less completion, more government influence and control.

Sincerely,

Joe Garrido

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The proposed merger between Comcast and Time Warner Cable would create a massive media conglomerate unlike anything we've seen before and lead to decreased competition and higher Internet and cable costs for tens of millions of Americans. It would also be a huge threat to the free and open nature of the Internet. The proposed merger is not in the public interest. I urge you to stop it from moving forward.

Sincerely,

Ina Levendoski

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast customer rates are already reaching the point that I can not afford the service. Even worse, they already have a monopoly in my area of Delaware.

Comcast And Time Warner joined together will further limit speech and news perspectives. One company will put a further stranglehold on opinions and news coverage, giving Comcast more power than ONE media company should deserves or should control. What the USA needs is MORE options not less. In the 1990's the federal government sued Microsoft because it was to big. In the 1980's, the phone companies were broken up by the government for the same reason. Why do we now want to go in the opposite direction? Because Comcast lobbies Congress, Brian Roberts plays golf with Obama, and Comcast already has so much cash flow that it can buy it's way to being a bigger giant. Not because it offers good customer service, or better value for it's customers.

No way should the FCC allow Comcast and Time Warner to merge.

Sincerely,

Carolyn LeQuear

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We have bundled comcast services because they are the only service providers in our area. if this were not so we would surely go with some other provider. Over an 11 year period we have experienced the worst customer service of any company at any time. My husband and I are in the 57-60 year age range and have owned businesses as well as had hundreds of experiences in several states with service related companies. We are appalled that Comcast sees fit to launch a literal monopoly of services, limiting our viewing choices as well as providing a substandard product and service. We will do all that we can to avoid giving them more money to misuse!

Sincerely,

Terri Grob

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

with the way they treat me now without the merger they will be unbearable after the merger. I have to sit and wait for them to answer the phone, take off work for them to come fix it, I don't see how owning so much of the market would benefit me a single mom struggling just to have basic local channels and the price has doubled since I first got it.

Sincerely,

Jennifer Cooney

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast already does not listen to the customer. They told me that they could provide cable service to me at my home location as well as their high speed internet. This was not true. It is impossible to find someone at this company who can tell you the truth about the service they can provide and getting anything changed once it is in place is almost impossible. Someone who provides such poor service should be investigated not given the opportunity to expand such hurt and waste of time and money to other people. Thank you for the opportunity to express my complaint.

Sincerely,

Sandra Foater

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because I feel there are not enough choices in cable provider options. In addition, I don't believe MOST of the current providers (I can speak personally for my current provider) are really concerned at all about what the customer wants in viewing options. I feel fed with what Bright House wants me to experience.

I also have a concern regarding the price of service. The cost of service is already ridiculous and it is hard to imagine it getting any better with less competition.

Thank you for your time and attention.

Respectfully,

Lori A. Hinzman

Sincerely,

Lori Hinzman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We won't have our pick of what we watch and we won't get the truth of what's going on in our government and our country. Our cable bills will skyrocket to the point that we will have to just drop cable all together. And the American people are already paying so much for taxes and high utilities bills so really do we need to have Comcast buying Time Warner Cable the 2 biggest cable monopolies with the power to silent independent, competitive voice for instance like the Blaze if it further their business interest and if they thing they can shut the smaller guys up so we the People won't here the truth. And I for one do not believe this is in the best interest of the public. Thank you Jerrie Butler

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have had time-warner service in the past and it was the worst service one could get. I changed to RCN and had great servic. I now have

Charter Communications. Charter should be in any merger deals.

I know the FCC is as corrupt as any Govt. under the present leadership so when the money is passed around to the FCC board members

from time warner/comstat the deal will surely go thru. Best to think of yourselves than serve the best interest of US bill payers. Hay, your

bribe money from tw/c has to come from somewhere so why not poor Joe schmo like me.

thanks for yout time , or I should say ny time as no one at the FCC will ever see this but it makes me feel berrer to vent.

Sincerely,

gary fossieck

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Supreme Court Justice Hugo Black, took this issue to task back in 1945. Unless your against this comcast time warner merger you are not an American citizen.

You didn't build that. The tax payers paid for the building of a system of fiber into every home. The story was ever home would have commercial free programming for 11 dollars a month. A lie.

Comcast slapping the infinity name on the product in an effort to slap enough lip stick on this pig to sell. Another lie.

This merger should be stopped. Interesting that the fox merger was stopped but this merger with Comcast is ok?

No wonder all use comcast for is internet so I can watch the glen beck network.

Shock me do the right thing....

Sincerely,

Rob Lynch

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe people should be given the ability to choose for themselves what they want to view. I do NOT believe it is the government's role to tell us what we will be able to view on TV.

Sincerely,

Alice Wigfield

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

if they should accomplish this goal,we,as Americans,will lose our exclusive rights to choice,leaving the decisions of broadcasting to those who care for nothing but their own political interests. Let the market dictate viewer choice, not the one-sided political indoctrination that has encroached upon our nation. You're job, should be to vigorously support the expression of free choice,not eliminate it Stop the Comcast /Time Warner merger!.

Sincerely,

Benda Barnum

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I am strongly against the Comcast/Time Warner Cable merger. The public interest represents a wide range of interests, views and values. It is important to me and my family to have choices to make when it comes to our viewing: having programs determined by a minority group is not part of our country's history and our preferences. Please continue to maintain quality service--hardly what the two largest monopolies currently provide--with the current variety of programming. NO TO THE MERGER OF COMCAST/TIME WARNER CABLE.

Sincerely,

judy parsons

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

that is too large of a market segment for one company to hold. Cable rates are too high as is. Giving them that much power over people's viewing options is not a good idea. Those of us who just want select shows to watch have to pay a fortune to get them via cable packages because they are not online or paying for each online is even more expensive. We need to keep commerce competitive and no one company should have the ability to affect that amount of the market..

Sincerely,

Kimber MacGibbon

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I BELIEVE THAT THERE IS TOO MANY MONOPOLIES IN THIS COUNTRY ALREADY. MONOPOLIES SUCH AS THE AIRLINES AND THE TELEPHONE COMPANY IN THE PAST HAS ALWAYS CAUSED THE PRICES FOR THESE SERVICES TO INCREASE DUE TO LACK OF COMPETITION AND HAS PUSHED OUT THE SMALLER SIZE BUSINESS'S IN LOCAL AREAS. WHEN ONE BUSINESS SECTOR OF OUR ECONOMY GETS SO BIG WE WILL ALWAYS LOSE OUR CHOICE OF WHO TO DO BUSINESS WITH AND WILL LOSE THE FREEDOM OF THE CONTENT OF WHAT WE RECEIVE FROM THE SERVICE PROVIDER.

THIS PARTICULARLY APPLIES TO CABLE AND SATELLITE COMPANIES WHO ALREADY HAVE A MAJOR CONTROL OF WHAT WE ARE ABLE TO WATCH ON OUR TELEVISION SCREENS AND OTHER MEDIA AS IT IS. THE MERGER OF THESE TWO LARGE COMMUNICATION COMPANIES WOULD MAKE ALL OF THESE NEGATIVE RESULTS WORSE.

Sincerely,

Joseph Holladay

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There is already limited competition in the cable TV market in my area. To lessen competition further would be beyond detrimental to the consumers in the Tampa Bay Area! Rates would rise, regard for customer channel requests would diminish, and customer service would very likely suffer since many customers would have nowhere to go if they wanted to leave their cable provider's service in protest to poor service. I strongly urge you to NOT to approve the Comcast - Time Warner Cable merger on the basis of consumer harm.

Regards,

Gail Trask

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Competition breeds excellence in the real world as well as the football field. Letting two of the big boys merge will hurt competition, service and pricing. The decisions that let these two giants buy their competitors should be reexamined in this same obvious light. Has it helped service and pricing? I think not.

The consolidation of media is a grave threat to the Republic. It is conceivable that powerful interests could manipulate the presentation of media to lead the populus in a preselected direction. A free people have an obligation to learn from the lessons from the Communist and Nazi propaganda ministers. As the power of the central government has grown over our lifetimes, how "Free" will our descendants be 100 years from now? Despite the short term politics and commitments to the most powerful lobbyist, please do what is right for your great grandchildren. Preserve as much of the framework and capability of divergent thought as possible.

Please don't let this merger happen. In the same light, please resist similar business consolidation. Allowing big business to get bigger (within your legal power) hurts the remaining strengths of free enterprise. When the people see big business/government operations provide lousy, expensive products within the shrinking pie of real opportunity, it will be that much easier for government to get even bigger providing a solution. Again, please make this vote for your great grandchildren that may not

be in the ruling elite such as you. Make your vote for their opportunity to enjoy the level of liberty you grew up with. Give them a chance to.... perhaps start a competing cable service!

Sincerely,

Robert Foster

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I've heard a lot of bad things about comcast from people who live near the east coast. They are controlling and don't offer as much as dish.

I don't know why they don't offer the Blaze.

Sincerely,

Joan Gillespie

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

historically it has not been in the best interest of the consumer for there to be such a large supplier of goods or services. Cable TV rates are far too high now and allowing this merger/acquisition to occur will eventually result in even higher rates.

Sincerely,

Royce Freitag

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Within the past year I had the opportunity to assist my son with his TV provider; he lives in TN and has Comcast. We have Time Warner in Wilmington, NC. Based on my experience, I give Time Warner a B- and Comcast a D- in performance. Merging the two firms with Comcast in the driver seat is a very BAD idea. Consumers fair best when there is competition. I urge the FCC to reject this merger.

Sincerely,

Ed Spencer

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because they don't represent my interest. I believe that businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent, competitive voices like TheBlaze if it furthers their business interests. The merger can only be approved if the FCC determines it's in the public interest.

Sincerely,

Gina Cardella

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

1st, monopolies are against the law, and 2nd they're against public interest. Whether that monopoly exists in a single area or across the nation shouldn't matter. Granted there are other cable companies out there, but how many areas are going to suddenly become choice-less because two conglomerates become one? This is only in the interest of big business. Competition drives the market and provides choices for consumers. Taking those choices away isn't in anyone's best interests.

Sincerely,

Teri Sackett

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

These two companies have some of the worst customer service and merged together will dictate the market for 20% of the US consumers. We already have cable companies that decide which channels they will or will not carry, thus not responding to consumer needs in the markets they already have unfair competition in. For example, I have only 2 choices for cable in my area and they are both satellite providers. This merger will not save any costs for the consumer and it will set precedence for larger merger in the future which erode competition and consumer choice.

Thanks for reviewing these comments,

Donna Rassat

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I left Comcast because I felt they were too big to care about providing a quality service. They don't offer the content I was looking for and are not responsive to their customer's needs. If they merge with Time Warner, they will be even bigger and will have even less incentive to provide balanced choices. They would control way too much of what we can watch on tv and would be able to exert undue influence on networks and programming. This is BAD for consumers!

Sincerely,

Amanda Norris

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Monopolies = limited choice to the consumer and never is in the best interest of the people. That's just a no-brainer, isn't it. The more opportunity there is for entrepreneurs to enter the market place, offering better service at lower prices of course forces all service providers to maintain their quality of service at competitive prices. It's a win win for everyone.

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I feel like a pawn in their monopolies already. At least when they are in competition with each other, prices have to be competitive. If there is no real competition, prices will skyrocket. I can't believe what I'm paying for modern communications. Years ago I had one land line phone bill and TV was free. The better your antenna, the more channels you got. Adding TV, internet access, and phone bills together, I pay more for communication than I do for heat - - - and I live in a cold region of the US.

If I didn't work for a living, I'd probably get a free phone, low income housing and lots of other freebies. Don't make us workers bear any additional burden. We are already paying for more than our fair share.

Sincerely,

Linda Bacon

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

No one company, especially one with a poor record of providing service, should be able to control a 30% share of a market. They have shown that they have a one sided bias and that bias rejects the notion of a free market and limits the access of a wide variety of programs and opinions, as well as options. We need a free market not limits on the number of companies providing a certain product. Please reject the planned merger. Thanks, KM

Sincerely,

Kay Morris

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I was a Comcast subscriber before Verizon. Comcast cable was rude, hard to get service and when my contract was up was hard to cancel. I would never go back to Comcast again for whatever reason. If this merger is let go through they will only get harder to switch and get service. When I did switch to Verizon my bill was 30% less than with Comcast. DO NOT LET THIS HAPPEN!!!!

Sincerely,

Earl Rissel

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

FCC,

Already cable TV bills are way higher than they should be. Hence the reason we cannot afford to have it in our home. How would it help the consumer to form this monopoly? It wouldn't. This is a deal to benefit just Comcast & Time Warner. Think about all the little guy consumers out there, up against the big uninhibited company that would form. We already don't have much of a say as it is.

Sincerely,

Jamie Gilson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

allowing a merger between such large companies limits competition with smaller providers and means higher prices for consumers in all segments of the entertainment markets. Content providers will lose pricing advantages and will put the costs on the smaller cable or internet companies. Small communities will lose their choice between carriers and that will cause prices to rise. This is unfair competition on many levels and is a bad idea.

Sincerely,

Mark Wirtz

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

No! Don't approve this proposed merger! The proposed merger will create a huge company from two companies that have very poor consumer ratings. It doesn't make sense for you to ignore the consumers needs. Perhaps this is not technically a monopoly situation, however the proposed merger of TWC and Comcast is not in the consumers best interest.

Most sincerely yours,

Donna Nowland

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it stifles the consumer's ability to fair and reasonable pricing. It also merges two companies that are not known for fair programming choices. They have either eliminated choice or have given choices but charged a premium price for broadcasting content that some would deem as more conservative while including other content (non-conservative) in basic packages.

Our free enterprise economy depends on competition, and that competition not only helps to keep costs in check, it also challenges companies to do their best and strive to improve. This proposed merger would come against and deter both of these.

Sincerely,

Konya Ferrell

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

No cable company should be allowed to have its own kingdom where it is the only cable choice. Multiple phone companies use the same lines. Why can't cable companies share lines too? I am sick of paying hundreds of dollars a month for 500 channels that I don't want or watch. As for the merger, why should a company that isn't intelligent enough to drop channels that only have 18,000 viewers be allowed to buy up more territory. As for integrity, if you are so soulless and arrogant that you don't care how it looks playing golf with the president when lobbying for the merger, I guarantee you don't care about providing channels I want to see. Additionally, I have no faith in FCC commissioners that allow these companies to wine and dine them. The corruption is profound. The fact that most people don't care or even see a problem with it is heartbreaking.

How about doing something crazy, like the right thing for taxpayers for once.

Respectfully submitted,

Davonna Koebrick

Sincerely,

Davonna Koebrick

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The competition is becoming too narrow. This is the reason for our present anti-trust laws. Price, including no cost, and good customer service will weed out the incompetents. Who has the most buying power should not be the weightiest component in a free market. I understand that is a large part of the pie but monopolies are not given to considering what the market wants if they can manipulate the "game". I hated the breakup of Ma Bell but it set us on the path to today's choices in communication. Ldt the free market balance itself.

Sincerely,

Judy Csrdenas

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

A monopoly of the media is not in service of the public, for several reasons.

Pricing will have no competition, they can charge what they want when they

Want. Political views of the owners can skew what is carried in programming.

Actually since the FCC made it leaflets for companies to own as many radio, TV,

Cable as well as News Print as they prefer. Reporting has become skewed,

Competitive pricing has disappeared and customer service has been far from serving

The customer...more like serving the the company owners whims!

Thank you, Kristi Wilson

Sincerely,

Kristi Wilson

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Hey, we are ALL so captured by the big monopoly cable companies having no choice. Which ever company is in your area, that's the one you have to do business with. They freely jack up the prices several times a year. I feel I'm being used and abused with mounting costs.

I'm about to "cut my cable" as I can no longer afford their pricing even tho I bundle my TV, internet and phone supposed for a discount.

My biggest desire would be for the cable companies offer a charge only for the channels people actually wish to view.

Please make this happen!!!!

Sincerely,

Jacquelyn Paul

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

First of all, time Warner has lousy service for TV in this part of San Antonio. We messed around with them for over 20 years and couldn't get an acceptable picture. I replaced the cable boxes numerous times as well as the remotes.

Since changing to Direct TV, our picture is much nicer. In the meantime, Time Warner's trucks are all over and people are still complaining about the service and their costs.

Do not let them become the monopoly

Sincerely,

Virginia McKinnie

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I wholeheartedly support the rights of business owners in the United States to make the best decisions in the interests of their private businesses. However, I value our freedom of speech. To have one company in control of what 30% of the American citizens see and hear is not a good thing. I'm sure these 2 businesses will be fine and continue to make millions of American dollars without a merger that limits the choices that Americans have to stay informed and entertained.

Sincerely,

Brian Mattias

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe in competition. To combine two of the largest cable companies into one giant conglomerate will not serve the American people, however, that will serve Comcast and Time Warner Cable Co. It seems to me that once the merger has taken place the people will lose because there will be less competition. This merger will allow the new company to undercut smaller cable companies and eventually put them out of business. Have seen it before happening as you probably have too with other companies. Therefore, I recommend that the FCC does not approve this merger because we the people will be the losers if it is approved.

Sincerely,

Herbert Nelke

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We need more competition. Comcast has the worst service and customer service of any company that I have to deal with. I have asked numerous times to speak to a manager and have been told that they don't have any, I have been hung up on, or all of a sudden they don't speak English. Make it so there is more competition not less. They are also too expensive. Thank you for your time.

Sincerely,

Henry Nitardy

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Monopoly laws should over-ride this merger. This will give one large media outlet too much control which is bad for choice, competition and freedom.

Deny approval of this merger for the sake of a healthy media "free-market".

Sincerely,

David Bogumil

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because at this time Comcast is amazingly difficult to deal with. It took me over a year to change from Comcast to AT&T. AT&T is not a lot better but if this merger goes through Comcast will be so huge as to be impossible to deal with. They are currently too big to provide good service. If allowed to merge with TWC they would be less effective and could easily snuff out small firms by their sheer size.

Sincerely,

David Brown

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Consumers receive the best service when there is viable competition for their business. If Time Warner and Comcast are allowed to merge then the consumers have fewer choices and thus their interests are not being served or met. When a company gets so large that it only cares about the bottom line, customer service goes down the drain. So, not only are you taking away a consumer's ability to choose what they actually want, but you also doom them to horrible customer service. As it is neither one of these companies excel in Customer Service. I am a Time Warner subscriber only because they have the most reliable internet in my area. When the internet is down, though, and you need customer service to help you... good luck! I have called them numerous times regarding problems with internet or my programming options and they calls always leave me feeling frustrated and unhappy. We pay out the wazoo for basic cable, and they keep taking channels away from us. I wouldn't mind paying for the channels if we were allowed to actually pick the channels that I want to watch.

I believe that at one point in this country's history we felt that huge businesses were something to be avoided. The government went through and busted up many monopolies because they didn't care about consumers any more. I feel that if a merger for Time Warner and Comcast is allowed to go through then you might as well tell Pepsi and Coke to merge, along with AT&T and Verizon. Consumers want more choices, not fewer.

Don't let Time Warner and Comcast merge!

Sincerely,

Kerry Raydo

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We have too few choices for cable - delivered TV programming, as it is. Com cast has terrible customer service, and I understand Time Warner is worse. I fear that if they merge, they will be even less responsive to their customer's needs. We would select another provider, but Com cast is our only hard - wire option. My wife's job requires we have a hard - wired Internet provider. We feel trapped now. Please don't make things worse by approving this merger.

Sincerely,

Maurice Hazen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

owning 30% of the US market is excessive in this age of diffusion of information. Also when a company has a political view of what should and should not be included in their lineup it is a form of censorship pure and simple. We have too much of that in America right now and do not need more. The fewer the choices in carriers the less choice for viewers. Thank you.

Sincerely,

Jan Vernon

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Such a monopoly as this merger would create will infringe upon the rights and freedoms of citizens, who should have optimal choices about what is available to watch on television. We need more easily-available and cost-effective options, such as The Blaze TV, not more restrictions.

Sincerely,

Jill Morton

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Monopoly isn't just a game for young people. It's a real life condition that takes away choice. To phrase it in a way often used to describe the Federal Government, the bigger the company the smaller the customer. I remember the "baby bells". So, what has changed? No to this merger. My mom has Comcast. Have you checked out their prices. My mom has.

Sincerely,

Walter Robins III

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

they will have too much control of the marketplace. Consumers deserve a choice. First, they deserve real choices in programming, and this merger will result in the content of the airwaves being controlled by one very large company. Second, they deserve to have providers competing for their business. Allowing this merger will drive smaller providers out of business. AT&T was broken up because they controlled consumer choices, and a merged Time Warner/Comcast will have the effect of severely limiting the public.

Sincerely,

Pat Lynch

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

with lack of competition prices always go up, and the horror of CONTROL is enabled. We need MORE, not LESS competition. Right now, Comcast draws blood every month from its customers with sky high service charges for different levels of viewing, and internet. My own bill is at about \$270 per month, and I don't have all the bells and whistles of Comcast's array of "deals".

We need MORE and MORE competition. The product will improve, and the cost will go down. It's simple economics when freedom is allowed to prevail.

Please do not buckle under to these "giants" of communication. If they are allowed to merge, the same thing will happen to our cable bills as has already happened to the airlines. Each year, we are enduring less and less competition in the airlines, and the airfares continue to go up and up.

Sincerely,

Gary Kosak

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The market share that they would own would be monopoly-like, although they are already acting like a monopoly. There is already too little competition in this industry. Comcast has a political agenda and they force it upon the public while at the same time they charge ridiculous rates for the privilege of the few cable channels that we actually watch and for internet access. Our monthly bill is very much over-priced for service that is already terrible. Furthermore, Comcast even decides which cable channels they will broadcast. They favor Al-Jazeera owned by enemies of the U.S.A. while at the same time they disallow access to others in America with whom they disagree. Prices will only go higher as they hoard more market share for themselves. Did you know that Comcast does not even have a publically available email address to contact corporate HQ? I have Comcast. Just try to find a way to send an email to anyone of authority at Comcast! They have a buffer system that insulates their executives from having to deal with the public or public opinion. Get yourselves a Comcast email account and just try to send an email to anyone of authority! It can't be done! I have tried to perform Google searches to try to find some way of contacting Comcast corporate. They have insulated themselves very well. With more market share up to 30%, they will only charge more and become even more bold in their cavalier attitude to their customer base. Lets face it. Comcast is a public utility. There is only one cable provider here in Baltimore and there is no competition. We pay VERY high rates for extremely poor service. I

could give many examples of the poor service and unresponsiveness of Comcast. That would take me too long and require too much typing...

Sincerely,

Daniel C. Baral

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have asked numerous times for tv networks that appeal to me. I feel like I am talking to a brick wall. After having tv problems this weekend, I called customer service. I spoke to someone in Tel Aviv, the Phillipines, the Dominican Republic and it wasn't until my fourth call that I got someone in my home state who was able to resolve my problem in minutes. All the others would do is schedule a technician three days out. It's bad enough with the limited cable choices in my area. I hate to think what the customer service will be like and the continual increase in cost. Please do not allow them to merge.

Sincerely,

Renee Gruen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because domination of such a media outlet will raise prices and limit programming for the majority of middle America. Competition is the healthy way to keep costs down and serve the interests of the public.

Sincerely,

Lorri Aldridge

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We have had already at one time a monopoly of the telephone system and it was Ma Bell that could control all of the prices. With cable already becoming more expensive then there is no telling how high the costs will go with a merger.

Sincerely,

kelly denver

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is the worst corp. in the cable industry and has no business expanding when it doesn't take care of it's customers. Furthermore it goes into cities monopolizing cable options. Many times customers can not rectify cable problems much less speak (understand) with customer representatives. This possible/planned merger is a huge monopoly and continues to be a threat to our fair market practices and values. Do not allow this to take place.

Sincerely,

Kathy Parker

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have enough problems with programming limitations and service issues with Time Warner but, worse yet the cost is exorbitant for such service. I HAVE A 2nd residence in FL. there I am forced to use Comcast. They are even worse by about 10 times! What a nightmare. I could write a book about how inefficient Comcast is. Tried to get my bill straightened out by phone, online, and at office in person. Each time I was assured billing was fixed but next month same mistakes were still charged. I got so mad I turned the mess over to my wife. It took her 4 more months of not giving up to get the Comcast bill straightened out. **DONOT EVER APPROVE THE MERGER!!!! THAT WOULD BE SUICIDAL FOR CUSTOMERS WHO WOULD HAVE NO RECOURSE TO PROTECT THEMSELVES.**

Sincerely,

Larry COPPES

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

They are not allowing some American broadcasters on their networks but let foreign news channels on. What a shame they won't support our own but grant air time to foreigners. Why can't they all be on? There are plenty of channels I never watch but I don't mind if someone else watches them. Are they afraid for some reason to not allow Glenn Beck on their channels? I think it shows poor judgement and censorship which they would fight tooth and nail if it happened to the foreign channels.

Sincerely,

Sharon Duggins

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I tried for months to get Comcast to pick up theBlaze. Then , when my contract was up, they agreed with me to a new contract, but after 3 months of them not living up to the agreement (charging me FAR MORE than agreed to), I dumped them for Frontier, the only other choice my apartment complex allows. They, at least, have kept their word concerning their charges, once I got them to cancel the "Movie Package" that I told them from the start I did not want. Bottom line, the larger they get, the worse their concern for their customers gets. If Comcast and Time-Warner were to merge, where would the disgruntled, overcharged/underserved customer go? Without choice, without TRUE competition, prices ALWAYS rise and service ALWAYS goes straight to h\*ll.

John Gregory

Sincerely,

John Gregory

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

These two companies combined would represent 30% of the cable market, making them less responsive to consumers complaints about poor customer service. The judgement of Comcast is already questionable in that they provide the Al Jazeera network which often engages in propaganda. The network does not air The Blaze TV network which offers a true alternative to the mainstream media.

Combining the two companies constitutes a significant restraint of trade.

Mark King

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As Americans, we believe in freedom of speech. That no one should control what people hear, say or see. Those are our values. Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills. I believe that businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent, competitive voices which is NOT in the public interest.

Sincerely,

Carolyn Yb9s

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It seems previously that AT&T, Bell Telephone, was deemed to be "TOO BIG" to do business in the United States and was deemed to be a monopoly. Rates were controlled and were artificially elevated by the company.

It was broken up into smaller companies.

Should Comcast and Time Warner merge, a similar situation will occur. There will be a monopoly of prices and only products favorable to the board of directors available to their customers.

Currently many cable companies already use their prerogative to limit their products to extremely profitable or extremely biased services. Public input to these companies is overlooked and/or viewed as a nuisance to their way of doing business.

Should you approve this merger, you will create an overbearing monopolistic giant with a propensity to listen only to popular or well connected persons concerning the addition or deletion of products available to customers and the cost be damned.

Sincerely,

Larry Leck

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

A merger between TWC and Comcast is NOT in the public's best interest. We already have almost NO CHOICE in cable providers, and this merger would lessen the choice even more. I have to pay for 100s of channels I NEVER watch, and some channels, like The Blaze aren't even available to me. For the past 35 years, I have had one choice in cable, and it's been TWC for both towns I lived in. Thank you for taking my letter into consideration.

Martha Nitschelm

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As history has shown, we can only benefit from healthy competition. To allow these telecommunication conglomerates( Comcast/TimeWarner cable to merge, would in essence put a strangle hold on the small entrepreneur, which is the back bone of our Great Nation. Did not the Government do opposite in the eighties by breaking up BELL telecommunications, and created much more diversity, affordability and increase in technology; as well. If nothing else, it takes away from the great mantra of DIVERSITY. Good day!

Sincerely,

Mark Allen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

monopolies are known to be not in the best interests of the cable subscriber, as an individual, or for the public-at-large. Creativity WILL be stifled. Political discourse will be nullified in the very heart of it's existence.

What would the PRUDENT MAN do? He must DENY this merger, assignation, and transfer for the very abomination that it really is.

Sincerely,

Michael Fandel

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is too large with too much control over our country's communications already, let alone allowing them to buy the second largest cable communications company - Time Warner Cable Inc. as well. Why allow a merger like this that will inevitably lead to a situation of over consumer control and lack of competition not unlike that of AT&T back in 1982. I'm very pro free market capitalism, but not to the point of giant corporate monopolies that end up controlling a particular market from top to bottom, crushing out all competition and choice within their market. Comcast has already been sued for manipulating band width content delivery against selected competitors, which should be enough cause for denial in allowing them even more span of market control. Companies like IBM and Microsoft were sued for gaining too much power and control over their markets, and were forced to back off. Even more related to this current merger attempt by Comcast, was the attempt of AT&T to buy T-Mobile and most recently, the attempt of Sprint to buy out T-Mobile - both of which were disallowed. Please do not allow the merger of Comcast with Time Warner Cable Inc. A merger of this magnitude is definitely not in the public interest. History has shown that if allowed, it will only set the stage for even less competition, which will result in less public freedom of choice in communications and information, and less innovation in market solutions.

Sincerely,

Ron Knight

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast has little respect for its customers as it stands...when you've got cable problems they refer you to a person in God-knows-where country who speaks english as a second or third language. I fear more power means less choices and more disrespect. If anything they need to be more regulated. We are currently forced to buy channels we don't watch so I can't grasp how a merger is better for the public interest. They are already so fat on dollars that they can afford the best congressmen and judges that money will buy. I simply don't trust them.

Sincerely,

ken dunson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

there is already ample evidence that the consolidating of newspapers, radio and television stations, that began more than two decades ago, has led to a state where the media speaks, thinks and acts as a monolithic group, siding overwhelmingly with only one side of the political spectrum (Liberal/Progressive). It has NOT been in the best interest of the American people, who are a diverse population and who not only need - but who have the right - to hear and see all sides. It is abundantly clear that there is a true bias on the part of both of these cable providers, as they are super supporters of liberal and progressive candidates and issues - what about the other side of the spectrum, where at least 50% of the American population are aligned differently, in terms of both political thought and morality? As with the press generally, ownership of two of the largest providers of cable television (and not just news) is NOT in the best interest of the American people, writ large! How much more variety might we see, hear and experience if/when we allow smaller and more diverse entities to compete in this market? What programming are we missing because we are only allowed to see the formats presented by one side of the philosophical divide? It feels like indoctrination to me already - having these two goliaths combine seems like a further push toward the horrifying world of Big Brother! I hope you will think long and hard about giving so much power to any one group - especially when both are already biased in one philosophical direction!!

Sincerely,

Linda Flynn

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Currently, I am a dissatisfied Comcast customer. Comcast is too big now to deliver fair pricing and good customer service. On many occasions, I have contacted Comcast customer service and have not been helped or my problem/concern not resolved. I can't imagine or believe that when they merge with Time Warner that the service will improve. If anything, I will believe it will be far worse, and I will be forced to find a new provider for my phone, internet, and television service. This proposed merger absolutely will not help the consumer but hurt them. I have several choices for service in my area and have chosen to stay with Comcast only because of their high speed internet, but I will make a change if this merger is approved because most assuredly my bill will increase.

Please consider the millions of affected customers and the negative impact that this merger will have on them. In the end, if customers are dissatisfied then they will gravitate toward the better provider.

Thank you,

Susie Ray

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

To whom it may concern.

When Comcast and Time Warner merge it will be tantamount to letting a monopoly operate in many areas where they are the only two cable services to choose from. The anti-monopoly laws were passed for a reason.

I am respectfully requesting that American citizens be given the opportunity to participate in a free market, that is conducive to allowing the consumer have a choice of companies of which to pick from to receive their service, which will result in healthy competitive market that keeps pricing at a reasonable rate and will offer more choices of the types of service more fitted to their needs.

In that light, i request that in order to keep that free market atmosphere alive and thriving, that you invoke enforcing those laws and block the merger of those two companies. No one company should have that kind of power to be the only source of information that many will have to rely on to be fully informed by different sources to get the best information available for all news stories, and current event situations. That lack of accountability to the people infringes on their ability to go to a more reliable source of information and entertainment, if they are not satisfied with the limited number of information and entertainment sources offered by the company based on the biases of the decision makers of the company, if there are no more choices of service providers to choose from that provide a

wider variety of information sources, or different sources that offer differing views that might not be represented by the merging conglomerate.

America is not about limiting choice. It is about the free market opening doors to new opportunities and helping to foster a more free society. One company having a strangle hold on roughly 20% of the information market in the U.S. is unconscionable.

Respectfully and Sincerely,

Don Kern

Sincerely,

Don Kern

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We want to hear all of the news from both sides of government. We want to know what our elected officials are doing! We do not want to find out that news reporters have been killed because they got too close to the truth. The sad and shocking story of what has happened in America in recent years must be told. People need the facts. There is safety in an informed public. There is real danger in a complacent and uninformed citizenry. The truth must be told even at the risk of all we hold dear. I am proud of people like Senator Lee who is standing with the constitution that was put in place by our founding fathers. We need to see the truth which only comes by having choices of what we watch on t.v. or the computer.

Sincerely,

Susan Victor

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The lack of competition will only exacerbate the poor customer service the public is already receiving, increase the already exorbitant cable bills and discourage innovation and choice in programming. They offer AlJazeera which receives a paltry viewership, but ignore the requests of hundreds of thousands of subscribers for TheBlaze. If they are already this deaf to their subscribers, how will this merger improve their hearing? The bigger they become, the less competition they have, the more powerful they will become and less likely they will feel the need to listen or respond to their customers. Serving the public interest is to offer more choices, increase competition and lower cable bills. These companies merging will NOT provide subscribers savings, better customer service or more voice in programming choices. Think long, hard and HONESTLY whether this merger is truly serving the PUBLIC interest.

Sincerely,

Janet Richardson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger brings together the two biggest cable companies making one giant company that leaves Americans less choice, no competition and a guarantee of higher cable bills. I believe that businesses should operate free of government intervention but both these companies are government allies with the power to silence any competition should it serve their purpose to do so.

Should the FCC grant this merger, it would jeopardized the free-market balance of cable industry by merging the 2 largest cable companies into a mega power.

A merger of this magnitude will not be in the public interest.

At the home level, cable bills are a significant part of the household budget and not an item that can be bargained. With that in mind, what we need is MORE competition - not less; MORE choice, not less, and a chance TO CUT cable bills not raise them. Please deny this merger.

Sincerely,

Danitza Grimes

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe I should have the choice of who provides my service and what is included in my service, since it comes into my domain.

There are very few good things out there to choose from and good service and a variety of choices to choose from, we all don't like the same things

so a variety is good, to change and merge is not best for the companies due to loss of customers & money, and not good for customers who choose to have a service for the entertainment, different interest for different people and household members, looking for good service and respect of others

freedom to here and see things that cause them to learn, grow and be better people for it, so it is my opinion that THIS MERGE IS NOT THE BEST THING

TO DO FOR AMERICAN HOUSEHOLDS who watch a variety of shows, sports, news, health reports etc  
NOR IS IT GOOD FOR OUR COUNTRY the more

positive, healthy, education, ideas, we have as NATION the better it is for us all. So I hope you Listen to the Voices of the Millions out there who will be effected by this MERGE. Please do the right thing that's best for all, not just a select few. It may effect the success or failure of the merge.

Thank You for taking time to consider my input on this matter.

Sincerely,

Patricia Swearingen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This does not serve the public interest as the customer service is sorely lacking and as the owner of Comcast is a crony of the present administration and his FCC cronies (golfing and partying buddies) bespeaks a level of if not outright corruption and influence buying, given their political contributions, then just scratch my back and I'll scratch yours attitude that I rather thought we as a nation of laws not men had long passed to the wayside. Oligarchs do not rule over Americans. You work for us. We do not work for you. Do your job or find a new job, if you can actually hold a job in the real world.

Sincerely,

David Ross

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

A merger of Comcast and Time Warner will dramatically reduce the options available to consumers and reduce competition, which will raise costs. It's also a bad deal because the concentration of broadcast control will greatly reduce incentives to provide more quantity and variety of content choices to the public and consumers. A merger will limit adoption of technological innovations that would occur with more competition. Because governments limit what companies can provide cable services we are already faced with few choices. Several recent media stories demonstrated the lack of concern of these cable companies for consumers when they make it excruciatingly difficult to cancel their services. I have read that the cable companies already do not care about their American operations because they see little growth in U.S., and mostly focused on improving their overseas markets. A MERGER IS CLEARLY AGAINST THE PUBLIC INTEREST! Thank you.

Sincerely,

Carolyn Heston

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast said it was going to buy Time Warner Cable. Think about that for a minute: Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills. The cable company's have too much of a monopoly and not enough competition already! This is a disastrous "POWER" move that should not be allowed!! The FCC is no friend of the public, if they allow this to take place. The real answer is to allow for MORE competition within these areas, not MONOPOLES!!

Sincerely,

Paul Marcus

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This will create a near Monopoly. There is not enough competition as its is. Please do not allow this merger.

Sincerely,

Randy Jeter

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Serving the public interest means more choice, more competition and lower cable bills. How will that happen by allowing two of the biggest cable monopolies with the worst customer service records to merge and dictate what 20% of America can see on cable TV. This means less choice, less competition and higher cable bills.

Sincerely,

Pam Wilterdink

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger will raise prices and limit competition. AT&T will not give discounts for service if they have no competitors in their league. Dish is offering

package deals using AT+T Phone & internet. What do you think will happen when this merger takes place. HIGHER PRICES, less disposable income

resulting in a slowdown in the national economy. REJECT THIS BUY-OUT MERGER.

Sincerely,

William Kokes

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

To Whom It May Concern:

I don't think that the merger of Comcast and Time Warner is in the best interest of the public because the current level of service for the price we pay is outrageous! Taking away another competitor will make it worse and make our cable rates even higher. I am disgusted with Time Warner, their lack of customer service and the outrageous amount they charge for cable access. I have to pay for channels I don't even watch - when I ask to add additional shows - I get no response. Funny because one of Time Warner commercials states "Why would you pay for things you don't need?" Yet I must pay an unbelievable amount for the shows I don't even watch or like!

Please provide more options and choices not less! I would like to have another choice (besides) Time Warner and cheaper cable bills!

Thank you.

Dawn Rapkin

Sincerely,

Dawn Rapkin

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

In my oppion the Time Warner/Comcast merger will create a monopoly! There will be no competition so they can do and charge whatever they want. The public will have no choice other than to drop their connection. This country was build on competition. Consummer choices dictated where the public wanted to spend their money and this promoted good service.

As a Time Warner Cable customer I am very unhappy with my current service. We have had a representative to our home on an average of every 2 weeks since April and are still experiencing problems with a box that is suppose to assure us contact with all digital channels.

I don't see the programing available on my TV that I want to watch and as a Conservative Christian I feel my values should also be represented in the line up of programs represented. I don't see that happening with this merger!

Sincerely,

Judy Kinton

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Just as ObamaCare is giving Americans less choice in our cost of health care and less choice too, these two media giants merging gives Americans less choice of viewing programs and pricing choices with what formally was more media companies creating more competition and price choice. As a former Comcast subscriber, I left this company because of poor customer service and flexibility of what I wanted to watch. Canceling was a nightmare and took FOREVER!

Merging into a larger monopoly would not be good for present or future customers. DO NOT LET THIS MERGER PROCEED. IT IS THE WRONG THING TO DO AND ISN'T GOOD FOR AMERICAN MEDIA COMPETITION.

Thank you for your Consideration

Fred Little

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

What viewers watch should be decided at a much more local level. Very large mergers like the Comcast/Time Warner merger only allows for everyone to get the same shows decided by a very small number of people. Cable companies should have more local control and say as to what they have on their channel lineups. For the same reasons that the Federal Government should not be allowed to decide what is right for the entire nation so should be what is viewed on television and cable. Local television stations have much more say as to what is viewed locally. Local cable companies should be the same. Thanks.

Sincerely,

Brian Funk

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I had Comcast as my Cable service in the passed and a lot of my family has comcast. I don't think the Comcast/Time Warner merger will help the public get better service. Comcast has been in Philadelphia area for years and as they grow bigger the service goes down. Comcast pulls people in with the Philadlephia sports but gives many Philadelphians head aches every six months or so when they need to call Comcast to stop their bill from raising very high. I know that my friend in New Jersey has to take about an hour plus out of her day if she wants to call Comcast customer service. Yes calling Comcast takes a very very long time. I think that the Cable industry needs more providers instead of less. Comcast close out other providers because they own Philadelphia sports TV programs. Please help stop this merger and stop the bad costomer service.

Sincerely,

Michael Trott

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the market needs more competition not less. Customers need more choices not fewer. I have used Comcast for the past several years. This is not because I want to. This is because there is no other choice in my area. They are horrible! They outsource their customer service and telephone support to India and Philippines! They say they do this to save money. Funny, because each year they add price increases on top of price increases all the while reducing services to hide the price increases. They do not support their customers nor do they support their service providers. A merger would not be in the best interest of the consumer nor in the best interest of the US.

Sincerely,

Jim Griffin

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is not good to have monopolies. The people need choices and we love the freedom of checking out smaller cable companies for different views.

We especially like the Blaze. We believe that they give us the truth and ask us to do our checking and give us choice to think. I believe that this consolidation is not in the public's best interest.

Sincerely,

Jan Barton

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger will reduce the freedom of choice in our cable/satellite provider.

As of now, I can find another provider that may meet my family's needs, if I so choose.

Please do not lessen the competitive advantage that the American consumer has at this moment.

I have channels that I can choose to watch. Except Directv still refuses to carry Glenn Beck. And if this continues, I can go to another

company that does offer Glenn Beck. This is the freedom of choice and content that I have right now.

Please do not allow this merger that would give too much power in the hands of a few as to what I watch and enjoy. Your agency

Is supposed to be a guardian for the public. Please protect us now.

Thank you,

Mrs. Victoria S. Thompson

Sincerely,

Victoria Thompson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I do not believe the impending merger between Comcast and Time Warner is in the public's best interest because they are currently not providing market based service to the public. Despite repeated requests for the Blaze, they will not add it. They continue to add useless content, raise rates, and provide lousy customer service. If they are allowed to merge, then they should be forced to provide a la cart programming so we as consumers can choose what we want. It is not a technical impossibility given what the internet currently provides.

Sincerely,

Nathan Kelley

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe that businesses should operate free of government intervention, but these companies, Comcast and Time Warner are government sanctioned monopolies with the power to silence independent, competitive voices if it furthers their business interests.

This potential merger of these two biggest cable monopolies with the worst customer service records will dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills. WHAT WE NEED IS MORE CHOICE, MORE COMPETITION AND LOWER CABLE BILLS.

This is DEFINITELY NOT IN THE BEST INTEREST OF THE PUBLIC. I STRONGLY OPPOSE THIS MERGER.

Thank you,

Brenda Hilton

Sincerely,

BRENDA HILTON

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

this company has or had a serviceman inform us that TimeWarner had a lot of new technology and that it was coming fast at them. No one knew how to use it nor what it could do. While staying with my mother in FL, I found Comcast to be even worse. There was a constant error message displayed on the cable broadcasts, even when the weather was perfect. I don't believe a monopoly is the answer. Now, with that said, the new fees that keep appearing on my cable bill are causing us to start to look to Netflix or another method of transmission. I do not want to see the FCC getting involved in what I watch. I find it intrusive, and just because someone somewhere may feel it is biased in some way, they can change the channel just as easily as I can. I also feel that only one biased set of stations that lean to the left should not suffocate the ones that lean right, or Libertarian, Constitutional or even to the far left Progressives, that want to do away with our Constitution. We teach people to learn, to look at a variety of sites, an not just one type, It would be like my wanting Bush's baked beans and there were only the generic brand. If I want one over another, then my tastes are for that one and I'm not going to be happy settling for the other one that is watered down. This is the USA, we have a choice. To stifle ones' voice over another is not appropriate for such a great country that was born of a variety of thoughts, beliefs and creativity. That is why this country continues to expand and push boundaries, free to think and feel. If we wanted the governmental overreach we'd move to Russia or some other Communist country. Thank you.

Sincerely,

Maureen Luttrell

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The reason we have a Comcast email address is because we have basically been trapped. Comcast provides the highest speed available, which is why we put up with them. HOWEVER, they are the most expensive internet provider, and they have the absolute worst customer service. We do not think that the merger is appropriate at all. If Comcast were to be permitted to merge with Time Warner, they would further dominate a market instead of enabling other companies to be able to provide highest speed service. Also, previously, when we requested to discontinue service, Comcast has charged us into the next month with no available recourse on our part. All part of the exceedingly poor customer service.

Sincerely,

Robert Whitfield

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I had Time Warner services in my home in Ohio for my Mother who lives there. They were so expensive!! I dropped them and went to Direct TV. At my home in Florida, I have Dish inasmuch as I live in a rural area. Comcast is 2 miles away from my home and has been for the last 10 years. They only develop to control the area and set the price. They are like-minded companies. I do not think it would be a good match.

Sincerely,

Cheryl Puzon

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast has absolutely the worst customer service over the phone, though if you're able to get to an office they're a little better face to face. Nevertheless, I really dread the idea of being even more limited in my future choices of Cable TV Service Providers and being stuck with even less customer service because they may not even care to make an appearance of good c.s. if there's no competition to worry about. And what about the rates? They already have a monopoly! Please don't let these giants combine into a Leviathan!

Sincerely,

Audrey Andujar

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is our desire to request that all assignments or transfers between Comcast and Time Warner Cable be DENIED.

We do not believe that the Comcast/Time Warner Cable merger is in the public interest, as a monopoly can never improve anything. Only the free market can improve the industry, for the more competition there is, the more choices the consumer has, which results in a better experience for everyone.

We feel that we are already witnessing a rapid decline in the quality of programming along with slighted reporting. Once the information we receive is one sided, there will be no reason to subscribe, so we will have no choice but to cancel our cable subscription completely.

Please consider our request to deny the consent to assign or transfer control of licenses and applications between Comcast and Time Warner Cable.

Thank you for your consideration.

Vivian Paffe

Sincerely,

Vivian Paffe

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is already overcharging its customers with regular large increases. The merge will allow them to do even more.

Sincerely,

Edward Walker

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

bigger companies don't mean better companies. In the early 20th century, big companies were evil. They had monopolies, engaged in unfair business practices and treated employees poorly. I don't know why such large companies are "good" now. The Executive and Judicial branches worked relentlessly to break those companies up. Now, we are allowing them to re-generate. News and information need to come from NUMEROUS SOURCES. ONE COMPANY CONTROLLING SUCH A LARGE PORTION OF THE NATION'S PROGRAMMING (though not even a majority) IS DANGEROUS. They will squeeze others out, lessen the choices we have available to us and prices will increase when options diminish. This is a bad idea that I can't believe made it to this stage of the process. DON'T ALLOW THE MERGER TO TAKE PLACE!

Sincerely,

Eric Wall

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast already has control over a large portion of what consumers see and hear along with the entities that produce the programs they distribute. They obviously do not know how to satisfy the needs of the customers they already have exemplified by continuously producing poor ratings by every survey they can be judged by. My current provider is Time Warner Cable. The service is acceptable, but considerably more expensive than I think it should be. With their resistance to providing more conservative channels like The Blaze to complement left wing channels like OWN and Al Jazeera, I don't believe that in the future it can be guaranteed that they will provide any other viewpoint than what they believe is acceptable. Since the government controls the places and frequencies these "utilities " are distributed, it would essentially create a government controlled monopoly of information. In light of recent scandals involving other "neutral" federal agencies such as the IRS and Federal Elections Committee, I find it hard to believe that this much power will not be abused in the future to only provide propaganda for only one side of a debate on a captive audience that only receives information through their cable provider's selected channels.

Sincerely,

Isaac Vorisek

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As Americans, we believe in freedom of speech. That no one should control what people hear, say or see. Those are our values.

In February Comcast announced it was going to buy Time Warner Cable. Think about that for a minute: Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills.

I believe that businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent, competitive voices like

Sincerely,

JAMES LIOUNIS

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because it would greatly eliminate competition and public choice in Cable services. I feel already that there is a monopoly in the cable industry because there are so few choices as to how and where you can get cable and internet services. The merging of the 2 largest cable companies will only strengthen that monopoly offering less service at higher rates. In addition to raising prices for service, they will have a monopoly on what is offered for our viewing. At present, they choose what programs they will run on the network. The merging of these 2 companies would give them a stronger ability to censor free speech. This should not be allowed in a free society, and it appears to be in contrast to our constitution.

I strongly request that you NOT permit this merger to take place, but, instead encourage more competition in this very lacking and important industry.

Thank you,

Sincerely,

Lois Verde

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

there is not enough choice currently to create a competitive enough market. Customer service is not a major priority for these companies, and will diminish further if fewer companies are in the industry. If anything, I want to see the monopoly that cable companies enjoy in various geographical areas be banned. Once a cable company is assigned to a neighborhood, the consumer no longer has any real choice or leverage and poor service goes unchallenged. The public deserves more choice options, not fewer.

Sincerely,

Carol Kitson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is well known that competition among businesses, including media service providers, is good for business, good for our economic system, and good for consumers. If you have a good product, you succeed. If your product is an even better product, you thrive. Competition leads to the good surviving, thriving, and the ineffective or lowest quality, failing. This helps insure good services and products for consumers, and encourages, even rewards imaginative thinking and effective customer service. The marketplace should be moved by competition, decided by consumers, not the limiting of providers and competition.

Both of these companies have already separately reached the point of caring less and less for their customers, as shown by prices, product, and customer service. Both of these companies have already branched noticeably beyond their initial services, reaching deep into other media enterprises. Consumers already have few choices for their media provider due to regulation. For example, the only choice of a cable company available in my town is Charter Communications and that company does not provide the services I want and their prices are too high for what I would get. Thus, I obtain my television services via a satellite service provider. While I may not get some of the services I would still like to get, I do have a bit more choice in content for a slightly better price than Charter would provide. And...if I become dissatisfied, I can change to a different satellite service provider, and use my Roku

more often. By the way, even Roku type products have competition, making things better and less expensive for customers.

The merger of these companies will create a 30% market share for the new "entity", but an even further reduction of choice for consumers. Is their involvement in news networks, television show and movie production, in addition to cable service, not already enough? I think it is already too much. Too much control over media outlets, too much control over content, too much control over prices and too much apathy in customer services. The big cable companies already have a hand on the throat of this service, since it is so very difficult to start-up a cable company now, and regulation insures no other cable company can infringe on the territory of another, even if a new one were to be formed. So, where is the incentive to do so? New thinkers and entrepreneurs are impeded, and the public pays the price, both literally and figuratively.

Do not approve this merger! Not only will nothing positive for the American public come of it, the public will only be more frustrated and infringed upon.

Thank you.

Alice Lammonds

Sincerely,

Alice Lammonds

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Cable is already too expensive & I am against this merger! I want more choice in cable companies.  
Competition is GOOD! Monopolies are BAD!

There are horror stories about bad customer service from Comcast customers. I would never be a Comcast customer!

Sincerely,

Diane Kirkland

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

People need more choices, not less. I am greatly concerned that this merger will make it easier for people in power-whatever political party- to dictate what information is aired and silence opposing viewpoints. We should be able to choose what we want to listen to. The ability to do this will be much more difficult if this merger takes place.

Sincerely,

Kay Vifian

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As Americans we have grown up with choices, as the years go by we are losing more and more of our choices which equate to our freedoms. Choices in television may seem small, but each small step leads to bigger ones. We each need to protect our freedoms and the way to do that is not to LIMIT our choices but to increase them. More choices equates to more competition which leads to better customer service and better customer satisfaction! At this time I do not subscribe to any satellite or cable company because I feel I don't like the choices that there are. Allowing this merger will only make those choices smaller!!!

Sincerely,

H C

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is a huge company and so is Time Warner. There is NO reason they need to merge. This is not in the public interest! The public deserves CHOICES! Both of these cable companies have the same outlook and provide basically the same information and WILL NOT provide a different political point of view than what THEY believe! Thousands of Americans have asked these companies to sign on THE BLAZE as a channel in their line ups but neither of them will! If they become a HUGE company they will control most of the media in this country and we conservatives will be left out in the cold-not able to get the news we want and need! Please listen to our voices and DO NOT let these two companies merge!

Sincerely,

Bryce Krogue

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Choice (when it comes media consumption or any other market) is what keeps content evolving, improving and moving forward. With increased consolidation comes decreased diversity and competition. A consolidation of this magnitude would be devastating to the market richness and diversity consumers deserve and have the right to. Thank you.

Sincerely,

Jason Birnstihl

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Moving from IL to WI and now I have to change to Time Warner, just to move 15 miles North. Some would think this is a good thing, to have Comcast/Time Warner together. After all, it would make things like this simpler; smoother. However, it's entirely the reason it's the problem. Why can't Comcast also be in WI and Time be in IL? There's no competition and hence the costs can't be driven by the consumer market. If you're forced to have Comcast because you don't have any other option, then it's a monopoly. Now, if Comcast purchases Time Warner, then they have the other markets as well, and there's STILL no competition! Who then would even be able to compete with a huge monopoly that pretty much covers the entire country?

It's a terrible idea to allow one company to gobble up other companies and that company states it's not a monopoly because Time isn't a direct competitor; the satellite and DSL companies are. This is a circumvention of the current laws and finding a loophole for the sake of making more money just to be bigger.

Sincerely,

Johnco Miks

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

My bill with comcast has already gone up over \$70.00 in the past 5 years which more than out paced the inflation rate.. This is now my highest utility bill, and twice what I pay for either my gas or electric utility bill. Since all video media is broadcasted in hdefineinition, why do we have to pay extra to receive hdefineinition. I believe this merger will create a monopoly which will only increase the the cable bill to all concerned. In areas of the country where people have a choice of cable providers, their cable bills are a lot less.

Sincerely,

Paul Kudlak

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It would not serve the public's interests to diminish the number of communications companies competing for audience share. Innovation in technology and programming would not be forthcoming if there is no need to compete. Time Warner is a prime example of this in my area as there really is no choice for the consumer but to use their service despite poor service and inferior technology. This merger will not help the consumer and the public can only hope that its interests are will protected by the FCC.

Cordially ,

Bernice Steckl

Sincerely,

Bernice Steckl Steckl

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because it will reduce competition in the market and in the end the consumers will suffer. I have seen first hand (I handle "all things my tech" for my parent's) the degradation in services when Comcast comes to town. My parents lasted about 1 year post transition after Comcast took over TW-Houston, before the quality became unbearable and they switched. In case you are wondering, they are on UVerse.

Sincerely,

bryan landwermeyer

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Competition pushes businesses to improve. It is what continues to energize the technological evolution. It is not good for the American consumer for these two media giants to merge. If anything, they should be broken up. This merger is against the principals that established the Anti-trust laws. As it is in a large portion of communities, the consumer does not have cable choice; there is only a single cable provider. Cable service costs continue to rise because of the lack of viable competition. This merger should should never have even been brought forward for consideration.

Sincerely,

William Huber

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Cable TV is not available here. Comcast refuses to expand in this area. These two companies merging would quash competition, and they are already unwieldy and deficient in customer service. The Bell System was broken up to eliminate the monopoly and the Worldcom Sprint merger was blocked because the resulting company would have had too much market share and customers would have lost choice and competitive offerings. This is no different. Costs to consumers will rise, executive officers will reap millions, but the customers will pay more and get less. Why would anyone think this is a good idea? And they refuse to carry The Blaze. If the FCC approves the merger, it will be tantamount to federally sanctioned censorship.

Sincerely,

Tricia Perry

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

having lived in the Philadelphia area since cable was first available to the public, it is clear to me that Comcast seldom holds the benefit of its own customers in any great regard. They have a history of bending the laws to enrich themselves at the expense of the consumer. Given their past, there is no reason to believe that the acquisition of more power would stop them from using their grip on an unwilling public to squeeze further cash from their customers, who already lack much choice.

Comcast does not respect its customer base, nor the public at large; Comcast, and the Roberts family have shown themselves as only interested in enriching themselves and their cronies; and that they only wish to disseminate their own views to the public.

Allowing Comcast to increase its size and power by allowing them to acquire Time Warner cable will only allow them an increase on their stranglehold on the public, and serve to stifle information and opinion in a time when more is so desperately needed.

Sincerely,

Mary McCauley

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

They have too much control over programming received or NOT received. When having dispute with major network in 2013, they dropped the channel and replaced with junk. They also prevented access to web sites using their internet service which are paid services. More control by a large company must be avoided.

Sincerely,

Nancy Miller

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The proposed merger of Comcast and Time Warner in my opinion will only benefit the profits of those companies at the expense of consumers. The purpose of the merger appears to be a calculated scheme to provide fewer choices and less service for the money they charge, because with less competition there will be reduced incentive to improve. I cannot see any benefit to the consumer or public. I repeat, the merger benefits these companies and not the consumers who our government is supposed to represent and protect. Please stop this merger.

Sincerely,

Gaynel Heston

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The current status has only one cable provider available in this area. If any thing there should be governmental intervention and relaxation of the rules in order to allow others to compete for the public's dollar. It is the case that if this legislation passes our prices will increase with no recourse and this service will be controlled by one mega-large company, eliminating competition which is the life blood that allows the offering the best in goods and services.

Sincerely,

Leonard Carl

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it reduces competition and the ability view shows (or even purchase viewing on an a la carte basis). I am a Comcast customer who is planning to seek out another cable provider in the near future because Comcast refuses to allow a balanced amount of programming, especially between conservative and liberal voices. I feel that this merger between Comcast and Time Warner Cable will further devastate opportunities for a diverse body of viewpoints and perspectives to be available for customers.

Please do not allow this merger to proceed further. Please support smaller cable companies and more consumer choice.

Respectfully,

Jill Dee

Sincerely,

Jill Dee

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I do NOT think that allowing this merger is in the best interest of this country! This permits an already large company to swallow another company which borderlines on Comcast becoming the monopoly in this area! As a result of Time Warner's strangle hold on the city of Austin, I rarely watch the local programming and instead turn to "outside sources". This merger would essentially be akin to having Austin, TX as a captive audience being force fed a diet that it has no choice in. Why not permit Comcast come here and offer us the choice of using Comcast over Time Warner? That would at least be fair and reasonable. Please DO NOT permit this merger!

Sincerely,

Laurie Ackerman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't want a cable company dictating what the public can watch. Already we are getting biased news from the major channels. Whenever government gets involved in anything people are harmed. The first thing that any rogue country does is to black out TV and take over newspapers. When any company gets too big it is my opinion that service and quality is affected. Equipment AND employees are overused and abused. Comcast already has a negative history and I don't think we should continue to expand a monopoly in any business. It only means failure and inadequacy.

Sincerely,

Josephine Reina

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger would put Comcast in the position to decide what is seen on TV. That is just so wrong! Serving the public interest means more choice, more competition and lower cable bills. If the FCC determines it's in the public interest for this merger to go through this means less choice, less competition and higher cable bills. Please don't let this happen.

Sincerely,

Harriet Massengale

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We need competition in all our business' to enable the public to have a choice as to what type of product and/or entertainment they prefer rather than have it dictated to us that this is all there is. It also helps keep the prices in-check so that even the less fortunate can afford what they prefer.

Big business' have contributed to the decay in America's dream that we all have an opportunity to making a good living and providing exactly what the people want. e.g. Although Walmart employs thousands of workers it appears that they import most of their clothing, tools, electronics, toys, etc. causing many manufacturers to close their plants and/or move to Mexico and India (plus other countries with slave-like conditions) providing more inferior products.

Removing competition will destroy our economy even further.

Sincerely,

Elle Hill

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The cable industry is already controlled by too few companies and letting them merge into bigger monopolies of the business. Allowing big business to become larger and more powerful will not help the average American but instead allow a more lucrative collaboration in the interest of the big business instead of in the interest of the consumers.

Sincerely,

Philip Bertrand

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We do not need to have a monopoly on the cable industry, Prices are high enough already. We need to have more choices and cheaper prices. We pay high prices and the service and transmission problems are not worth the price.

Sincerely,

Patricia Sepkovich

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is incredibly manipulative, supporting Jihad by adding Al Jazeera for free to it's repertoire while they won't carry the Blaze, no matter how many patriotic Americans have stood up and requested that Comcast offers the Blaze programming. This makes it very clear where their loyalty stands and it is not with the conservative American citizens.

It would be utterly devastating to give Comcast/Time Warner even more power which they certainly don't exercise to be benefit of the average American viewer. The bias comcast behavior toward the Blaze network is nothing short of despicable.

Sincerely,

Caterina Conit

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

We have had Comcast for several years for our television, phone, and internet service. Their service is intermittent and their fees too high. If there is a problem, there is rarely anyone in there service department who can assist. I wish there was another company who could offer us a high speed internet service. I think large companies like Comcast don't care about the little guy. It is all about the \$\$\$.

Allowing them to merge with Time Warner would only create a greater monopoly and less choice. Thank you for your time. Mike

Sincerely,

Michael Warren

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is obvious on its face that by allowing Comcast to buy Time Warner Cable means less choice, less competition and higher bills for cable customers.

It doesn't take an economics professor to understand the implications of the near-monopoly that will be created: competition is vital to a healthy telecommunication environment and must be maintained.

Sincerely,

James Tibbetts

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

....of several reasons.

One: I've been a Comcast customer since they took over service in my area from Time Warner. Neither company was pleasant to deal with in customer service matters, although, I will say Comcast has solid lock win in the "Worst Customer Service Ever" category. By merging with and effectively eliminating competition from their biggest adversary, there will be no incentive for the merged corporation to improve customer service relations.

Two: Less choice. This stems directly from my first reason why a Comcast/Time Warner merger is not in the public interest. Comcast and Time Warner both already have monopolies as the only choice of cable provider in several municipalities, including my own. As with most Comcast customers, I truly dislike the company, however, there are no other reliable internet providers in my area. I honestly would not be against the merger IF cable companies did not have monopolies in individual cities around the country. I would simply take my business elsewhere, as would most Comcast customers, and let the free market economy take it's course.

Three: Less choice equals higher prices for customers. Again with little to no competition to worry about, what incentive would Comcast have to keep prices low for consumers? On that same note, there would little value in the product as the company would have no reason to provide more channels or higher

internet speeds. In short, with no competition, Comcast can charge what they want for as little or as slow a service as they wish. Consumers lose.

Sincerely,

Heath Gibson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Competition is the only way to assure good quality and reasonable prices. The merger of the two mega cable companies, Time Warner, and Comcast, will create a behemoth corporation that will be "too big to fail!" Prices will rise, while choice will disappear. Smaller cable companies, serving other areas (like Cablevision) may not be able to survive. As it is, most areas have little or no choice in TV/internet/phone providers-usually one company or Verizon fios. Prices are already skyrocketing and service has declined. We need more providers, with more competition, not fewer.

I have had experience with both Tme Warner in NYC-where I used to live and where my parents currently reside. And I have had experience with Comcast in Philadelphia, where my daughter lives. Both companies are NIGHTMARES to deal with. Though, Cablevision in Bergen County, NJ, is far from a walk in the park, their service and pricing is superior to Tlme Warner and Comcast. I fear that the merger of these two companies will be devastating to customers of both these companies and to many others who may be victims of unintended consequences.

Please do not allow this merger to move forward.

Sincerely,

Robin Feigelis

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast already enjoys a virtual monopoly in the Salt Lake City area. Customer service is non-existent. Allowing these two giants to merge will only insulate the company against legitimate consumer grievances. Cable providers should not be permitted to dominate the national market place for the same reasons that the telephone company was split into smaller, regional companies--increase competition and offer greater choice to the consumer. I am forced to purchase (and support) many stations I never watch while I do not have access to others I would prefer to see added to the lineup.

Sincerely,

Glen Fairclough

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I disagree with the method in which this "sausage" has been made. There are how many millions of US DOLLARS spent by both these behemoth cable TV carriers on lavish lobbying? State-sponsored or federally-enabled monopolies are always bad for the consumer and good for the "fortuitously loopholed" company. Fair competition can only be attained when free of government scale-tipping.

I'll wait to hear back from you - I'd really like to hear an actual total of lobbying dollars these 2 companies have spent in say, the past decade or 5 years or past 2 years or past year.

Fascism: a political system headed by a dictator in which the government controls business & labor and opposition is not permitted.

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Either one of them alone provides the worst customer service by a company that their entire business is based on customers being satisfied with the service provided. Because of the poor service provided by Comcast and its predecessors, we elected to not have cable TV in our home. When we had it the service was poor. I spent over 20 years in the computer service industry and if we had treated our customers the way the cable TV company did us the computer company would have been out of business within a year.

Please do NOT allow Comcast and Time Warner Cable Inc. to combine and form an extremely large company which would by default, become a monopoly.

Respectfully,

Kent Hathaway

Sincerely,

Kent Hathaway

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Two big companies should not merge to become an even larger company. As a consumer, I want companies to compete for my business. The only way this can happen is to have competition. I want to get the best prices I can.

I remember when the telephone companies had all the control. Consumers were at their mercy. I don't want that to happen again.

Sincerely,

Linette Ogle

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Through the years the entire New England charter system has been taking care of its customers. We have tried our hardest to get our services to be top of the line with little to no down time, and so far we have succeeded. Our customers are extremely happy with our techs, call in system, as well as how reliable their services are. If Comcast takes over Time Warner we will get transferred to Comcast and then, the techs would be overworked/hate their job as well as all the hard work we have put into our cable plant will get taken over and essentially destroyed by Comcast to generate more money from customers calling in trouble calls. And lastly, the most important part, the customers will no longer enjoy the high quality services us techs have been working on for so long.

Sincerely,

annymous annymous

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

this will create a huge monopoly, giving them total control over viewers' choices at unbounded pricing. The consumers can not bear up under increased pricing, especially considering the economic down turn. My social security check will certainly not stretch any further. Many seniors in a financial position such as mine, will be disparaged. Entertainment for many of us is the television and/or internet. It also appears that the programming we enjoy now will be regulated and dominated by the political persuasion of Comcast/Time Warner. As an independent, this is a great fear of mine. Monopolies have never been beneficial to the public. The competition for customers, disappears.

Sincerely,

christine anderson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I've had problems with both internet and telephones going out since I first signed on with Comcast. My TV has gone out only twice. But I do not use TV for communication, just the phones and internet. Many times their repairman has come to my home & when they left, invariably the man would assure me that the problem was fixed and would be fine now. Invariably the problem returned in a short time. Many months ago I've stopped even calling them anymore because I know eventually the internet will be reconnected the phones will be operational, both in Comcast's timing. Because they do eventually become functional, I know they have been disconnected by Comcast's own doing. But I always know it'll happen again. If Time Warner is even half as bad as Comcast, this nation is in worse trouble than even I can imagine. If their merger can be prevented, then that should be done for everyone's sake who wants to have decent communication capabilities.

Sincerely,

Billie Waters

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It further concentrates anti-competitiveness among media companies. Both of these major providers, along with their long records of poor customer service, will be in a position to further ignore their viewers' wishes and needs. Business consolidation rarely works in the interests of consumers.

That's what the FCC is all about: protecting the public interest and insuring competitiveness among service providers.

Sincerely,

Frank Hawkinson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I had Comcast before, and dealt with problem after problem with my tv service and internet from them. We had to have them make 3 service calls in one months time due to their shoddy technicians not fixing the internet the first two times. I worked from home at the time, so the service interruption cost me time and money. I am now a Time Warner Cable customer, and I do not want their service to get worse by being bundled under Comcast. Do not allow this, it is horrible for the customer!

Sincerely,

Joseph Jeppson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Too big a company inhibits variety and gives too much power over programming to a few individuals.

Sincerely,

Mary Jane Miller

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

A merger of two of the nation's largest cable companies will ultimately restrict competition, and probably raise cable rates. That will not be in the best interest of the American consumer. Competition is necessary to prevent monopolies that can control which newscasts are permitted on cable, which comedies, which dramas. and which political advertisements. Political ads are essential in a democracy, and cable ads are important in the modern age. Don't try to limit speech by reducing the number of cable operators.

Sincerely,

Hugh Murray

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills.

I believe that businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent, competitive voices like TheBlaze if it furthers their business interests. I urge the FCC to not allow this merger.

Serving the public interest means more choice, more competition and lower cable bills.

Sincerely,

Ramsi Stoker

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It creates way to large an entity and places dominating control of network content in the hands of very few individuals. This is why deregulation was invented. Do not allow Comcast and Time-Warner to merge.

Sincerely,

Brian Fendley

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because no monopoly should be able to say what we can watch.....and that is what will happen if these two merge.

COMPETITION IS THE BEST ANSWER. CAPITALISM WAS BUILT ON COMPETITION. Who ever has the best product will get the business. This can not happen if we have a monopoly.

Sincerely,

Hilda Adams

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The elimination of competition in any field will eventually lead to increased prices, as well as a tendency to lower quality of service, since there is "nowhere to go" for satisfaction of complaints. When any business has no competition, there is the tendency to have the "take it or leave it" attitude. The public suffers in that environment.

Sincerely,

Franklin Warner

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger is not in the public interest. It forms a corporation too large to meet local customer needs and it is in direct conflict with individual freedom at the local level. It is never a good idea to allow the growth of mega corporations, remember how well that has worked for the banking industry and the associated dysfunction of local lending. America is declining as a direct result of too big to fail!!! Also, the politics behind this is destructive to every American, I don't trust the government to put the interests of individuals ahead of corporations.

Sincerely,

Fred Fleming

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Why would you allow two of the biggest cable monopolies to merge? You are supposed to guard against big monopolies so that they cannot put smaller companies out of business and then charge an arm and a leg for their services. I do not believe that it is in my best interest or the public's best interest to do this. I believe that is only in the interest of the government so that they can dictate and control us. So for once do the right thing and think of the people. We are not children but adults that are cable of being in charge of our lives by choosing what we want to hear, say or see. There is no need for you to silence independent and competitive voices like TheBlaze.

If you feel that you must monitor someone monitor yourself and let me live my life the way I see fit for no one else but me. Thank you.

Sincerely,

Joyce Oberlander

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The merger in the past of the telephone companies contributed to the higher costs to families for long distant calling. Only when cell phones became less expensive did the land line costs begin to drop. The added taxes which the FCC would begin to add to providers of cable would continue to rise and the less competition there is, the greater control the government will have over the viewers. I personally wish that the FCC was totally out of both television providing companies as well as telephone companies. It is an invasion of the government into what I consider free enterprise! Stay out of business and let the buyers control what company they want to provide them with programs.

And allowing a merger by two such large companies will eventually cause all TV providers to come under the control of one big monopoly!

Sincerely,

Patricia Barnes

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Every few months for years my owned equipment shows up as equipment I rent from Comcast. Then I have to not only prove my cable router is mine but also prove that I never had one in the first place. Meanwhile, I am charged and cannot get a refund for the months I already paid meaning I have to carefully analyze every months bill. I have had my cable cut when the neighbors was hooked up by the service folks and they refused to hook it back up unless I made an appointment for it taking over a week to have fixed when the service person was still present! I have had issues with canceling my Comcast phone and transferring it to a cell line because they did not hold it as they promised me they would do. When I turned in my phone modem they asked if I wanted to wait for a receipt or just turn the equipment in. I waited for the receipt, good thing too because a week later they called me to tell me I owed them for the equipment. If I had not had the receipt I was told it would have cost me hundreds of dollars meaning the other folks who turned their equipment in on their lunch breaks as I did were more than likely charged for the equipment. I have sat for hours on the phone to have my issues resolved and have even talked to folks at the highest levels in Comcast who told me they knew I had no other options and for me to stop acting as if I did. For this reason I am afraid of repercussion concerning my report of their conduct.

Many of the channels offered by Comcast are inappropriate to even list the title of and I have no way of filtering those titles from my children. Overall, I do not believe Comcast is interested in retaining their customers so much as growing their monopoly.

Regards,

Chris Hall

Sincerely,

Chris H

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I am currently a Comcast customer. The only reason I am a customer is there is not a lot of choice. I live in Oregon. I am surrounded by trees so they interfere with satellite. There is no other choice. I bought my own equipment, cable modem, and it would not work. Comcast customer service will not help me as it is not their equipment. So I am forced to rent their equipment. Also I needed to add a cable line. They were prompt at responding to install, however, I did not want them to drill thru the out side of the house in (and run the ugly cable on the outside of the house). I was willing to pay the extra cost of the instillation. He installed it anyway. Also they had to dig a trench an lay a new line. When they dug the trench they cut thru my sprinkler line. I complained and complained. They never fix the problem and I was stuck with the cost. When I tried turning in my cable box (it wasn't working) the office was always closed even though the sign said they were open. The customer service lady when I finally caught them open, I asked/complained. She was very courteous and polite stating that she was not available and the other lady was on vacation. So they close down?!?! No one else to cover?!?! If these are problems with them now having less of competition will prompt no improvements but expand an unscrupulous company and bad service. I pay for service I do not wish. I have no choice of companies to choose from. A merger of these two companies is not right. Does not promote free market, and punishes the consumer. I request that this merger not be allowed. Thank You.

Sincerely,

John Brannan

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

If this merger proceeds we will have one company producing television with low moral standards, instead of two. This means that there would be one tyrannical spewery of bad television instead of there being two, fundamentally being a check upon the other and allowing the American citizen to choose how much immoral television they choose from either player.

My argument may be found to have been made ad absurdum, but it does make a point.

Sincerely,

Joel Ptacek

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Yes, size alone shouldn't be a reason to not agree with the merger, but wait, Comcast is already toxic to the United States. They do not believe in market practices. Their atrocious customer service attests to that. They do not listen to what people want, such as carrying theblaze, yet they carry a channel that no one cares for? Hi, I'm talking to you, Al-Jazeera. How many people watch you every month? 15 thousand? Come on, theblaze gets that much traffic every few minutes, yet the liberal hacks at Comcast don't care because they're in bed with the Administration. The executives will get hundreds of millions of dollars for this merger, leaving the people with an even bigger behemoth that gives zero craps about their customers.

Besides complaining to you folks at the FCC, there is nothing we can do. Individuals can't just create their own cable company because of your awful regulations. People can't stand up to you all, because you think it's in the public interest to regulate an industry that has favored a few market giants. Isn't that what always happens? High auto regulation gives us worthless bailouts and millions of recalls. And now, the two largest cable companies are merging and you really want to ask if this is a good idea? As is, this industry is not capitalistic in any way and it creates a. Dangerous alliance between politicians and big business.

Wait a second, didn't Comcast hire the biggest lobbying team EVER for this merger? Yeah, they did. For a merger. Okay. If the FCC accepts this, please tell me how much money they gave you to say yes.

Sincerely,

Angel SanMartin

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The stated purpose of the 1996 telecommunications act was, "to provide for a pro-competitive, de-regulatory national policy framework designed to accelerate rapidly private sector deployment of advanced information technologies and services to all Americans by opening all telecommunications markets to competition". Competition is mentioned twice in there. So how did we get to a point where there is no competition to be my cable provider? I have heard a great many derogatory comments about both Comcast and Time Warner Cable while discussing this merger; I don't share this negative assessment. However, I am a Comcast customer and there are occasions where inadequate service is provided. Basic economics tells me that Comcast (and TWC) would be far more inclined to avoid these occasions if they were forced to compete for my business, but instead we today consider merging them into one company and forever precluding that possibility. That is absurd. I encourage the FCC to reject this merger.

Sincerely,

Mark Faust

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I gave up my cable and satellite service because for the price I pay the channel selection was poor, much of the programming uninteresting and sports are an additional cost. Allowing these 2 companies to merge would limit competition. Competition would drive pricing and channel selection. This merger would not be beneficial to the consumer. Until cable offers a package that I can select only the channels I prefer to watch and not be forced into selecting a package deal I will not be subscribing. I want to pay fair price for the channels I want to view.

Sincerely,

Theresa Zachar

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It reduces choices for the public. It creates a monopoly that prevents the consumer from having small private companies the ability to compete with the giant merged company. That reduces our freedom to choose because the smaller companies won't be an option any more. The merger only benefits the big business not the people who want freedom of choice in their programming.

Thank you for not allowing this merger!

Sincerely,

Karen Hall

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

we currently have fewer choices about what we may watch than we should have. Imagine going to a grocery store and being required to purchase a pre-loaded cart of groceries, much of which you don't even want. That is exactly the way TV channels are sold. Allowing the merger of Comcast Corporation and Time Warner Cable Inc. will probably limit consumer choice to a greater extent and drive prices even higher.

Sincerely,

Tom Lottinville

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

when there is a lack of competition then the choices for the public disappear. And that is not good for this country nor the customers. If costs continue to go up, as they will with no competition then seniors like me will have no choice but to give up on cable all together and I am almost there now without this merger.

Sincerely,

Carol Compton

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

basic economics teaches us that mergers are created to escape the competitive discipline which is often uncomfortable and costly to competitors by seeking government intervention and protection. Let's preserve the WEALTH OF OUR NATION and others, which benefit MANY, by opposing this merge that will only benefit Comcast, Time Warner and the "regulators" who support this merge.

Everyone has two choices in life: the RIGHT choice and the wrong choice. Let's begin now, you and I, to make the RIGHT choice in life to preserve our powerful incentive to search for knowledge and heed to the words of Senator Henry Clay, "Of all human powers operating on the affairs of mankind, none is greater than that of competition."

Sincerely,

Ceronda Enocencio

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It's almost impossible to believe that we the people even have to respond to such an intrusion as this. If ever there was a monopoly, this fits the bill. And to beat all, my government is trying to ram this down our throats. Does the government REALLY wonder why the public has lost almost all trust in anything to do with elected or appointed officials? Look at the news, and it's almost on a daily basis that there's something else going on that almost makes you pull your hair out. Glad to see that Comcast changed their crooked little minds regarding the lavish blowout they were going to throw the head knocker at the FCC---til The Blaze found out and let the world know!! If we have this merger rammed down our throats, Comcast/twc will control so much of the information, it'll make "1984" look like a picnic. Their tentacles will continue to grow and gobble up more and more of the media--DOES ANYONE AT THE FCC SEE A GROWING PROBLEM, OR ARE YOU ALL ON THE TAKE???

Sincerely,

Donald Smith

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it lessen's the people's choice and their voice. One of the great things about capitalism is the freedom to choose. Time Warner and Comcast already own enough of the market share of the industry individually, combining them would be a huge mistake, because they would be increasing the likelihood of a monopoly at a later date, which is illegal in the United States. Unfortunately, it's just a matter of time. Monopolies end up hurting the people and the nation. Prices will go up and less people will be willing to do business. Plus, customer service, will continue to get worst. Time Warner and Comcast have different missions, different morals, and different company culture. Combining them would hurt their business, not strengthen it. A Comcast / Time Warner merge would be unbeneficial to anyone in the long run.

Sincerely,

Kathleen Perdue

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The media is already in the back pocket of the Democrat Party. The print media and the major networks are all controlled by liberals and give an obvious left wing bias to everything they do-especially news reporting. Billionaires are trying to buy out anyone who opposes their socialist-communist propaganda. We are losing our constitutional rights to free speech when big corporations try to monopolize the air waves. They have turned my favorite FM radio station in Pittsburgh from news talk programs to country just before the midterm elections. Now they want to shut down any opposing views on TV. We need to hear the truth and all the facts, not another music station to distract us from what is going on. Merging and monopolizing only gives us less freedom of choice and keeps the public uninformed and misinformed about what our government is doing to us.

Sincerely,

William Shawley

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe in freedom of speech. That no one should control what people hear, say or see. Those are our values. I believe that businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent, competitive voices if it furthers their business interests.

The merger is NOT in the public interest !

It would take away more choice, more competition and lower cable bills.

Please do NOT approve this merger! It is NOT in the public interest!

Sincerely,

Karen Mattson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast and Time Warner Cable are monopolies in their respective service areas who will become an even bigger monopoly. I don't receive either service in my area, but would still have to stay with satellite service as they won't let conservative networks like The Blaze have a channel. I also understand that the FCC has regulations that keep new small cable companies from starting.

I also feel that ALL cable and satellite companies charge an excessive amount for their service forcing the consumer to pay for hundreds of channels they don't even view. A large amount of these channels repeat the same programming over and over and over..... Also, infomercials clog the air waves. A viewer after midnight on the west coast (me) has an almost impossible time trying to find a channel without the infomercial unless it's a premium movie channel. Not to mention that there is usually 10-12 minutes out of every 30 minutes of viewing a program that is full of commercials. I don't know why we should have to PAY for anything beyond equipment rental for equipment that doesn't work a good bit of the time. Plus you have to pay an insurance premium to pay for the service call in case it breaks down. As all these companies have very little or any competition, they're just ripping the public off. This merger will only make it worse.

Sincerely,

Betty Barnes

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This country is important to me. It is through freedom and competition that America improves, and stays competitive and strong. I believe I have a right to freedom of choice, and it believe monopolies such as this proposed measure will rob me of my choice, and I will have to pay for this, in my cable bill. Television is already sinking in quality, I do not trust the news of America at all. It is so one sided, and doesn't even talk about what's happening in the world accurately. I watch BBC, for information. Please!

This merger will give too much control over what I am able to see. They do this kind of thing in communist countries, not America.

Barbara

Sincerely,

Barb Tate

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

All types of programming should be available. If you are providing a service that is necessary it should include access to information that reflects the point of view of a variety of people. Give people a choice.

Sincerely,

Linda Slater

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I am sure the customer service with the merger of these two would be terrible. As a ex Comcast customer for ten yes I know of the lack of service provided by them. They were the only cable service provider in the area I was living in at the time. The apartment complex where I hived did not allow dish networks on their buildings.

The lack of programing would not carry the channels I am interested in such as outdoors programing, or a choice of news programing other than the main stream media.

Please keep our ability to receive the choice of programing we wish to watch and listen to which is promised use by our freedom as Americans.

A registered voter,

Howard Snider  
171 N Coulson St.  
Fruita, CO 81521

Sincerely,

Howard Snider

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the merger will be in the public's best interest. Twenty years ago there was only one phone company and our government decided a monopoly was not in the people's best interest. They broke up the phone monopoly and that was to the customer's benefit. Why would we go back to taking away people's choice? I don't want to see this merger go through. Thank you for your consideration.

Sincerely,

Jeanne Ruth

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it is very important for consumers to have real choice, and many choices, as to which cable provider we want to use. I don't believe a company the size of Comcast plus Time Warner Cable would best serve the public because they would too easily buy influence with our state representatives in Washington. If this merger goes through, I believe the newly merged company would be more likely to dictate what is shown on cable and would be more likely not to show what they perceive as a show that would not further their interests. Please be responsible to Americans and do not allow this merger to go through. It would not be in the public's best interest. Thank you.

Sincerely,

Gina DiSanto

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Both are already too big, and don't provide the best customer service. Bills are too high for many customers as well. There is no sense in putting two giant companies together, when even now they don't provide services at a reasonable price. This would just allow unjustified higher prices with no matching services. These companies need to tend to the business and customers they have at this time, not a bigger monopoly.

Sincerely,

Walter Fitzgerald

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills. Why don't you listen to what the public wants and is paying for not what will line your pocket books the most. Customer service has gone and it looks like it will not return if this happens. Why will no one carry The Blaze who has the most followers and want to see it. Not 24 hours of Judge Judy's and all the other lies that other station are putting out. I thought you were to verify your story through several sources not just be the 1st with the non-factual news. If it bleeds it leads even if the story is not right. Look at the Ferguson story over 10 days of lies and finally the source tells the truth and then that is down played. Where is the Benghazi information, Fast and Furious, IRS scandal all put on the back burner hoping the public will forget. Lies, Lies, Lies, every night. The public does not believe the press or this administration which has the press in their pocket.

Sincerely,

Rich Crow

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast representatives have said in hearings to Congress that they are an urban focused company. They should not be allowed to have such a broad influence on what is seen and heard in rural areas as well as our public interest varies greatly from urban areas. if the FCC is interested in the public interest. The FCC should not allow this to happen. Public interest does not equate to control of public viewing.

Sincerely,

Michael Stonehouse

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the consolidation of providers of media to American households eliminates choice and competition. I use the Verizon FIOS service instead of Comcast because the quality of the service up time was worsening, the promised internet speeds were performing much lower than the speeds promised in Comcast's advertising and communications to me and that Comcast did not carry as many HD channel offerings. Only through the competition between the two providers has forced Comcast to attempt to improve their offerings to match Verizon's. Comcast customer service was horrible during my many years with them. I doubt that when the two providers merge their businesses will the public benefit at all. In addition both providers currently produce the content shown on their cable network. Comcast and Time Warner will control the majority of cable plant and equipment, the majority of the content created for consumption by their related companies which lead to almost no choice for the consumer. I am lucky that Verizon is an alternative to Comcast in my location. I receive higher speed internet, wireline phone service that is reliable and much choice in the cable service offerings that meet my family's needs. Other areas of the United State do not have alternative cable providers competing like Verizon. When you look at the benefit to the American citizen for this merger, you do not find any value to the consumer.

Sincerely,

Harry Burgh

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

One cannot help but notice the very "special and intimate" relationship that is being enjoyed between the FCC, POTUS and the Comcast executives particularly this summer as the FCC, Comcast and TWC met with POTUS and discussed the government "need to advise" two companies about to become an overarching media empire should this merger be approved. It is not too difficult to envision this merger leading to a control of a hefty portion of the cable television industry and in the not too distant future Comcast would also have a substantial running start within the telecommunication and Internet industries as well given assets TWC holds in these areas to date.

This merger should be viewed with a wary eye; dissected and scrutinized not only by the FCC but by congress and the American public as well. It is necessary and it is the responsibility of the FCC to prevent a merger that will hog-tie the American viewership in the immediate future and eventually could lead to the future strong-arming of other telecommunication and Internet services providers as well.

I along with tens of thousands of other viewers urge the FCC to permanently deny the request of a merger between Comcast and TWC.

Sincerely,

Jodee Fiorella

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

To: The FCC

We do not believe that a Comcast/Time Warner Cable merger is in the best public interest.

They are two of the biggest cable monopolies with the worst customer service records that, if merged, could dictate what at least 30% of America can see on cable TV. This will mean less choice, less competition and higher cable bills.

Businesses should operate free of government intervention, but these companies are government sanctioned monopolies which will likely have the power to silence independent, competitive voices if it furthers their business interests.

As the FCC you are suppose to regulate communication industries so that they serve the public interest and not special interest! Serving the public interest means more choice, more competition and lower cable bills.

We urge you to NOT approve this merger!! To NOT APPROVE will serve the public's best interest and ensure there is competition, more choice, lower cable bills, and a free flow of ideas!

Thank you!

Maureen and Lee Young

Sincerely,

Maureen and Lee Young

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The historical record shows that Comcast has a terrible reputation/track record for service & delivery to their customers. Most of the comedic jokes about the "cable company", are directly related to poor customer service issues at the hands of this company. Throughout communication legislation, the concepts of "improved service", "cheaper prices", "more options" are always cited as examples to allow the merger of large communication companies. Sadly, all the mergers realistically do is; create large corporations, fueled by the need to make a larger profit to satisfy their shareholders. Big mergers create; less choice, increased costs (often times related to the required infrastructure upgrades), longer wait times for customer service and delivery issues, and diminished options for consumer choices. In the best interest of the consumer, and public-at-large, I urge you not to recommend, or vote in an affirmative fashion, for this cable merger.

Sincerely,

Shawn Todd

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

i do not think it is in the public interest for one company to have so much power to determine what information is accessed by consumers.

Comcast has not shown any willingness to respond to consumer requests to broaden it's viewing options. Already, Comcast has a shown very poor customer service. If Comcast was allowed to become even larger, it is impossible to believe any of these policies would change.

Please do not allow this merger to take place.

Sincerely,

alice callister

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable Merger is in the public interest because the power the media has to influence is already in the hands of too few. Further consolidation of content control, especially in a regulated environment such as the Cable TV industry smacks of government controlled media at best, and at worst represents a easy to annex/co-opt for a would-be tyrant.

Markets have been an American standard for generations. They have served us well, fostering competition and therefore innovation and incentive to keep customers. These principles apply equally as well to the cable TV industry.

Furthermore, cable TV companies also provide internet services to millions of Americans. With little to no competition for a given households business, there has been little impetus to improve those services either. Why spend the money when your customers have nowhere else to go? All you have to be is the second slowest in many markets. Not even that in others. Pure profit. Not that I mind profits, its just when you're paying Caddillac money for a Yugo, something's wrong. This is to say nothing of Comcast's position on net neutrality and the unabashed discrimination of bandwidth based on data types. Comcast illustrates this point rather poignantly with one of the worst customer service records there is.

More voices, not fewer. Encourage competition, variety, and innovation; not stagnation, corruption, and monotony.

Sincerely,

Joshua Roberts

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because... the Comcast/Time Warner merger will dangerously restrict the freedom of choice by fostering tightly controlled, limited press/media/comment coverage to the American public and the world. This is monopolistic or so close to it that this merger should be against the law. The American people are best served by a great variety of press/news/comments that THEY can choose from for THEIR information and comparisons and contrasts in order to REALLY be informed about the news/issues.

In my opinion THE COMCAST/TIME WARNER MERGER WILL SEVERELY RESTRICT THOSE CHOICES !!!

Sincerely,

Jayna Catherine

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

My 94 year old Mother has Comcast at her home and I have Atlantic Broadband at my Condominium. Every 6-12 months, as my Mother's primary caregiver and her son-I am forced by the corrupt Comcast Corporation to call the Executive Offices Of Brian Roberts to get her bill reduced repeatedly because they discriminate against the elderly, widows and disabled.

Because of their Monopoly status in Miami and large portions of the USA, they can change their rates and plans whenever they feel like it. Comcast has a Monopoly on using only their cable boxes rented at whatever charge they decide! They can decide whether we can get The Blaze or Religious CABLE for FREE-or have forced upon us the Democrat Party/Socialist/Left Wing Communist programming of NBC, MSNBC and their other properties that control what the Public is allowed to see and have access to.

Why should a family of ONE 94 year old widow be forced to pay the same monthly price as a young family of 2 adults and 4 children using extremely high data, access and benefits? Why should a corrupt Monopoly tell my Mother to turn in her exclusive Comcast Cable box in her kitchen and just "carry her dinner from the microwave while walking with her cane into her living room to watch TV". This is how this Monopoly makes more money to pay for their acquisitions and paying off the current administration and FCC lackeys.

If the FCC would do their jobs to represent ALL AMERICANS-they would STOP ALL MERGERS and ACQUISITIONS and encourage more competition! The FCC should demand all of the Cable Companies to allow consumers to BUY THEIR OWN CABLE BOXES and/or RENT them from other companies to stop the Monopoly control and unlimited price increases!

Last year when I made my annual call to the CEO's Office of Comcast-it was reported in the media that the CEO was late to Martha's Vineyard for his golfing appointment with the President and his fundraiser for the Democrats.

THIS IS HOW THE CORRUPT FCC AND THE CURRENT ADMINISTRATION OPERATES TO PROTECT THEIR FRIENDS AND BIG DONORS AT COMCAST AND TIME-WARNER WHILE THEY DISCRIMINATE AGAINST 94 YEAR OLD WIDOWS BY CONSTANT PRICE INCREASES TO PAY FOR THEIR DONATIONS, FUND-RAISING AND PAYOFFS (LOBBYING). This is why the ignorant public only get the news and channel choices allowed by the Government and the impotent FCC Staff and Commissioners!

About Comcast Corporation

Comcast Corporation (Nasdaq: CMCSA, CMCSK) is a global media and technology company with two primary businesses, Comcast Cable and NBCUniversal. Comcast Cable is the nation's largest video, high-speed Internet and phone provider to residential customers under the XFINITY brand and also provides these services to businesses. NBCUniversal operates 30 news, entertainment and sports cable networks, the NBC and Telemundo broadcast networks, television production operations, television station groups, Universal Pictures and Universal Parks and Resorts. Visit [www.comcastcorporation.com](http://www.comcastcorporation.com) for more information.

The statements above are from the Comcast Website. My 94 year old Mother is a stockholder. It is obviously against the Public Interest to allow Comcast and Time-Warner to control MORE than they already control! There is no company with such horrible customer service, discrimination and selective choices of what the Public is allow to see. We can have the White House racist Reverend Al Sharpton Show on MSNBC, but not allowed to have Glenn Beck and The Blaze! Stop censorship, unlimited price increases and monopolies!

Sincerely,

Lance Paskewich

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

To much power to influence, public opinion and political sway for their advantage, not the public.

The pricing is already ridiculous and the programming crap, competition is the only leverage. Why another monopoly?

Sincerely,

Rhonda Phillips

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Television used to be Free with rabbit ears. Its an Old Family Tradition to watch T.V.. Since the invention of Television. I Do Not have One Paid extra channel. And its costing me \$193.00 a month. This is insane. I'm disabled and on a Fixed Income. I can't leave my house at times for days. Pretty soon I just won't be able to afford My Cable Bill. Then No T.V. TV was once a free wave in the air. And why should I have to Go Backwards in life to get a cheaper Cable price.?? I've worked hard all my life. I have nice things. I have an LCD HDTV. That's what all TV's are today. And the channels I've watched for years, I would lose to bring down my channels and price to afford. Is that fair.?? I'm 50 years old. I was badly injured in a work accident. So because I was injured and disabled, and can't make a full weeks salary like I used to, Forced, Out of my control to have to be on a fixed income. I would lose the right to watch tv because I cannot any longer afford. Soooo Against anything that will raise my Cable Bill. Its already at a ridiculous price. :(

Sincerely,

frank zwirba

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the American people deserve more service & price choices. Competition gives us that not monopolies. Cable prices have gotten ridiculous and even at that we get channels with tons of commercials and still nothing decent to watch much of the time. It will just bring about the loss of another of our freedoms....freedom of speech and choice.

Sincerely,

JoAnne Panzer

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is my opinion that the Comcast/Time Warner Cable merger is NOT in the public interest for the following reasons:

The increase in the number of households under a single company's control for this type of distribution media would be near, or possibly even exceed thirty percent of all households that have the "physical cable" option. Since cable is one of the main sources of news as well as education and non-fiction information type programming (including channels providing documentary programs), this gives one corporation far too much control of which channels they make available to the public, and those they do not (even as Pay channels). This means that they can, and in fact they DO, literally block channels they don't like for political reasons, even if they would be more popular than most of the channels of this type they now carry. Since politics VERY obviously plays a role in these decisions, I think that several companies already have far too much control over what is available to the public.

Access to Satellite TV does not offset this level of control since it can never, as a function of its delivery media, offer truly affordable high speed (multi-megabit) Internet access along with television programming, forcing households to choose them to afford both TRUE high-speed Internet and cable type channel access. This gives the physical cable companies a VERY large advantage over Satellite companies.

Cable companies who are the only source of 10Mbit or faster Internet in an area should be forced to include all popular U.S sourced NEWS and EDUCATIONAL/INFORMATION channels that are carried on Satellite and other Cable systems with a large subscriber base (a minimum audience could be decided upon by the companies themselves, but all would have to follow the agreement).

Our nation was founded on free speech and equal access to political and educational information, and several of the large cable companies who are the only source of true broadband Internet access are already far too large to retain their ability to block very popular U.S. based news and informational type channels based on their management's political beliefs (whatever they are). Some may want to operate more like the old Soviet Union, but I am quite certain they are small minority of our population.

Sincerely,

Richard Burgess

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Monopolies are not in an individuals intrest unless your playing the board game. In the game; you want to be the winner, with all the properties and with all the money. Achieving that goal one makes deals leaving the other player with a slim chance to win and you the greater because you already have more money and property giving you a more decisive and relaxed feeling. " Why", you ask. Because you control the game and you know your going to win. Real life is no game! Being able to choose what we want and from whom is freedom and AMERICAN the lack thereof is TYRANNY.

Sincerely,

Brad Bates

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Competition gives better service and helps to keep rates down. No merger is in the best interest for the customers who have too few options as it is. Customers should be able to make their own packages and not have to pay for things they don't want and don't use. We don't go to the grocery store and have to take home things we don't eat and don't want. Why are we forced to do so with our TV watching? First cable company to put a REASONABLY priced "pick your own package", WINS. No chance of that happening with fewer and fewer companies to compete.

Sincerely,

Donna Robbins Robbins

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is not only restricting what the subscriber may see on its channels. I had attempted to obtain service from Comcast over a period of several months. Each time I attempted to get service, a Comcast representative made some excuse as to why I could not get service. Each of these excuses was a total lie. The Comcast wiring runs through the middle of my property, yet they continued to make excuses. I ultimately obtained service from Direct TV.

Only after this petition drive commenced did an independent contractor call me to inform me that I was now able to obtain service.

I feel that I was discriminated against for some unknown reason. I also feel that a merger of these giant organization gives them a great opportunity to not only restrict the programming that their subscribers will see, but who will be allowed to be a subscriber. This should not be permitted to occur.

Sincerely,

Robert Hanson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Under this merger, this would mean that a single company would be in control of about 30% of what is viewable on television. If These companies believe in a Free Market and the constitutional right of Freedom of Speech, then they should afford the American people the ability to decide for themselves what they choose to watch, and what they want made available for their viewing.

I hereby humbly request that these companies do not follow through with this merger.

Sincerely,

Kevin Torzala

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It will create a massive monopoly that will allow customer costs to increase dramatically, as well as reducing the competition that drives our free market system. This also means that this enormous new company will be able to ignore customer complaints and determine the programming that is provided. Considering the current track record of the media failing to provide all of the truth, nothing but the truth, and the whole truth; I find this possibility highly disturbing.

Sincerely,

Kacey Van Ness

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The cable TV merger will create a monopoly and drastically limit the choices for American viewers, plus a corporation of this magnitude can easily drive out any smaller cable providers, thus further limiting the public's freedom of speech. America thrives on small businesses. The more we allow behemoth organizations to control our media, the less freedoms we have, the less healthy our economy. Indeed, this may drive consumers to satellite in order to regain their lost freedom of choice.

Sincerely,

Susan Paul

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it just makes common sense. If choices are limited or reduced for electricity, cable providers, or any sector of business where the consumer is in direct contact with that product or service, rates will go up...it always had and it will always continue that way. It is plain economics. Supply and demand will be high but with fewer companies to provide that service, they can take advantage of the consumer and raise rates and even perhaps change programming to manipulate what is viewed to the public.

One of the greatest things about this country we live in and call home is the right to choose and not be cornered into one or two choices. Competition keeps businesses honest and in check. It is very easy for consumers to change services or buy a product from another retailer if they are un-satisfied. By allowing this merger to take place, you are basically saying you do not care for the people who pay your salary nor do you care for this country.

Make the right choice and do not let this merger take place. Empires grow from greed and pettiness.

Sincerely,

Andrew Zarou

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

this will create a complete monopoly in the cable news broadcasting sector. I want to read, hear, and see many differing opinions on subjects, as well as to be able to see different coverage. This merger/buyout would make it too easy for the news to be monopolized and for people to have only one opinion presented. This kind of merger is VERY dangerous to the freedoms we have in this country - including the freedom to "study things out, and make up our own mind" so that we can take what we believe is appropriate action for our families, our towns/cities, our states, and our country. Citizenry needs to be able to make an INFORMED choice - not a "HERE'S WHAT YOU NEED TO BELIEVE" choice. I am VEHEMENTLY opposed to this merger, and will be opposed to ANY merger that takes away my access to differing viewpoints.

If this goes through, we will be given the news that these two companies WANT us to hear, if not immediately, then eventually. If either Comcast or Time Warner Cable wants an additional program creation/station/outlet, etc., either of them could create a new broadcasting program and let the people decide. After all, isn't this what keeps the free market alive and well?? The opposite of a free market, is a CONTROLLED market. Controlled products, controlled prices, controlled delivery - what do all of these have in common? Yep - CONTROL.

Please do NOT allow the merger of these two companies. Competition has always been what has made our country thrive. Conglomerations destroy that ability. Please! Do not allow our nation to become stifled, because two large corporations what to create a monopoly in their best interests!

Sincerely,

Kathy Hall

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Having lived in California for many years I was a comcast cable subscriber. Their horrible customer service caused me to cancel my service with them altogether. I can't imagine a merger of the sort being proposed will result in better service to the consumer and would hope that the rights if the consumer to have options to choose alternate providers when possible will not be severely hampered by allowing this merger to occur. The unfortunate reality is that the cable industry is already so poorly managed, that lumping the two worst providers together seems like a horribly bad decision, and a no brainer to avoid.

Sincerely,

Jarom Petrich

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I take care of all my mother's business, and she has Comcast. Comcast is extremely dysfunctional in customer service, and their right hand never seems to know what the left hand is doing. Anytime I need to contact them, it is extremely exasperating, because it will always mean hours on the phone, disconnects, telling the same story over and over, and then when all is said and done, they don't deliver what they promised! I've dealt with some dysfunctional companies in my days, but you can always count on it, that in time, they will lose sales and figure out they need to treat their customers better. Comcast is by far the worst company I have ever tried to do business with, and that's saying a lot!. Now, to think they are going to have a monopoly which may interfere with the "free market" bringing them into some sort of accountability, is completely unacceptable.

IT IS NOT IN THE PUBLIC'S BEST INTEREST TO ALLOW COMCAST TO MONOPOLIZE; IT IS NEVER IN THE PUBLIC'S BEST INTEREST TO ALLOW TOO MUCH POWER TO ANY ONE COMPANY!

Sincerely,

Marlene Kelley

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

They are monopolizing the market ... pricing is going up and quality is getting worse ... and competition/free market is what will give us Better service and lower our bills ... Comcast cannot be allowed monopolize the market

Sincerely,

vicky Ballester calejo

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

To Whom it May Concern,

I feel strongly this merger between Comcast Corporation and Time Warner Cable Inc. not be allowed owed! Comcast is an avowed urban broadcaster, who say they .they will cater to urban programming. They will eliminate rural broadcasting cannels, as they have done already in CO & NM, and within a few days of cancelling rural productions signed on a Radical Foreign Broadcaster. They do not have U.S. rural folks and those who enjoy good, clean information & entertainment interests at heart! Please make sure that this merger does not happen!!

Strongly Apposed to this merger, Roberta Bockovich

Sincerely,

Roberta Bockovich

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe in free market competition. When one company controls a major portion of a service or business, it is very easy to become the dictator. Competition is a good thing. It keeps everyone on their toes striving to be the best and most creative. This is a win win for everyone.

I have asked several times why Comcast does not carry The Blaze and they always say , "We are working on it" but it has been a long time and I see no movement in that direction. Surely if they can carry Al Jazeera they could find room to carry an American Loving channel like The Blaze!!!

Sincerely,

Nancy Parker

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

we will have less choice as a consumer than we already to. I hate the fact I have to have cable and purchase a bunch of channels I never use. With more competition may we can force them in allowing us to choose what we want to watch. They are able to keep small companies, like The Blaze and Glenn Beck Show just because they want. It is time the FCC stood up for the little guy. This is a pure monopoly!

Sincerely,

Judy Eledge

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger could only reduce competition, limit choice & result in even higher bills for service which is already lacking. Comcast is quickly become a monopoly & if you live in Philadelphia they have a monopoly on the Phillies games. Comcast has stock in the Phillies & we can't see them with other providers. Enough is enough.

Sincerely,

Carole Ackerman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

By approving the Comcast/Time Warner merger the FCC is deliberately creating a huge monopoly within the USA for internet services. This is an abhorrent act perpetrated against every US citizen. We are not a communist country. We thrive on COMPETITION and creation of new small companies who provide good service. US Citizens vote with their dollars by financially supporting good businesses with good service and competitive rates. Allowing a Comcast/Time Warner merger takes that entire principle of open free trade away from the public and will create higher prices and poor customer service by a behemoth internet services company who will have a monopoly with less competition in many areas of the country.

We live in a California area that happens to have TWO electric companies and it is wonderful! Because competition between them has kept our electric rates much lower than most of California. If we only had PG&E for electric service, not only would we have more disruptions in electric service but our monthly bill would be twice as much with essentially no customer service. PG&E forced into competition with a small local electric company has meant everyone in our community benefits.

NO MONOPOLIES NEEDED. We need more business competition and more small companies entering the market thus creating innovation and user advantages.

In fact, our US federal government is also an irresponsible uncaring one entity monopoly utilizing draconian treatment of US citizens. We would certainly give all our family business to a competing federal government if one existed because your huge federal government monopoly does not represent our interests, does not supply effective customer services for our family and is never responsive to our complaints. Our family would certainly vote for and support a US Federal Government 2.0.

Sign us up please for a new US Federal Government 2.0 and NO merger for Comcast/Time Warner.

Sincerely,

Linda Moore

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This creates a major monopoly, which will cut smaller businesses. This is undesirable on every front. Federal controls on what can or cannot be watched is extremely undesirable. Are people in high places looking for ways to lock up people who think for themselves? Government-regulated information is not legal. Government-regulated thinking is not enforceable and not desirable. Is the goal of this merger to increase government controls and punish law-abiding citizens by creating such a merger? If so, then this is a sorry goal. Whatever the claimed goal is, it is still a sorry goal. Whatever is done on this scale seems designed to cast out left - right, conservative - liberal, this -that, and all balances.

Sincerely,

Mary Williamson

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Decreasing competition will stagnate innovation, decrease responsiveness to customer concerns, tend to stagnate investments in infrastructure often made to keep up with service levels of competitors and increase prices for consumers at the same time that service quality drops. Reasonable ownership limits to ensure that a variety of owners and a reasonably large number of owners are in control of entities that control the public airwaves are necessary for the public good.

Sincerely,

D E Oesterle

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

there will be a loss of competition among cable companies. Prices are already rising ridiculously and I'm sure we will see more of the same if this merger is approved. It is also important that independent stations can be added to the programming so other points of view can be disseminated in the community. This merger will certainly not be in the public interest. It concentrates too much power over communications in the hands of a few. We need more diverse providers. Funny that being diverse is promoted in everything except public communication systems. Respectfully, Charlene Pineda

Sincerely,

Charlene Pineda

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Two of the biggest cable monopolies with the reputation as having worst customer service records for their customers will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills. Our bills show gauging their customers as it stands now.

We believe that businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent, competitive voices [such as TheBlaze] if it furthers their business interests. The merger can only be approved if the FCC determines it's in the public interest — OUR interest!!!

So WE the customers are standing together to preserve our principles!

We are now on notice of letting the FCC know that "SERVING THE PUBLIC INTEREST" means MORE CHOICE, MORE COMPETITION AND LOWER CABLE BILLS.

Thank you.

Sincerely,

Helen Carlton

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I will remove my options as a customer and it will form a monopoly just like the old Ma Bell and how we all paid through the nose for phone service because we had no other options. With all of the present options out there today I do not want to go back to one option and one box approach to public TV. Companies like the BLAZE are providing excellent information and programming but, are or can be blocked in the future, by large conglomerates like this could end up to be. We need more options today, not less. Stop this and do not allow it to take place.

Sincerely,

Les LaMotte

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I really think that the merger would make my TV cable availability even more one sided. For example, Comcast gives me no option but to pay to have Al Jazeera and MSNBC available to me and my children, yet denies me access to conservative networks, a situation that I find repugnant in every detail. It is clear to me that Comcast will incline Time Warner even more to programming that suits Comcast's political agenda. Since Comcast has no real cable competition in my area, I am already pretty much stuck with the programming that Comcast chooses to make available, and with the sometimes not so subtle political ideals that Comcast chooses to present.

Sincerely,

Jon Wagner

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't think that a large monopoly of any sort is good for our country. As it pertains to cable TV, it could be very hard for any freedom of speech to be heard if there is one corporation so large that any smaller corporations will be unheard. Our country is so great in that we have free speech and that we can have differing opinions. I love our country and really believe that the diversity is what makes us great. With a corporation as large as Comcast/Time-Warner could be, it will have the potential to drown out differing opinions from them even if that is not their intent. Please consider this when you are looking at the merger. Thank you.

Sincerely,

Judith Focha

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There is no appreciable benefit for the American people if these two companies are allowed to merge. It makes the few choices we have even fewer. Competition protects the citizenry and the market place. Competition brings prices down to the average customer.

There is also less national security when news and information is relegated by fewer broadcasting companies.

There were super companies that attempted to merge in the early 1900's resulting in the Taft Hartley Act and other anti trust legislation to protect the public. The circumstances are the same a hundred years later where a few companies dominate their industry to the detriment of the public. DO NOT ALLOW THIS MERGER TO HAPPEN.

Sincerely,

Charles Behm

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is my hope that the FCC has understanding about how there is too much power given to companies who no longer care about customer service. As an individual, I take pride in doing the best I can to service my customers and I am proud that I can look in the mirror everyday and know that I have done my best as honestly and sincerely as I possibly am able.

When I started in the business world so many years ago, most people and companies took pride in providing the best possible customer service. Today we live in a country where companies and government have become more and more concerned about their agendas and less and less concerned about the people they service. However, I know among the employees in these large companies and government run companies, there are still some people working there who are like me and really care about doing what is right everyday to the best of their ability no matter what others may think. It is my hope that those working for the FCC are a group of these same type of people. People who stand up for what is right and not for who threatens the most or gives the most money to get their way. I hope it is you who I am reaching and that you will make a difference and stop this merger with Time Warner and Comcast - we have too many people in control of our lives already. These people don't care about us or the consequences of their behaviors. Please make a difference and stand strong, be strong, have integrity do what is right and stop this merge. It is time for companies to put their paying customers first, not their agenda. You can make a difference by stopping this. It is horrible and I am sure you must

feel the same way. These are only cable stations and they already don't service all the public with shows they desire to watch - I hate to see what will happen with the merge. I had Time Warner and they wouldn't even put on a few channels that I loved and I new would be very popular. I truly hate to see what the merge would do to all of us. Remember, at the end of the day, someday your job will be over and hopefully, you will be able to look back and be grateful that you had the courage to do the right thing - serve the people, not serve those who simply want their agendas taken care of at the cost of all of us, including you.

Thank you for hearing me out. Please take a stand for us and do what is right. The people are not receiving stations they enjoy watching. Cable today serves a few not all Americans.

Sincerely,

Donna Hollenbeck

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is a proven fact that The more competition that exists (for a given product, service, etc.) produces a better quality product at a cheaper prices for the consumer. One only has to look at some of the previous forced break-ups in large businesses: the old ATT telephone system and the Old Standard Oil Company.

The resulting smaller companies did advanced research & development to produce products tailored for their respective ares of esrvice, and which other competitors were able to improve and better serve their respective customer needs and desires.

Please remember the old Taft-Hartley Act, and what benefits were produced by keeping companies small and competitive.

Sincerely;

C. W. Schreiber

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast has tested consumer data caps, which can reduce the ability of people to watch as much streamed entertainment over the Internet as they would like. According to The Consumerist, Netflix streaming speeds for Comcast have dropped sharply. If the merger is consummated, Time Warner Cable customers will likely have the same terms as Comcast customers.

Suffice it to say, with a market share of close to 30 percent, the combined entity would have a greater ability to put pressure on programmers and push the industry to satisfy its interests and not necessarily those of consumers.

Sincerely,

Robert Broun

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger would be a nightmare! There aren't enough choices available as it is. More competition is needed not less. You'll find very few customers that are totally satisfied with Comcast. The service, price and or equipment, who wouldn't want to modify some of it in some way. I for one would rather pay for only the channels I watch. I'm personally aware of write-in requests that garner large numbers of signatures for certain channel(s) that get no response. Then other channels added based on no customer requests. It is this kind of service or lack thereof that demonstrates the need for more competition not less. I remember AT&T was broken up for less of a monopoly. This to me, is so obvious, I'm not even sure why there is any debate!

Sincerely,

Lee French

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Diversity of what viewers watch will become centralized, and controlled by a single Entity.

Furthermore, it will also greatly limit the film industry due to the fact that one single company would be the only gateway to express visual arts in broadcast TV Shows, TV Networks, as well as Movies.

Allowing Comcast or any business to control the market and become a monopoly has never proven to benefit the American people and would destroy America's free market economy.

As history has shown us time and time again, giving too much power to any one entity has led to dictatorship;

taking away of our most precious freedom, the freedom of Choice.

Sincerely,

Jan Jorell Dormond

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I've had TWC for several years and have never been completely satisfied. I've tried ATT as well and I like it even less.

Any merger between large companies like this can't be good for the public. Friends of mine have used Comcast, and they are not happy either. Combine two like companies and produce one mega monopoly that will be worse.

Sincerely,

Kirby Hudson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There is no reason to make things more unfair than they already are. It is not fair to slap everyone in the face and make a monopoly so these companies not only have a monopoly but they get richer while shafting every one else. Level the playing field.

Sincerely,

Sandra Jackson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

this merger will be an infringement on the rights of the people to be the voice of what we watch on television. The FCC has a responsibility to ensure that the rich and powerful who own these large cable companies do not have a monopoly over the choices of what we see on Television. The little guys who have a different voice need to have equal opportunity to get their message out and those of us who want to hear what they have to say and see what they have to offer deserve to have the opportunity to do so. I ask you, the members of the FCC to deny the merger of Comcast and Time Warner. Thank you.

Sincerely,

Connie Jensen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I do not believe the merger is in the public's best interests because of the possibility of monopolistic acrimony. What I mean is if this merger is allowed to go through, the mega corporation will tell people what they will watch by limiting viewing choice and the privilege of maintaining that choice. The amount of personal customer feedback can and has already been ignored and distorted in their customer service surveys.

Another reason is the new corporation to charge whatever they want and their base will not have any say. You're locked into a package and we have the right to charge whatever we want without you having the chance to react. They can and do this now as two separate companies, what is to stop the merged one to excessively abuse the customer by making it almost impossible to comment or complain.

Finally, the rights of the individual customer may be ignored or infringe upon by a polyglot by the very act of no say in the merger in the first place.

Sincerely,

david Parker

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I currently have DISH network because Time warner won't run cable lines in my area. I would like to more options with companies that are more willing to serve the public for what they, we, want. I have had cable service by time warner in the past and prices were high but I did like the package deals available that aren't offered by Dish. I t would be nice to have the ability to choose a cable provider that not only offers want I want ( the Blaze) but also at reasonable rates. Allow US to make the choice!

Thank you

Sincerely,

Stephen Pilley

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

IN THE DAYS WHEN GENTRIFICATION WAS SUPPOSED TO HELP ,,IT DID NOT WORK ONCE A COMPANY MONOPOLIZES AN ENTIRE EMPIRE. THUS THE PEOPLE HAVE NO OTHER CHOICE OR GO WITH OUT, THE RATES FOR CABLE RIGHT NOW IN THIS AREA ARE ALREADY BAD., NOW WITH A MODEM AND 70 CHANNELS AND IINTERNET THIS IS \$150.00 ADD PHONE AND ITS \$200.00 OR MORE, . I AM A SENIOR ON A VERY FIXED INCOME LAST YEAR I CALLED TO HAVE IT TURNED OFF I WAS PAYING \$210.00 WITH PHONE. I GOT A LIFELINE PHONE NOW AND BECAUSE I AM ON O2 AND HAVE CANCER. I COULD NOT AFFORD TIME WARNER'S RATES. THEY UNDERSTOOD AND .I CUT DOWN TO BASIC CABLE 19 CHANNELS WHICH HAS NOTHING, I COULDN'T EVEN WATCH FOX NEWS OR CNN OR SEE ANYTHING ACCEPT THEIR Y NEWS. I WAS PAYING ALMOST \$100.00 . THE PROBLEM WITH THESE COMPANIES COMBINING IS NO MATTER WHAT WE SAY IT WON'T MATTER, . I FINALLY JUST GOT NETFLIX'S FOR 899 A MONTH AND INTERNET ONLY FROM TIME WARNER.. NOW IF THESE COMPANIES CONGLOMORATE IT WILL BE OUT OF ANY OF OUR CONTROL. IF WE HAVE CHOICE WE HAVE FREEDOM TO WATCH WHAT WE YES WE LIKE. NOW SAYING THAT, AND WITH THE WAY OUR WORLD HAS CHANGED, SUCH AS NO RELIGION FOR CHILDREN ,, NO BLESS YOU,, IT WILL IN FACT BE AS I SAID OUT OF OUR CONTROL.... PROBABLY TO THE POIINT OF NO SUNDAY CHURCH THAT PEOPLE WATCH AND ALSO ANY RELIGIOUS PROGRAMING WILL MOST LIKELY DISAPPEAR I REMEMBER THEY STOPPED ALCOHOL ADDS AND CIGARETTE ADDS AND CALL JOY FOR A GOOD TIME,,, WELL I HAVE BEEN SEEING SOME OF THESE LATE NIGHT AGAIN ODD

ISN'T IT? WHEN I WAS IN THE HOSPITAL I CAUGHT SOME AS I AM, A NIGHT OWL AND MY CHEMO-THERAPY CAUSED KIDNEY PROBLEMS SO THAT IS HOW I SAW THEM. SO BACK TO REALITY DON'T ALLOW THEM TO MERGE BECAUSE IF THEY DO THE PRICES WILL DOUBLE AND THOUGH THE INTERNET IS FUN SOME USE IT FOR JOBS. HOWEVER NO ONE WILL BE ABLE TO ENJOY IT BECAUSE IT WILL BE NON- AFFORDABLE FOR MANY WHO ARE NOT ABLE TO PAY AS IT IS NOW.. I SEE AMERICA IS IN TROUBLE ALL READY WAKE UP AMERICA BECAUSE SOON IT WILL BE TOO LATE AND FOR THAT MATTER WE NEED TO MAKE A STAND NOW. THANK YOU

Sincerely,

ROSE FORSYTHE

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it is not in the public interest to allow two behemoth cable companies to merge and reduce competition, forming a huge monopoly. The American people should have choices available as to who we want to hear and watch. As huge monopolies grow even larger, choices are reduced and the public cost goes up. Comcast and Time Warner are sanctioned by government and should not be allowed to grow ever larger having the power to squash smaller companies who they feel might hurt their business interests.

Just as the monopoly that was AT and T was broken up years ago, it would be unwise and clearly not in the public interest to allow them to merge. Time Warner and Comcast have dismal records of customer service. Please do not allow this merger.

thank you.

Sincerely,

kenneth guthrie

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is owned and operated by oppressive, propaganda leaning people and want to control what we can and can't see, such as "The Blaze". They are already impossible to deal with when they make an error and they should be reeled in, not expanded. They should be put in a position where the customers they take advantage of and mistreat can switch to a better company. I am constantly calling different cable companies to switch to if they will ever get in this area and compete. I don't like what Comcast stands for and I hate providing them with a profit to further their agenda which is against my values.

Thank you for a just decision, it's the right thing to do.

Danny Prince

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe the percentage of subscribers that Comcast would have if this merger is allowed is definitely grounds of being the initial steps of a monopoly. They would have control of almost half the cable subscribers of the country that controls the operation of a broadcasting network with bias political viewpoints. If AT&T was not approved to take over T-Mobile, then this merger should not be considered as well.

Sincerely,

thomas dawson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As Americans, we believe in freedom of speech. That no one should control what people hear, say or see. Those are our values.

In February Comcast announced it was going to buy Time Warner Cable. Think about that for a minute: Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills.

I believe that businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent, competitive voices if it furthers their business interests. The merger can only be approved if the FCC determines it's in the public interest.

So what can you do? Let's stand together and preserve our principles!

Let the FCC know that serving the public interest means more choice, more competition and lower cable bills.

Let your voice be heard. TAKE ACTION!

Thank you for your support! Together we are making a difference!

Sincerely,

William Smith

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

to much power over what America can hear and see by one company is certainly not fair and balanced, especially when the ones in power are associated with certain ideology. This puts into place an overwhelming possibility for an old fashioned "book burning". Remember we used to be the home of the "Free and the Brave".

Sincerely,

Julie Bradley

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Because we as citizens should have Freedom of Speech and the airwaves. It is one of our most important freedoms. We should have a choice in what is allowed to be broadcast over the airwaves. We would also like to request that The Blaze be broadcast on these cable companies' line up just like Al Jazeera is. We do not want others picking out what we are allowed to listen to. One of the reasons we cancelled our cable subscription to Time Warner is because we could not get Glenn Beck and The Blaze but we could get Al Jazeera. We don't want our enemies to have this kind of access into our American homes.

thank you

Sincerely,

Ken Paulette Fricker

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

From my current perspective being a comcast customer it would not serve me well or the American people to allow the merger of these two giant customers.

This action if allowed would stifle competition and lock other cable enterprises and start up alternative cable companies out of several large markets.

I think historically these mega mergers where the two dominant companies in a particular field, particularly a service provider type of business,

will typically lead to higher costs for everyone and a decreased level of service.

it is virtually impossible now to get a Comcast rep on the phone under 20 minutes to help with a customer service issue.

The bundling of services as a cost savings is a myth, a marketing tool, that these large mega merger companies use to confuse and rip off their customers.

I'm asking for a review and a rejection of this potential merger.

Steve Fortmann

Sincerely,

Steve Fortmann

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

With only a few people making the choices for many. who is the one making the choices the guy making all choices loves broccoli and we hate broccoli were stuck with what your serving. the high school kids of this nation they reject Michelle Obamas school lunch programs and school officials are throwing away food at a record level don't throw away our choice just because a few decide in a rep republic if we don't like it we can vote a dirt ball out of office every couple years, With comcast time warner merger we can't get rid of it in couple years this we are just stuck with it with no remedy to correct the dictator throw someone out they own it

Sincerely,

George Barker

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Cable prices are out of control.....more competition is required. I've had to fight comcast every time I've used them to get proper service, billing issues, and they even put a collection on my credit without notifying me. It was for equipment they said I didn't return which I did. I had receipts, and finally had to hire an attorney to remove the collection because their customer service was too stupid to remove. Frankly, I think they charge everyone for equipment for more revenue.

Sincerely,

Stuart Jacobs

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The merger of two very large companies will limit the scope of interest and variety that would be offered by those companies as stand alines.

They would follow a single path without diverging into separate areas of programming to attract, keep and satisfy the needs and values of their customers.

Comcast would do well to improve their service to their known and constant customers rather than venturing into a larger market.

Thank you

Angela McDonnell

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I do not believe the Comcast/Time Warner Cable merger is in the public interest because this would form an overly large company with too much power to control what people can watch. These companies have an extreme left leaning ideology, carrying Russia Today, Al Jazeera, and all the liberal U. S. networks no matter what the ratings of these networks are. But, they refuse to carry The Blaze and are in the process of dropping or limiting viewing of RFDTV and Family Net. They should be making all views available and let the consumer decide. Thank you.

Sincerely,

Sheldon Bergman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It seems to me that the government was involved in the separation of MaBell many years ago because they were too big.

Now we have 2 very large cable companies mergeing to become a monopoly. What on earth are you thinking?

Will the FCC dictate what the menu will be or will the government have their hands involved in what the people should see and hear?

So, if you give Comcast and Warner the okay to merge, the FCC can dictate (as you do today) what companies will be on cable with the

government doing the sanctions? And, screw the independent voices for freedom of speech!. " WOW " I say again

"WOW" Are you the "ALMIGHTY ONES"?

Don't you get what the voices in Washington are doing to our FREEDOMS?

I love my cable programs that's the only TV that I watch. Fox News is on in my house all day. They are the only TV news network that you can trust on TV today to report all the news. The O'reilly, I wish you would consider the Glenn Beck Show, but again you'er one of the " GOOD OLE BOY'S CIUB members.

You will have it your way once again along with Washington on this issur.

Your merger is not in my interest!

Sincerely,

constance p steel

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it would provide the consumer with few/no options on providers and no competitiveness in pricing which means they can charge whatever they want. Monopoly is monopoly and should not be allowed to happen.

Sincerely,

Terri Marsh

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because both companies routinely ignore their customers concerns. There is not enough competition in the cable industry now and a merger will reduce that competition. I believe this merger will be the beginning of a monopoly if allowed to happen.

Sincerely,

Norman Coleman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe the public interest is served with more choice not more control. I am concerned that less independent thought will be available and we will become less and less truly informed. These monopolies are frightening because they determine what is best for me and not allowing the market to work more freely.

Sincerely,

Diane Winston

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Dear Friends,

As Americans, we believe in freedom of speech. That no one should control what people hear, say or see. Those are our values.

In February Comcast announced it was going to buy Time Warner Cable. Think about that for a minute: Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills.

I believe that businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent, competitive voices. Please do not allow this to happen and deny the merger in the interest of the public. Thank You.

Sincerely,

Terry Leddy

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it is limiting the choice of who to choose from and if they were the on It provider in the area , they could set price to high to be affordable. Multiple choice keeps the competition of prices lower. It also cause them to provide the best service to the customer. For years there was only on cable provider in this area and if you need service it was hit or miss with getting it. And when getting it they really never solved the problem.

I want a cable provider who is going to listen. The bigger the company the less they listen to what the customer wants. I want to be able to watch on TV and not on the laptop the programs I like with my family.

Sincerely,

Kath Hoelzlhammer

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The merger is a bad idea because giving more power to an entity that does not listen to its customer base is a bad idea.

I am forced to pay for many services that I do not want or need because Comcast refuses to let me choose my packages (other than 3 standard ones that offer a large number of channels I never watch). I have over 300 channels and only watch about 25 of them. Please do not allow this merger.

Sincerely,

Chris Sealy

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast continuously has problems with their equipment. Almost everytime there is a storm the main digital cable box has to be replaced. We were supposed to get a new line into our house months ago because they said it was sending weak signals. They didn't show up for the appointment and when I called they said it would be nearly two weeks before I could get another appointment. They immediately put a \$65 charge on my bill. They also said they couldn't give me a time for the appointment day, sometime before 8:00 pm. So I canceled and demanded they take the charge off my bill. Their commercials on tv and reality are two opposite things.

Sincerely,

Peggy Ford

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I moved my service to Dish because Time Warner lied to me about being in negotiations with Blaze TV. They never intended to listen to me as a customer . I can't imagine how this merger would benefit me as a consumer and customer. Giving less choice to the many held by the few at the top benefits only the few.

Sincerely,

Sandra Dodd

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

They're too big - the monopoly of AT&T way back when made sense - as the needed infrastructure was lacking. Now it's all there - keep 'em broke and break up their local "monopolies" as well - I can't even GET Time Warner so in my area Comcast HAS a monopoly

Sincerely,

Clayton Zirkle

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I am currently a customer of Comcast and frankly their content is far too controlled and focused more around their own brand. Merger between them and Time Warner somewhat forms a monopoly on Time Warner and Comcast content only and does not give enough variety to other businesses and other content. On the political side of things they also control too much of the content that comes out of the broadcasts to be very one sided in its view. Their control of information eventually leads to control over people's decisions which I still can be very dangerous. A merger like the one they're about to make can change how broadcasting works especially in how they set pricing and how they also charge any of their competitors to be allowed on any of their channels. I don't think it will be a very fair business and it's already warm that is unpopular amongst most Americans. No I do not believe that the FCC should have power to say yes or no however I do think some government pressure on them and on their content could be beneficial. In the end however the business is theirs and how they conduct their business as long as it's legal is perfectly fine. But as an American and as a consumer I think my voice should still be heard so that way they can hear what the American people think and that way they can hopefully conduct their business in a way that will bring them favorable views. However as businesses get bigger and merge into even greater conglomerates I think we face monopoly type issues that were faced earlier on in our nations history which can completely control markets and it can cause price gouging among other major issues.

Sincerely,

Spencer Bawden

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't think it will be in the best interest of the public Time Warner will be more able to control the air waves and what is seen on TV and cornering the market only will increase cost for the Millions of consumers. and limit the choices or providers to the public and when that happens it's never a good thing.

Sincerely,

Anthony Benedetto

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

of several reasons. There's not enough competition in the cable business now. Comcast buying Time-Warner will only exacerbate the problem. Higher prices to the consumer will most certainly be consequence of this merger. Additionally Comcast's current customer service is suspect at best. Owning two properties that are serviced by Comcast we have had issues with both billing and consistent delivery of service. I also have a grave concern that political favoritism may be playing a greater role in this process than what's best for the public at large.

Sincerely,

John P McNickle

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It limits choice, thereby reducing freedom of individuals.

In addition, no company should be given the power to force  
customers to pay higher rates. There needs to be more  
competition in this industry, not less!

Sincerely,

Christena Reeder

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

decreasing competition is always a problem. And, the people who wanted Comcast, would now be with another company and vice versa. Since many companies are having trouble staying afloat, the FCC should be thinking of tax breaks and other incentives to help American companies want to do business in America.

Sincerely,

Barbara Delery

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

for one the current cable companies give packages that are also filled with undesirable programming that is not even wanted within a household. Thus the packages we have to take whereby out of numerous choices really only give us a choice of very few decent programming that we would prefer. We have to take the "good, the bad and the worst ugly in selection in order to have only the "good".

To put a merger of this sort together will drastically make desirable programming more harder to achieve our personal selections as it would appear a "monopoly" would be the result and elimination of "choice" which is good for all.

We all know the more companies for purchase of products gives the consumer a choice of where to do business. By merging more of our cable affiliates together, this drastically cuts the viewing consumer to a very limited field.

We therefore highly request that this merger be given utmost thoughts as to the long term ramifications of getting down to only a couple companies owning all the rights under this type action. Not good for consumers, not good for America. Control of these means of communication also very much limits the ability of the viewer to get a more rounded service coming into the homes...thus control of content and all media would be in the control of very few instead of the diversity of ownership of these companies. This type merger is not in the "best interest" of our America.

Respectfully, Ken Kenworthy

Sincerely,

Ken Kenworthy

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I used to use Comcast as my cable provider. I stopped because they kept dropping channels from the package I had with them. I felt like they were very willing to take my money, just not willing to provide the services they had promised. Eventually they dropped channels that my family watched a lot, so we switched to Verizon, at a higher cost to us. I know I have better service now as well as having all the channels I want and pay for. Comcast had a good record when I was younger, but as I grew up and watched the industry change, I saw them slack off and get greedy. Time Warner Cable has a bad reputation as well, does it really seem that putting two bad companies together would be a good idea?

Sincerely,

Daniel Hofmann

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It seems a monopoly is OK as long as you have friends in political power. It is not OK this government broke up telephone company; ie. Ma bell into baby bells. You said Microsoft was too powerful. Now a super TV company that will edit the news and restrict speech to whatever political party helped it become the beast it's asking to be, and tells this new monster just what to say. If you thought Americans didn't trust you before do this and see what happens.

Sincerely,

Roy Long

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

...it drives up the cost of the product. With little or no competition, it allows the company to set a price at whatever amount they'd like, which is not in the best interest of the consumer. It also gives us less options as to what WE want to watch.

Sincerely,

Merri Darling

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Allowing two of the biggest cable companies (with reputations for very poor customer service) in the US to merge will stifle competition and limit choice, resulting in higher prices for poorer service. This is not in the best interest of the public.

Sincerely,

Loren Lorenz

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills.

I believe that businesses should operate free of

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Already Comcast rates have gone up innumerable times since we started doing business with them. There is no comparable service already and bundling is arranged so we must pay more for Fox and other popular channels. MORE comparable competition is w

Sincerely,

sylvia phillips

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It monopolizes the market which makes prices higher and higher, to where people will not be able to pay for it. We are subject to their programming whether or not we agree with it. The History Channel shows garage sales, duck hunters, and swamp people.

Sincerely,

Terri Culmone

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger will allow one the largest monopolies that will not allow fair media coverage ever. I am one of many that is sick & tired of the backstreet deals!!!!!!!!!!!!

Sincerely,

Clint Worman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The cable prices are way too high for what we are getting. There is too much sports channels. I would like to see The Blaze/Glenn Beck as one of your channels. Then I would feel like I was getting something for my money

Sincerely,

Terry Larrabee

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Television distribution in the United States is broken. The system denies consumers reasonable choices at affordable prices. Comcast's proposed acquisition of Time Warner Cable will make a dismally performing and anticompetitive industry even worse.

Comc

Sincerely,

DR LARRY PAYNE

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The cable companies have almost a complete monopoly over the cable serve. They have bundled telephone, internet on demand etc. and there is little choice for the consumer. They will only get more arrogant if they get any bigger!

Thanks

Ken Davis

Sincerely,

Ken Davis

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

... I hate monopolies. They NEVER favor the end user and serve our interests. We have a democracy that favors the free enterprise system FOR A REASON. I don't have any trust in Time – Warner as a corporation who will have any concern for the public interest

Sincerely,

Dave Williamson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Both Companies are both already too large and merged together as one entity there would be significantly reduced opportunity for other entrepreneurial cable companies to start up. They don't need big government support by giving them additional power over

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe in diversity of thought, and such a merger puts too much power in too few hands.

Sincerely,

Robert Gruen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Free market competition will be stifled, and cable fees will increase across too large a consumer sector; namely the one where only those two companies provide service... We'll all be forced to try Dish-Net or Direct-TV!!!

Sincerely,

Steven Neal

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe that businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent, competitive voices if it furthers their business interests. That is too much power.

Sincerely,

Arlene Pearson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is not in the public interest to have fewer choices. This merger would create fewer choices!  
Competition offers more choices and therefore creates innovations which in turn can produce lower  
rates for the public. Competition also insures more than onl

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it creates a monopoly and monopolies have too much power and control. With many cable choices you have competition, which allows the consumer to choose the cable provider that best meets his wants and needs. A monopoly is too much like a dictatorship.

Sincerely,

Pamela LeClair

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Because I prefer choice over big conglomerates joining together. The bigger the company gets the less choices we have and the more it costs. If I have to pay for Al Jazeera I want the Blaze network on my cable choices.

Sincerely,

Diane Elmore

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It would negate the need for or of competition and better service as well as create a monopoly!

Sincerely,

Richard Johnson

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

there will be no competition. Our cable bill started at \$39.00. The bill is now \$66.96 and several stations that were on our cable in 15 years ago are now not included but the price keeps going up for the same Time Warner Cable company every year.

If this

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

When a single company dictates what 1/5 of cable viewers are able to see on TV, the public is very poorly served. Less competition historically means higher costs and less diversity of content. Besides, a significant percentage of Comcast viewers have swi

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Time warner and Comcast are trying to form a monopoly. They also refuse to carry The Blaze. I believe we should have a choice. The bad service for Comcast and time warner is already a fact. I will stay with Dish tv.

Sincerely,

Lois Kern

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The creation of this new entity will limit my choices, limit competition and will likely increase the cost of cable television.

The FCC's responsibility is to serve the interest of the public. With that, serving the public interest means more choice, mo

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

it's too big. As a paying customer, my choices will be limited and decided by a large corporate entity that has political influence that he wants to maintain at my expense. I want choice, competition, and options for which service I select. Competition

Sincerely,

vicki hiscutt

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

this is not a fair, competitive industry. Regulation has kept small competitors from growing and favors large cable operators. This merger does not support the best interests of the public or their customers.

Sincerely,

Dan Gray

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It gives too much of a monopoly to one company. which will make it harder for people to get a fair price,  
& competition to keep their cable bills low and have a choice the programming that they are able to see.  
against this mUrage

Sincerely,

daniel atkins

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because it will create a monopoly on a lot of little guys. This is not in the consumers interest.

Sincerely,

Alex Ilyin

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It is vital that there be freedom for competition giving the public choices without government intervention. Monopolies also force prices and fees to escalate which is detrimental to seniors and the less affluent.

Sincerely,

Martha Bobo

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Based on every customer satisfaction survey I recall seeing, Comcast and Time Warner have been at the bottom of the rankings. How will putting these historically poorly performing companies together actually result in better customer satisfaction? Like

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It puts too much control in the hands of one media organization, people should have the right to hear multiple view points. Also this creates the enviroment for them to not only have a monopoly in the industry , but for them to take advantage of the situation by not only raising prices, but also put smaller startup companies out of business. With little to no competition their already poor service is just bound to get even worse also. There are so many negatives here I can't even begin to understand why the FCC would even entertain the idea of a merger.

Sincerely,

Marc Keeton

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe competition in the marketplace better serves the public interest. The history of the free market system has proven that having more companies competing for my dollars for their goods and/or services has proven to help bring prices down to affordable rates so more people can be served.

For these reasons, please do not allow the merger of Comcast and Time Warner cable companies.

Thank you,

Diane Ferrante

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

One, less and less people have more and more control over what Americans see. Two, Comcast has a record of refusing advertisers, apparently on the basis of political and social ideals. While I defend a businesses right to refuse service to whomever they choose, I do not believe that rewarding such actions is good. The fact is, TV is a powerful and influential tool with which come great responsibility. Comcast has show their willingness to undermine the Constitution, by refusing firearms commercials, this, in my opinion, shows Comcast is not good for the public and therefore furthering their influence and power by allowing them to aquire Time Warner, is not in the publics best interest, especially at a time when the Constitution is being trampled by both political parties.

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Each company in and of itself is a leviathan that refuses to respond to the desires of its customers. If they are allowed to merge, their power will only grow stronger, and our voices -- we, their customers -- will get weaker. I was *\*disgusted\** when I found out that my cable company, Comcast, paid for a lavish party for the chairman of the FCC *\*while the merger is under review\** by this same person! To say that this is a conflict of interest does not *\*begin\** to cover the impropriety of this action! Why is it that Comcast carries Al Jazeera TV -- a "network" with a mere 17,000 viewers *\*a month\** -- when they refuse to carry the Blaze TV, which *\*without\** cable distribution has millions of viewers? It is certainly not a business decision; it *\*must\** be ideological. I want to be able to get the Blaze TV and other channels, but Comcast obviously has no fear that the government will pressure them to listen to their customers -- certainly not when they have such a cozy relationship with the very regulatory body that oversees their industry! PLEASE listen to us -- the people -- and do NOT allow this merger to go through. Respectfully yours, Patrick S. Smith, New Jersey

Sincerely,

Patrick Smith

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Merging large corporations effects customer service. Comcast notoriously has horrible service. Plus there are limits to what cable providers are available to you depending on where you live which would basically force a lot of patrons to switch to Comcast against their will. This merging will be a nightmare. As a Time Warner customer, I would have to switch to a private ISP and rely on Netflix to watch any shows because I refuse to be a Comcast customer.

Sincerely,

Victor Trevino

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the merge will obstruct personal choice from television viewers around the globe. When you monopolize viewership, ironically, diversity of thought is thwarted not encouraged.

Sincerely,

Felicia Cavallini

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

their combined corporate scope would control such a large part of the market as to be a monopoly. This is not in the best interest of consumers. Yes, Comcast gives us 200 plus channels, but most are not used. Consumers need control over which channels they actually use and want. We actually would choose very few and should only have to pay for the ones we use. In addition, we wish to pay for programming not advertising. We need more competition, not less. That would drive the cost down and allow the consumer and not the Comcast/ Time Warner to dictate what we watch or not watch.

Sincerely,

Michael

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is already so big it does not listen to it's customers.

Service is poor and many times the customer representative you talk to is rude and has a take it or leave it attitude.

They have shows I really do not want like Al-Jazier but yet will not add a balance show like the Blaze.

Even when I go to the office to talk to Comcast representative they are somewhat hostile.

The more customers are forced to go to one company and choice is removed the less responsive that company gets.

This merger is not in any way beneficial to the public.

Do not allow it!

Sincerely,

Robert Vail

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger would reduce competition in the Cable-provider sector . Less competition is not good for the consumer.

Comcast has not demonstrated a consumer-friendly working relationship with their customers and have not voiced how

this merger would provide ' better and more economical ' plan for the consumer.

Significant control of content in the cable markets they serve, reducing choice for the consumer.

In the government monitored and licensing cable industry, less competition could skew content.

Comcast relationship with government and it's officials concerns me.

Sincerely,

Kurt Youngman

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The impact of two of the three largest cable companies being merged will have a direct impact on the cost of cable service with increase in the cost of subscribing for this service. As a Verizon FIOS customer, the cost of my service has increased by \$50/month in the last year even with the existence of Comcast as a competitive option (Time Warner not available in my geographical area). With this proposed merger, fewer options for people across the country will mean higher prices for the same services, not to mention that there are parts of the country where Verizon FIOS is still not available, leaving only one company as sole source of service if this merger goes through. This will make an existing bad economy worse!!

Sincerely,

James Bachand

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Dear Sir or Madam,

I don't believe Comcast has any interest in what it's paying customers want to view.

A merger with Time Warner is a huge mistake! It will give Comcast/Time Warner the license to

do whatever they want with no regard to us the American public! I have called numerous times

& asked for The Blaze network to be in our programing. I have been laughed at lied to with the same result- "we do not have

/the Blaze in your area. Why is it that we cannot get the programing we desire? It is because Comcast has it's own agenda.

Please Do Not allow this merger to take place! We are losing our freedom of speech! Know that we will not let this go lightly.

Sincerely, Cindy Poulsen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Their merger would make even more difficult to view new programming that I know is available, and I would like to see, but cannot because that decision is made by the cable company, not the paying subscriber!

Sincerely,

Rachel Binggeli

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

the Comcast/Time Warner cable merger will spell disaster for America! Not only are these the 2 biggest companies as it stand now, but their service is inferior to what we, as Americans, demand. Each of these two largest cable monopolies, both with the most customer service complaints, will control what 30% of Americans will be able to watch on cable TV. This will surely cause less choice, less competition and higher cable bills.

Not only will they decide what can be watched on TV, but they will defeat our freedom of speech by controlling what America hears, says and sees. That is UN-AMERICAN!

Get government OUT of controlling our lives! Business needs to operate FREE of government intervention! These companies are government sanctioned monopolies, given the power to silence independent competitive voices if it furthers THEIR business interests. The FCC needs to determine that this is NOT in the PUBLIC interest--MY interest. This merger is only in the government's interest in controlling one more aspect of our lives!

Serving the PUBLIC interest means more choice, more competition and lower cable bills. Vote NO to this merger.

Sincerely,

Bonnie Hansen

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Neither Comcast nor Time Warner Cable have programs of interest to me. I would like the FCC to approve additional cable providers to increase programming. The public should have access to many different viewpoints and subject matters, not less. Competition is essential to keep our nation vital. Monopolies are not in the public interest. Add more cable providers, don't reduce our choices.

Sincerely,

Cecilia Gaston

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast currently provides the worst customer service I have ever encountered. On numerous occasions they have overcharged me, and it took months to get the problem resolved and many hours on the phone with "customer service." In fact, I am currently trying to resolve yet another issue where Comcast has charged me for equipment that I do not have. Their monopoly power is what allows them to provide such poor service without incurring huge defections.

At the same time, my cable bill has increased astronomically over the last few years.

If this merger is permitted to go through, Comcast will become a completely unresponsive, uncompetitive monolithic monster.

I strongly oppose this merger - please use your authority in the way that it was meant to be used - to prevent such a result.

Thank you.

Sincerely,

Sam Theis

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is a costly provider of cable and internet services, with a monopoly in my community. They own NBC, home of MSNBC, a hyper partisan democrat party supporting media organization. Only Satellite providers presently compete with Comcast in my neighborhood. AT&T may be coming into the area as a provider, but the timing is uncertain. My daughter has Time Warner in North Olmsted, OH, and is very disappointed with them. To bring these two large providers together into a super monopoly does not serve the public interests, does not reduce costs, and will make them even more unaccountable as cable providers. I am wholeheartedly against this merger.

Sincerely,

Michael Mallon

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

As it stands right now Comcast is the only provider that I am able to get in my complex. This is unfair, they charge different prices for the same service, they overcharge and screw up monthly bills. It's a mess!! Get them organized first and doing business with people fairly before considering having them eat up another provider. You know before long they will be the only providers in the country, then what!!!!

Do your job FCC and pay attention to what's going on here. Someone in the government needs to stand up for the people of this country who pay all the bills.

Respectfully submitted

Etta Lange  
Westfield, NJ 07090

Sincerely,

Etta Lange

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

People in my area already have not much choice in their tv services. I can't even get cable because no company wants to spend the money to run it another 200ft to my street. I have no access to affordable internet, like people who have a cable option. The only choice I have is direct tv satellite which is a constant battle to try and get new stations or different programming. There are millions of Americans in similar situations. A Comcast.Warner merger will only make it harder for us to get a variety of unbiased programming.

Sincerely,

james moxley

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Limiting the amount of options available to the public is not appropriate. It would not have been good for Dish Network to buy Direct TV thus why the FCC prevented it. Having worked for a cable company in the past I know how many customers are moving away from cable tv and switching to services like Hulu and Netflix and simply using the internet for news. These two companies merging will drive prices up and force more and more people to get rid of cable all together.

Sincerely,

Amanda Grippa

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't think the Comcast/Time Warner Cable merger is in the public interest because of their already terrible customer service and lack of listening to their customers about programming, or the lack there of.

Sincerely,

Stephen Croes

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe it will result in less choice, higher prices, and even worse customer service than what I already receive. Plus, my son has Comcast and hates it but has no other option for his situation. He will be moving in a year and can't wait so he can get a different provider. We will be moving next summer and after we move and get out of our contract, we will never choose Time Warner Cable (TWC) again if we can help it. We will research and avoid the areas where TWC services and make sure we avoid those areas to live in. That's how much we dislike the service we are receiving from TWC! I can only imagine the nightmare situation that a merger would create by combining these two companies. The equipment I received at installation was from the stone-age and fails constantly. I have to unplug and replug the router on a daily basis (to reset it) just so that my internet and phone line works. Also, I am paying extra every month for faster internet, yet if one family member is playing online games it cannot accommodate another family member to stream music at the same time. I do not see these issues getting better with a merger, only worse.

Sincerely,

Laurie Caskey

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger shall reduce competition, increase more of one company's market share to nearly 1/3 of the country and increase costs. In addition, they provide a poor service and without competition they can be as bad as they desire and the consumer shall have fewer or no alternatives. We can NOT afford a Monopoly so stop this merger now.

Sincerely,

Tom Landry

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

The combined company would be an Internet and cable juggernaut with unmatched power to crush competition and hike prices for consumers. In fact, Comcast has admitted that prices will go up.

This deal would make Comcast the only traditional cable provider available to nearly two-thirds of the U.S.

This deal would allow Comcast to control a third of the cable and satellite market, and half of the bundled video/Internet market.

The merger would allow Comcast to use its market power to dictate the terms of broadband openness, cost and access at a time when the U.S. lags well behind other developed nations on each of these measures. With Comcast in charge, we'll continue to sink in the rankings.

Comcast is already bloated: In 2011, it merged with the mammoth NBCUniversal empire, putting it in control of Universal Studios, cable networks like Bravo, MSNBC and USA, and 24 local TV stations around the U.S.

If the merger goes through, Comcast would control way too much of what we see and how we see it online and on cable.

Sincerely,

Shaun Kelly

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I learn in school, when the monopoly of "MA Bell" was broken for the good of commerce on trade, and we all know how that turned out.

Now, in the most widely use entertainment media going,

You are about to CREATE a monopoly against all wisdom

and laws used for over 35 years. Small but growing internet TV

with several million subscribers are still struggling because of

Attitudes in. Please deny this step back in time...with a no vote.

Sincerely,

Sandra Tredway

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger would drive up the cost of cable TV and limit the available choices of programming. America needs more competition, not less. Access to programing is becoming more restricted in a time when there should be less restrictions and more availability of all kinds of news and information. Large, powerful corporations have a tendency to control available programing and information, thereby exerting undue influence over the public. Freedom of speech and access to information is the most basic American principle. The heavy regulation of the cable TV industry is obviously designed to keep out small, independent providers. But small independent businesses are the backbone of America.

This proposed merger would further drive up the cost to the consumer. In an age when a la carte channel selection should be the norm, customers are increasingly being forced to pay for ever larger channel packages, in order to receive the few channels they really want. Why must a consumer pay to support channels they find objectionable? Yet channels they do want to receive are not provided, even when there is a high demand. It would appear that the large corporations are actively controlling the voices Americans are allowed to hear, for their own political agendas. This is the result of too much control in the hands of too few. Better to open up competition and allow the industry the freedom to provide the choices customers are requesting. Please deny this merger request and serve the public interest by making our choice in cable TV providers broader, not more restricted. Thank you.

Sincerely,

Kathleen Vaara

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I have less choices now with Comcast than I do with DishTV. The merger will only make it worse since Comcast will have no need to try to be more competitive. I have asked Comcast to add BlazeTV but they refuse.

Sincerely,

Lee Reep

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

let's face it. The "Time" in Time Warner can't even run the magazine "Time" very well and that's a technology that's been around for over 100 years. These guys at Time Warner are a little out of their league. The quality of there service is really sub par on almost all standards. Assuming you don't have time warner cable as your internet provider, over there at the FCC, you could look it up on the internet. If time warner is you internet provider you're probably going to have to ask someone else to look it up for you that doesn't have Time Warner. You can use your cell phone for that. If you have a smart phone you won't have to worry about Time Warner not giving you coverage with your celll phone since they don't dabble in that area.

Sincerely,

John capelluto

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Time Warner Cable Executives will walk away with more than \$150M if the merger gets approved, so there's no chance our cable bills are going down. <http://consumerist.com/2014/03/20/time-warner-cable-ceo-has-80-million-reasons-to-root-for-comcast-merger/>

Comcast has been named the worst company in America.  
<http://www.theverge.com/2014/4/8/5593824/comcast-named-worst-company-in-america>

In 2013, Comcast spent the most on lobbying of any corporation, coming in second only to defense contractor Northrop Grumman. <http://thehill.com/policy/technology/206891-comcast-goes-for-shock-and-awe#ixzz39laD0B1S>

Two of the biggest cable monopolies with the worst customer service records will merge and dictate what 30% of America can see on cable TV. This means less choice, less competition and higher cable bills.

[http://www.pressherald.com/2014/02/14/comcast\\_s\\_purchase\\_of\\_time\\_warner\\_cable\\_likely\\_to\\_be\\_bad\\_for\\_consumers\\_\\_analysts\\_say\\_/](http://www.pressherald.com/2014/02/14/comcast_s_purchase_of_time_warner_cable_likely_to_be_bad_for_consumers__analysts_say_/)

Businesses should operate free of government intervention, but these companies are government sanctioned monopolies with the power to silence independent and competitive voices like The Blaze which Comcast REFUSES to carry no matter how many thousands of calls they ignore.

I Comcast Cable Internet because it already has a monopoly in Tuscaloosa, AL. and parts of the Taylorville community I live in so I already suffer from a lack of competition among Cable Internet Services. This merger will make competition much worse than it already is.

AT&T and T-Mobile were not allowed to merge because it would supposedly smother/stifle competition but the Comcast/Time Warner merger is much worse on an exponential scale.

Sincerely,

Darryl Lovell

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

My choice is limited to cable because I live in an apartment where I cannot put up a satellite dish. Fewer cable companies allow less competition and dictate content of programming. The air waves should be free like they used to be when I was young, paid for by commercials. There should be an advertising agency that owns a satellite that broadcast the signals for free, and we decide what programs we want to watch.

Sincerely,

Thomas Smith

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There are fewer and fewer providers of Cable service. As competition goes down so does customer satisfaction. Quality of service goes down. Response to consumer complaints and issues take longer if ever resolved. Price of service goes up, competition in the market place always provides the consumer with lower costs. Also control of the media and programming becomes more restricted. News is not covered with a free voice so that customers can get different points of views on issues or what is happening in this world.

Lets use a prime example of coverage. Two American journalists have been executed by having their heads cut off by Muslim extremists. What real coverage and outrage is there in the news media. Very little. This is an outrage.

Programing of stations promote agendas that go against the norms of our society. Example less than 3% of our population is GAY yet over 90% of our programs include that issue or agenda. When are we going to get back to the norms of our society.

Do not let Time Warner and Comcast continue. We need a free market for service providers.

Sincerely,

Daniel Stephens

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is already one of the largest providers, and also owns or has major interests in content creation such as NBC. By allowing a merger with Time Warner it would increase Comcast's power in the market to unreasonable, monopolistic, tendencies, and allow them far too much pressure and power when dealing with providers. They have already shown that they do not want to provide more choice for their consumers by ignoring their customers requests to work with and carry The Blaze. In summary, this merger would give the combined company too much power and influence in a already limited field and making it even harder for any competition to come into markets they are in.

Sincerely,

Ted Deitrick

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because my values are not being represented and their customer service is deplorable.

Comcast should not merge with Time Warner Cable and be allowed to further degrade an already unsuitable customer service department and shove politically-biased programming unto customers. One cable company should not control 30% - 40% of the market. This would result in less competition, less programming choices and even worse customer service than it already has.

Comcast has failed to provide their market with balanced programming. They have instead catered to left- leaning programming and ignored the conservative voice. Over the years, numerous requests for TheBlaze TV to be added have gone unanswered. Instead, they have allowed networks such as Al-Jazeera, Russia-Today and the like to be broadcast. It is my hope as an American that no Cable outlet operating in the United States would allow such programming garbage and expeditiously terminate those contracts. A network having any link to terrorists is criminal.

Comcast must realize that consumer demand for quality programming content matters. Professionalism and respect are still the cornerstones required for a business to prosper. A consumer's voice should never be ignored or silenced.

May I request again that they add "TheBlaze" TV, which provides compelling news shows, documentaries, reality programs and original specials. TheBlaze is more than a TV channel, it's a community. Faith, family, ingenuity, respect and truth are the values they share with their audience. I applaud their efforts.

CEO, Brian Roberts and EVP, David Cohen appears to be smitten with President Obama. They are seen playing golf and having lavish dinner parties together at Martha's Vineyard and in Philadelphia.

Mr. Roberts and Mr. Cohen host fundraisers for democrat parties, raising astronomical amounts of money, Brian Roberts is on the Presidents Jobs Council and they have the largest group of lobbyists in Washington, D.C. for this merger with 40 lobbying firms backing them. This entire merger reeks of political cronyism.

The optics are quite revealing in that they only care about enriching themselves by gaining more market share, becoming more powerful, keeping in the good graces of the President and pushing their left-wing political agenda while completely dismissing the conservative viewpoint.

Do not allow and already too fat & lethargic conglomerate to reap what is not deserved.

Sincerely,

S. Carpenter

Sincerely,

Susan Carpenter

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There are not enough choices for channels now, and this merger would further limits choices, and and add more cost to the programming.

Sincerely,

Tim Krause

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

When I first engaged Comcast in 2004, my monthly bill was \$43.00. Today it is \$86.00. The monthly charge has doubled. Have their operating expenses increased that much? I also notice that in the interval between 2004 and 2014, they have bought out MSNBC and now they want to buy Time/Warner? What was it that happened to Ma Bell back there a ways and why?

Sincerely,

Sonny Yellott

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It creates a massive corporate entity that will be even less serving of it's customers then either corporation is now. It is documented fact that the service give by either corporation now is bad and this will allow it to become even more uncaring merely because of its size..

I feel that it also goes against all laws and requirement of a monopoly, it is not good for the current customers nor any future custoers.

Sincerely,

Wayne Little

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

There are two thoughts on that: If you keep it separated they will compete in price and the upper government will get both sides of complaints and it will keep them as honest as possible through the system... Lots more of my thought process on that... Both are controlling what people see in their own way.. Example: For money, religion, and soo on.... Propaganda... Whatever... Love your show... I'm the only Republican on my side of my mother's side of my family... It's my choice and I thank you for reminding me of that! Once again, I love your show no matter what anyone else says...

Sincerely,

Tammy Cooper/Lama

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

broadcasters control such significant influence as to what is conveyed to the public regarding local and worldly events. It is not conducive to well-rounded, unbiased representation of news and information, to place such a broad base of subscribers to a single provider. For these reasons, I believe the public interest is best served by not allowing this merger.

Sincerely,

Alan Goldsby

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

If these two: Time Warner and Comcast merger - I'm certain my bill will SKYROCKET and I'm doing well to pay my bill with Time Warner now! What will they charge the customers after they merge services? Will they remove some of the dearly loved channels or just tack on an unaffordable price for them? Will they make the internet service better or worse? Right now, my service is S-L-O-W, and I purchased TURBO!. It should be FAST!

I DO KNOW ONE THING FOR SURE ... IF THE TWO OF YOU MERGE -CREATING A RIDICULOUS, UNAFFORDABLE BILL, WITH MY CHANNEL NETWORK GONE, I WILL DROP YOU! LIKE A HOT POTATO. I NEVER WANTED DISH NETWORK BUT YOU CAN COUNT ON IT - WHEN DISH GETS THE NEWS ABOUT THIS, THEY WILL HAVE MANY NICE OFFERS TO EASE THE FRUSTRATED TIME WARNER CUSTOMERS WHO FEEL AS THOUGH THEY HAVE BEEN SCREWED AGAIN!

Sincerely,

John Borie

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I believe it will allow these companies to exercise more control over the services they offer than is warranted in a free market system. We already have few choices in this part of CT for broadband service and because of this Comcast is free to continue to raise it's prices without any checks or balances. Basic internet access for my small business now costs over \$100.00 per month which seems to me to be excessive and represents an undue expense for a very basic service.

Sincerely,

scott abbott

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

It wil inhibit competition and surely will not lower rates for service.

Sincerely,

Joseph Haddakin

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I feel that when there is competition it is a win win for everyone. I feel it gives me an honest choice with better rates and service. The cable industry is very controlling and selective with very little input from the public. In our home we feel there is a lot of trash that is not family values building nor informative. we know this will only get bigger and out of control in the future if it comes down to the power of two big companies. American strength is in allowing growth through competition. We have already called our cable provider to request a program that we feel is very informative but got no answer nor action.

Sincerely,

June Endrizzi

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

My daughter has Time Warner and it is the only option for her area. It's the worse cable company ever! I have had Comcast in the past and it's not much better. It needs to be bought by a good cable company that can improve the service not just shifted from one terrible company to another one.

Sincerely,

Iris Cox

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Time Warner has never been in the public's best interest, remember AOL? Joining these 2 giants in telecom limits programming, competition, constitutes censorship on whatever they choose for us to watch or not watch. Information already has been filtered through the pro LGBT lobby, and decent programming is almost nonexistent on cable, or main stream media. Facts and history are being rewritten right in front of our eyes and no one is objecting - at least anyone in authority.

Sincerely,

Daniel Davis

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

merger of these already too big companies will only serve to further their monopolistic control of telecommunications resulting in even higher prices for the consumer. Telephone and internet access are already firmly in the hands of the cable companies. In many cases, mine included, their prices are predatory and akin to price-gouging. If anything, these companies should be able to compete AGAINST each other in the SAME markets; lower prices for the end user would be the result. A merger of these two telecommunications giants serves only their interest, not those of the public that the FCC is supposed to protect. It is imperative that the FCC block this merger.

Sincerely,

Arlene Wlazlo

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast Corp is a monopoly that is completely unresponsive to customer requests, has ties to the Federal government, and needs competition. We do not want another unresponsive utility to deal with, we need other utilities to be able to supply program content the we, the customer want, not the government sponsored content that is being fed into our homes on a continuing basis. The customers demand a responsive utility, fix it now!

Sincerely,

Doug Wakefield

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

I don't believe the Comcast/Time Warner Cable merger is in the public interest because I believe that my rates will increase and the cable channels available to me will decrease. This merger will greatly increase the bad customer service that is already out there. If a company is allowed to get this big, they lose all respect for the customer. The customer should always be heard and this will go against that.

Sincerely,

Audrey Sandlin

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Creating a government condoned oligopoly is never in the interest of anyone other than the company. And when the service being cornered is information, that's indoctrination at best, and loss of the right to liberty at worst. If that's what the United States is now condoning, then we might as well be Venezuela or Iran.

Sincerely,

Matthew King

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

This merger comes at a time when select watching is diminished -- I don't want this merger to be approved. It is not in the consumer's best

interests. It becomes 'big brother' in our lives because choice of programming becomes even more restrictive. The cost to the consumer is already

too expensive and too defined with the add-ons one might want to choose.

Thank You.

Sincerely,

Mildred Olzinski

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Don't allow this to go through - Please!! This would not be good for viewers.

Sincerely,

Kathleen DeMoss

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast already does not respond to customers request for access to the TheBlaze. If it becomes bigger without having to listen to it's customers, than why would they listen after they become a bigger bloated provider?

Consolidating choices to just a few providers removes competition. This is unAmerican.

If this merger is approved, I would look forward to a constitutional amendment to undo the FCC

Sincerely,

Roy allmond

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

These two networks had their own lineups and their customers loved them. When these companies merged a lot of money was lost.

Sincerely,

Adam Fernandes

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

that would seem to thwart and hamper free enterprise by making this a monopoly. I support more competition to bolster free enterprise and to help bring in more companies and increase job creation.

Sincerely,

David Chappell

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

that gives one company too much control of what all of america see's and hears on TV or otherwise.  
AT&T and Standard oil for example.

Sincerely,

craig coffman

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

1. MONOPOLIES ARE NEVER IN THE CONSUMER'S BEST INTEREST
2. COMCAST CUSTOMER SERVICE IS CURRENTLT AND HISTORICALLY RANKED AS THE WORST BY CONSUMERS
3. FROM PERSONAL EXPERIENCE, 'WORST' IS TOO GENEROUS WHEN DESCRIBING COMCAST'S CUSTOMER SERVICE
4. BECOMMING AN EVEN LARGER ENTITY WILL REMOVE ANY INCENTIVE TO IMPROVE CUSTOMER SERVICE.

Sincerely,

DONNA SIMMONS

**Re: MB Docket No. 14-57**

Dear Mr. Chairman and Commissioners:

I don't believe the Comcast/Time Warner Cable merger is in the public interest.

Comcast is a monopoly in this area. I am not able to receive FiOS because it's not available , and neither is any other provider here. Comcast and time warner share the same liberal views and seek only to further them By merging, and merging will only further stifle any opposing views that networks such as theBlaze may hold. I firmly believe in capitalism, but I support freedom of information more, and while a company may choose to broadcast what it wishes, I don't believe a monopolistic entity must be able to be the sole provider of mass media in a given area.

Sincerely,

Matt M
